

Ajay Sai Dasari

Java Full Stack Developer

OBJECTIVE

Results-driven Java developer with **5 years** of hands-on experience in designing, developing, and maintaining complex software solutions. Seeking a challenging role that allows me to leverage my extensive Java expertise, leadership skills, and innovation to contribute to the success of a forward-thinking organization.

SUMMARY

- Over **5 years** of professional experience in Requirements Analysis, Design, Development, and Implementation of **Java, J2EE** and client-server technologies.
- **Java/J2EE** development experience working within frameworks such as **Spring, Hibernate** or **Struts**.
- Worked with **JMS API, Spring JMS, IBM MQ, Active MQ, Rabbit MQ, MQ-Series API**, and **Kafka**.
- Worked with the **JavaScript** frameworks like **HTML 5, CSS 3, j Query, GraphQL** and **Angular**.
- Well experienced in using **JUnit, Selenium, Akamai, Mockito, Log4j, JMeter, TestNG** and **SOAP UI** for testing framework. Experience in **Jenkins** integration service for software development.
- Experience working with **Agile SCRUM/RAD** methodology and **(TDD)** Test Driven Development.
- Proficient in utilizing **AWS Lambda** to build **Serverless** architectures and improve application scalability and efficiency.
- Experience with implementing Service Oriented Architecture (**SOA**) using **SOAP** and **REST Web Services**. Strong hands-on experience with **Spring IO** and **Spring Boot**.
- Having Handful experience in using **OAuth 2** for **Microservices security**.
- Experience with Version Control tools like **GIT, GitHub, CVS, SVN** and build tools like **MAVEN** and **Gradle** with Integrated Development Environments like **Eclipse** and **IntelliJ** and **STS**.
- Deployed the Zero Down Deployment using **Kubernetes** orchestration service application.
- Expert level skills on **Angular, Angular, CSS3, HTML5, Node JS, jQuery, JavaScript, React JS, AJAX, JSON, Tag Libraries**.
- Experienced in developing and deploying **J2EE** components (**JDBC, Servlets, JSPs, EJBs**) in **Tomcat, WebLogic, WebSphere** and **JBoss** Application servers.
- Experience working with **CI/CD** tools such as **Bamboo, Jenkins, Jira, Bitbucket** etc. and implementing custom **Plugins**.
- Involved in all phases of Software Development Life Cycle (**SDLC**) in large scale enterprise software using Object Oriented Analysis and Design.
- Sound **RDBMS** concepts and extensively worked with **Oracle, PL/SQL, SQL Server & DB2**.
- Experience in Web Service Technologies: **SOAP, REST, Microservices, WSDL, Apache Axis, CXF, JAX-WS**.
- Integration with Hadoop, data warehouses and Analytics solutions.

EDUCATION

Bachelor of Technology from Jawaharlal Nehru Technological University, India
Master's in Computer science from Wichita State University, USA

PROFESSIONAL EXPERIENCE

Client: SunTrust Banks, Georgia, United States (Oct 2023 - Present) Role:

Java Full stack Developer

Description: SunTrust Banks, now part of Truist Financial Corporation, was a prominent financial institution offering a range of banking, lending, and investment services to individuals and businesses. I played a crucial role in the development, maintenance, and support of the digital applications and systems.

Responsibilities:

- Experience in handling messaging services using **Apache Kafka** implemented **Microservices** architecture to make application smaller and independent **REST web services** using **Jersey** with the enabled **OAuth**.
- Implemented **core java** Multithreading, Collections, Exception Handling, and **OOP's** concepts.
- Experience working in **Agile** development following SCRUM process, Sprint, and daily stand-up meetings.
- Managing the **OpenShift cluster** that includes scaling up and down the **AWS** app nodes.
- Conducted research and kept up to date with the latest advancements in **Java** and **Kubernetes** technologies, incorporating them into development processes.
- Implemented **J2EE** components using **Spring MVC**, **Spring IOC**, **Spring transactions** and **Spring security** modules. Use **log4j** or other logging frameworks for application logging and trouble shooting.
- Page design and development are done using **Oracle BPM**. Setup **CI/CD** pipeline process for the application using the **Jenkins**. Worked on Stash repository with Source tree similar to **GIT**.
- Implemented high availability with **Azure Classic** and **Azure Resource** Manager deployment models.
- Used **Angular 7 JS** components like modules, controllers, and built-in and synchronizing models with single page Applications (**SPA**). Involved in writing java **API** for **Amazon Lambda** to manage some of the **AWS** services.
- Developed and implemented the **MVC** architectural pattern using **Struts** Framework including **JSP**, **Servlets** and **Action classes**.
- Used **Eclipse** based **Spring Tool Suite (STS)** for development and debugging **Spring Boot** applications, **Micro services** and deployed into **OpenShift** cloud platform.
- Implemented a continuous delivery pipeline with **Docker** for custom application images in the cloud using **Jenkins**.
- Implemented **Microservices** into existing system architecture. Developed **Microservices** business components and **RESTful** service endpoints using **Spring Boot**.
- Streamlined the server Implementation by moving to **JSON** and **MongoDB** as the backend data model.

