Professional Summary

Data Analyst and Business Systems Analyst with 9+ years of experience in banking, finance, and insurance domains. Skilled in data mapping, SQL-based analysis, BI dashboards, ETL processing, and compliance automation. Proven record of enabling business decisions through advanced analytics, process optimization, and integration of ML models into financial systems. Strong communicator with expertise in translating complex datasets into actionable insights for executives and stakeholders.

Core Skills

- **Data Analysis & Visualization:** SQL, T-SQL, Power BI, Tableau, Excel
- **Data Warehousing & ETL:** Data mapping, Data modeling, Data validation, Oracle, MS SQL Server, ETL pipelines
- **Statistical/ML Techniques:** Regression, Random Forest, Text Classification, Predictive Modeling
- **Business Tools:** Jira, Confluence, Azure DevOps, MS Visio
- **Compliance & Regulatory Knowledge:** AML, KYC, CFPB, FHA/VA/USDA loan programs

Professional Experience

Business Systems Analyst | Cognizant – JP Morgan Chase, New York, NY

Dec 2015 – Oct 2022

- Designed and executed SQL-based data validation checks, reducing compliance errors by 15% in FHA and VA loan processing.
- Built **Power BI dashboards** to deliver real-time insights on risk exposure, loan approval trends, and regulatory performance.
- Conducted **ETL processes** for integrating structured/unstructured data into mortgage underwriting systems.
- Partnered with data scientists to integrate ML models for risk assessment and compliance, cutting loan processing time by 20%.
- Led GAP analysis (As-Is vs. To-Be), authored BRDs/FRDs, and developed UML/Data Flow diagrams to optimize workflows.
- Implemented Ellie Mae Encompass LOS modules, improving underwriting accuracy and loan closure efficiency.

Data Analyst Consultant | Tech Mahindra – Marathon Gas, Findlay, OH

Nov 2022 – July 2024

- Extracted and transformed large datasets to analyze operational efficiency and cost optimization in retail fuel operations.
- Designed reporting solutions that tracked sales performance and compliance, providing executives with trend-based insights.
- Partnered with QA to validate datasets and ensure accurate reporting during data migration projects.
- Conducted root cause analysis on financial discrepancies, reducing reporting issues by 30%.
- Automated monthly reporting workflows with Python and SQL, reducing turnaround time from 5 days to 1.5 days.
- Integrated POS transaction data with external fuel pricing indexes, enabling margin analysis and real-time competitive benchmarking.
- Designed Power BI dashboards with drill-down capability for regional managers, improving visibility into site-level profitability.
- Collaborated with finance and operations to standardize KPIs for consistent tracking.

Graduate Data Analyst (Academic Projects) | California Baptist University, Riverside, CA

Sept 2022 – Aug 2023

- Designed forecasting models using regression to predict financial performance trends.
- Applied data visualization techniques to illustrate business scenarios in Power BI and Tableau.
- Developed a text-mining pipeline to analyze customer feedback, identifying recurring service issues that influenced satisfaction scores.
- Conducted time-series analysis on enrollment data to support academic resource allocation decisions.
- Built ETL pipelines in Python to merge student survey data, financial aid records, and course performance metrics.
- Presented research with faculty at conferences, highlighting actionable data insights.

Product Owner / Data-Focused Analyst | IBM – Walmart, Riverside, CA (Remote)

Aug 2024 – Jan 2025

- Collaborated with customer database teams to ensure data consistency across initiatives.
- Managed and validated PI epics, features, and requirements, ensuring accurate data tracking in JIRA.
- Facilitated data-driven decision making by ensuring backlog items had clear acceptance criteria tied to measurable metrics.
- Led sprint reviews showcasing data quality and business outcomes to stakeholders.
- Partnered with data engineers to define requirements for real-time sales data pipelines, reducing lag in store-level reporting by 40%.
- Prioritized data-centric backlog features, balancing operational needs with analytics goals.
- Created Confluence documentation outlining data governance rules, improving onboarding efficiency for new team members.

Education

- MBA, Business Analytics – California Baptist University, CA (2023)
- Bachelors in Engineering – Punjab Technical University, India (2010)

Certifications

- Professional Scrum Master (PSM)
- Certified Scrum Product Owner (CSPO)
