CAREER OBJECTIVE

To build a career in a growing organization, where I can get the opportunities to prove my abilities by accepting challenges, fulfilling the organizational goals and climbing the career ladder through continuous learning and commitment.

EDUCATION

Oakland University, MI, USA

Jan 2023 – Dec 2024

MS in Computer and Information science—(CGPA: 4.00)

St. Ann's College of Engineering and Technology, AP,India

Jun 2018 – July 2023

Bachelor of Technology in Computer Science- (CGPA: 3.02)

SKILLS

Databases: SQL | MySQL | SQL Lite | MS-Access | Data Modeling | Data Mining | ETL Packages | Reporting Services

Tools: Pega 8.7 | Excel VBA | PowerPoint | Word | Access Database | Google Suite | Tableau | Scrum | Use Case Story | Django

Analytics: Descriptive | Perspective | Predictive | Logical Thinking | Multitasking

Data science and ML: Linear Regression | Decision tree | Apriori Algorithm | Market Basket Analysis | KNN

Programming: C | Java | Python | HTML | Data Structures | SAS | React | Node.js

CERTIFICATES

- Webathon in association with Brain O Vision
- ETHICAL HACKING conducted by ethical EDU FABRICA at IIIT Hyderabad
- AI WITH MACHINE LEARNING at IIT Tirupati in association with Tirutsava
- AWS Cloud Computing by APSSDC at SACET
- CYBER SECURITY & MALWARE ANALYSIS by Indian Servers at SACET
- WEBSITE DESIGNING USING WORDPRESS by Indian Servers at SACET
- Microsoft Certified: Azure Fundamentals

RESEARCH PARTICIPATION

1)Rapid Prototyping and Comparison of Extended Reality Prototypes

Mar 2024

to Evaluate User Experience & Performance in Remote Interactions (Participation)

The purpose of this study is to investigate a simulation system that represents a real-world system,virtual reality,augmented reality,augmented virtuality technologies that maximizes user experience for remote operations.

INTERNSHIP EXPERIENCE

Artificial Intelligence Engineer

Radical AI, New York

Apr 2024 - present

Software Backend Developer at [Radical AI](#)!

Data Analytics and Artificial Intelligence-Information Management

Wipro, Bangalore

Mar 2022 - July 2022

To Analyze Covid 19 Spread around INDIA we used 3 data sets.We Loaded this data into cloudera distribution in hadoop platform.Using tableau we joined data sets,using power BI,we converted the csv format into required visualization format.

PROJECTS

1)Point cloud Classification with [Pointnet](#)

Jan 2022 – May 2022

- Using Keras,Tensorflow,Trimesh Libraries in Jupyter notebook platform to create 3D data objects using Mesh and predicting the objects compared with the given labels.

2)Algorithmic adventure -[Python](#)

Jan 2023 – Apr 2023

- Text based Game using python code [Game](#).Each level has its own Algorithm.

3)Blue Sky Booking System

Sep 2023 – Dec 2023

- Created a flight Booking System Using relational database (e.g., [MySQL](#), PostgreSQL) with appropriate tables for flights, users, bookings, etc.

4)J2EE Web based system

Jan 2024 - April 2024

- Created an NOSQL MOMOGODB database which keeps information about homes, appliances, agents, owners and locations in Michigan using [Pega BPM Tool 8.7V](#)

5)Scalable Clustering Algorithm To Handle Challenges In BIG DATA for CLOUD COMPUTING

Jan 2024 - Apr 2024

- Comparing Fuzzy c-Means algorithms using the Apache Spark cluster in a (HPC) environment to handle Big Data.we enhanced the time latency of already proposed Fuzzy CMeans algorithms by using data partitioning, model pruning, asynchronous processing.