Environment: Java/J2EE, JSP, Servlets, Spring, Hibernate, Struts, XML, PHP, JAX-WS, UML, JavaScript, Typescript, CSS, DXP (Digital Experience Platform), HTML5, Agile/Scrum Methodology, Angular8, jQuery, Spring MVC, SVN, XSLT, Eclipse IDE, AJAX, JDBC, Maven, Bit bucket, Postman, Micro Services, Swagger JUnit, Log4j, Rally, Restful APIs, Maven,

Jenkins, Linux, Unix, Mac.

Client: Primerica, Georgia, United States (Nov 2022 – Sept 2023) Role:

Java Full stack Developer

Description: Primerica, a leading financial services company, specializes in providing insurance and investment solutions to middle-income families. I designed and implemented server-side logic and databases using Java, Spring Boot, and other relevant technologies.

Responsibilities:

- Expert in **Core Java** with in-depth knowledge of **Core Java** concepts such as Multithreading, Synchronization, Collections and Event/Exception handling.
- Involved in various phases of **SDLC** as requirement gathering, modeling, analysis, architecture design and development and the project was developed using **Agile** Methodologies.
- Worked on the modernization of a legacy and outsourced **UI** technologies used were **Angular 2/4, Angular Materials 2, CSS, Node JS, Express JS, and AWS (Amazon Web Services)**.
- Supports different markets for alerts and bugs, Analyze and understand fix them.
- Worked on integration of **AWS** Cloud configuration management and Centralized logging using **Spring Boot** and **Java** application. Used **Kubernetes** to orchestrate the deployment, scaling, and management of **Docker** Containers. Produced as well as consumed **RESTful** web services using Jersey **API**'s.
- Also created **YAMEL** files for using a swagger **API** within the **UI**. Developed test cases using **JUnit** to validate several business rules in the application. Developed **GUI** using **JSP, JSTL, AJAX, HTML, CSS, and JavaScript**.
- Used **HTML, XHTML, DHTML, Java Script, AJAX, Angular 1.x/2, JQUERY, XML, XPATH, JSP** and **Tag Libraries** to develop view pages in portal.
- Used **Redis, Jenkins** and **pipelines** to drive all **microservices** authentication builds out to the **Docker** registry and then deployed to **Kubernetes**. Developed applications using **J2EE, JSP, Servlet** and **Spring Bean** Classes.
- Implemented Model View Controller (**MVC-2**) Architecture using **Jakarta Struts** framework at presentation tier.
- Expertise in coding optimized **SQL** queries on databases like **Oracle**.
- Extensively used **Jenkins** for **CI/CD** and used **SVN** for version control and used **STS** as the **IDE** for developing the application. Developed the Request handler's application using Struts framework.
- Implementation of the design wireframe using **Angular 8.0** and exposing backend services which runs on **Spring Boot**. Here we also have another layer that makes use of **NodeJS** mainly used for authentication, authorization, and session maintenance. Developed Service Timeouts for **NoSQL, Mongo DB, Db2** and **Sybase**.

Environment: Java, J2EE, Spring framework, Spring MVC, Hibernate, Junit, JSP, Postgres, Reactjs, CSS, Servlets, JDBC, AJAX, Web

services, REST, SOAP, XML, GCP, GKE, CMS, jQuery, JavaScript, Oracle, Splunk, Web Sphere, SQL, Windows.

Client: Infosys Pvt Ltd. (Charles Schwab), Hyderabad, India (Aug 2021 - July 2022) Role:

Java Full stack Developer

Description: Charles Schwab is a leading American brokerage and banking company providing a wide range of financial services including investment management and advisory services. Spearheaded Agile-driven development process and seamless deployment through collaborative teamwork.

