

PROFESSIONAL SUMMARY

Health & Clinical Data Analyst with over 6 years of progressive healthcare data experience and 2+ years of hands-on analytics across hospital and research environments. Experienced in SQL-based data extraction, ETL development, cohort analysis, reporting automation, and performance monitoring using structured and semi-structured healthcare datasets. Strong understanding of EHR workflows, clinical data governance, interoperability concepts, and regulatory compliance (HIPAA, FERPA). MS in Health & Bioinformatics with demonstrated ability to translate complex clinical data into actionable insights through dashboards and statistical analysis.

TECHNICAL SKILLS

- Programming & Analytics: SQL, Python (Pandas, NumPy), R, PostgreSQL, Excel
- Healthcare Data & Standards: EHR Data, Clinical Documentation, Cohort Analysis, Longitudinal Analysis, FHIR, HL7, ICD-10, SNOMED-CT, DICOM
- Data Engineering & Quality: ETL Development, Data Extraction, Data Cleaning, Data Validation, Data Integrity Audits, Workflow Analysis
- Visualization & Reporting: Tableau, Power BI, KPI Dashboards, Reporting Automation, Operational Reporting
- Compliance & Governance: HIPAA, FERPA, Good Clinical Practice (CITI)

PROFESSIONAL EXPERIENCE**NLP Research Intern - Healthcare Data Analytics, Grand Valley State University, Michigan****Sept 2025 - Dec 2025**

- Developed Python-based pipelines to preprocess and structure healthcare narrative datasets (PSNet, FAERS)
- Applied feature extraction and exploratory data analysis to identify adverse event reporting patterns
- Integrated structured and unstructured healthcare data to support patient safety analytics

Healthcare Data Analyst, Sreeja Multi-Specialty Hospital, India**Nov 2022 - June 2023**

- Extracted and analyzed structured EHR and hospital operations data to support clinical quality monitoring and performance reporting
- Designed and optimized SQL-based ETL pipelines to transform raw patient-level data into standardized analytics-ready datasets
- Performed cohort and longitudinal outcome analysis to evaluate utilization and clinical performance trends across departments
- Implemented data validation checks to detect inconsistencies, missing values, and abnormal utilization patterns, improving reporting reliability
- Developed Tableau dashboards and automated performance reports that reduced manual reporting effort by approximately 25% and improved turnaround time for monthly reviews
- Partnered with clinical stakeholders to gather reporting requirements and support data-driven workflow improvements

Clinical Data Analyst - Outcomes & Research, Ranees Hospital, India**Oct 2021 - Oct 2022**

- Managed structured clinical datasets for observational and outcomes research studies
- Performed statistical analysis and data transformation using R and Excel
- Analyzed patient outcome trends and supported ad hoc reporting requests for clinical stakeholders
- Developed summary reports and visualizations to support evidence-based clinical discussions and quality review meetings

Clinical Documentation & Pharmacy Data Analyst (Internship), Karimnagar District Hospital**June 2016 - Sept 2021**

- Validated structured clinical documentation including patient demographics, symptoms, medication lists, and diagnostic requests to ensure data completeness and accuracy
- Standardized documentation fields, contributing to an estimated 15% improvement in documentation consistency across departments
- Mapped cross-department clinical data flow across registration, laboratory, imaging, and pharmacy services to enhance transparency in patient information exchange
- Extracted and analyzed medication utilization data to support operational reporting and inventory optimization
- Developed Tableau dashboards visualizing dispensing volumes and inventory turnover, reducing manual report preparation time by approximately 20%
- Audited prescription and medication documentation to improve data accuracy and enhance cross-department visibility into high-utilization drugs and stock levels

Operations & Data Analytics Student Assistant, Grand Valley State University, Michigan**Sept 2023 - Dec 2025**

- Conducted inventory audits and reconciled institutional asset records across library and campus operations.
- Analyzed usage data and generated Excel-based operational performance reports summarizing demand patterns and utilization trends.
- Ensured FERPA compliance while handling sensitive student information.

EDUCATION

Master of Science, Health & Bioinformatics, Grand Valley State University, Michigan

Doctor of Pharmacy (Pharm D), Sree Chaitanya Institute of Pharmaceutical Technology, India

PROJECTS**Early Alzheimer's Disease Prediction Using MRI & Clinical Metadata**

- Built Python-based preprocessing pipelines for MRI-derived and structured clinical datasets.
- Developed and validated machine learning models using cross-validation and performance metrics (accuracy, precision, recall, F1-score).
- Identified clinically relevant predictors supporting early-stage diagnostic insights.

Comparative Study of Methotrexate in Rheumatoid Arthritis (RA) Patients

- Conducted statistical analysis using Minitab to evaluate Methotrexate dosage impact on patient-reported quality of life outcomes.
- Performed hypothesis testing and comparative analysis to assess treatment effectiveness.
- Prepared analytical reports with visualizations to support evidence-based clinical discussions.

CERTIFICATIONS

- Good Clinical Practice (CITI Program)
- GCP for Clinical Investigations of Devices
- Basic Life Support (BLS)
- IACUC Compliance (CITI Program)