Responsibilities:

- Involved in Requirements gathering, Analysis, Design, Development and Testing of application using **Agile** methodology (SCRUM) in a test-driven development (**TDD**) approach.
- Changing the **AWS** infrastructure **Elastic Beanstalk** to **Docker** with **Kubernetes**.
- Implemented **AJAX** calls from backend without page refresh using **jQuery, AJAX, J2SE, Spring MVC** and **Hibernate**. Worked on **Oracle 9i, MySQL**.
- Worked closely with **DevOps** teams to streamline the deployment process and implement **CI/CD** pipelines using **Kubernetes**. Developed and deployed scalable **microservices** using **Java, Spring Boot, and Kubernetes**.
- Developed **Angular 7/6** material responsive web application pages using **Angular 8** -Material services, controllers and directives for front end **UI** and consumed **RESTful** web service **API**.
- Hands-on experience with **EC2, ECS, ELB, EBS, S3 VPC, IAM, SQS, RDS, Lambda, Terraform, Cloud Watch, Storage Gateway, Cloud formation, Elastic Beanstalk** and **Autoscaling**.

- Used **Java Servlets, JSPs, AJAX, XML, HTML** and **CSS** for developing the Web component of the application.

Environment: Java, JFC Swing, J2EE, Java Script, TypeScript, JSP, JDBC, AJAX, XML, Junit, Servlets, Spring, Hibernate, Tomcat Web Server, Oracle, Web logic Server, Xpath, UNIX, Windows.

Client : Pine Labs, Bangalore, India (Jun 2019 - July 2021) Role:

Java Developer

Description: Pine Labs is an India-based Financial and Retail service-based company. I worked for Digital Wallet Enhancement Project and pivotal role in the development and optimization of a cutting-edge digital wallet solution.

Responsibilities:

- Extensively worked on **Spark** using **Scala** on cluster for computational, installed it on top of **Hadoop** performed advanced analytical application by making use of spark with **Hive** and **SQL/Oracle**
- Used **JavaScript** and **jQuery** for validating the input given to the user interface.
- Developed Business tier and Presentation tier using **Struts, JSP**. Coding using **JSP, HTML**, and **CSS JavaScript** for validation, **Servlets** using **STRUTS** framework, **JDBC**.
- Implemented **Kubernetes** Stateful Sets to manage Stateful applications in the marketing environment, ensuring data integrity and high availability.
- Developed application using Frameworks **Spring MVC, Spring IOC, Spring AOP** and **Hibernate**.
- Used **Oracle** as database and involved in the development of **PL/SQL** backend implementation.
- Developing spring boot **Microservice** architecture applications and deploy them to **AWS EC2** instances using **CI/CD Jenkins** Pipeline.
- Worked on **Jenkins** for continuous integration with **Gradle** and **GitHub**.

Environment: Java 1.6, J2EE, Servlets, JSP, Spring-MVC, IOC, AOP, Multithreading, Hibernate, Eclipse, Angular-JS, NodeJS, CSS3, HTML5, Web logic Server, WSDL, SOAP, JAX-WS, Tomcat, Hadoop, Oracle 11g, Oracle SQL Developer, Linux, PaaS, GIT, JIRA.

TECHNICAL SKILLS

- **J2EE Technologies:** J2EE, Servlets, JSP, JSTL, JSF, JIRA, Angular JS, JDBC, MVC, OOP, Grails, Hibernate, spring, XML.
- **Web Technologies:** JavaScript, CSS, AWS, Mule ESB, HTML5, DHTML, XML, DTD, HTTP, HTTPS, JQuery1.8, jQuery UI, Angular JS.
- **Spring framework:** Bean Factory, Application Context, Dependency Injection/IOC, MVC, Struts, Data Binding, AOP, JDBC, ORM, JMS, Security, batch jobs, schedulers (Quartz).
- **Distributed computing:** SOAP WS, RESTful WS, JMS API, WSDL, JAXP, JAXB, JNDI and XML.
- **Languages:** Java, Python, PL/SQL, C++, C, Bash, UML, XML, HTML.
- **IDE Tools:** RSA, RAD, WSAD, Eclipse, NetBeans.
- **Web services:** JMS, MQ Series, SOAP, Rest, WSDL, JAX-RS and JAX-WS. **Databases:** Oracle, MySQL, MS SQL Server, MS Access, PostgreSQL. **Design Methodologies:** UML, Rational Rose, Agile, SCRUM, TDD, XP **Version control Tools:** SVN, CVS, Clear Case, and Git.
- **Operating Systems:** UNIX (Solaris, Ubuntu, Linux, and OSX); Windows 9x/XP/Vista/7/8.
- **Testing Tools:** JUnit, SOAP UI.
- **Application Servers:** Web sphere Application Server, BEA Web logic, Apache Tomcat, JBoss 4.2.x, 5.X, JBoss 6.1 EAP.
