(913)-253-6858 • gullapudianirudh4449@gmail.com • [LinkedIn](#) • [Leetcode](#)

PROFESSIONAL SUMMARY

- Versatile Software Developer with 4+ years of experience in full-stack development, proficient in Java technologies and modern JavaScript & TypeScript frameworks like React delivering scalable and efficient software solutions.
- Proficient in Java Backend Development, adept at Spring Boot, Spring MVC, functional programming for building enterprise applications, web services like SOAP and REST, microservices architecture and integrating SQL and NoSQL databases.
- Frontend experience with command over React and associated technologies for state management along with HTML5, CSS3.
- Strong exposure to Data Structures and Algorithms and design patterns.
- Commitment to software quality and best practices, with a track record of utilizing TDD/BDD methodologies.
- Proficient in using AWS (Amazon Web Services) services like EC2, VPC, Cloud Watch, Cloud Front, Cloud Formation, IAM, S3, Amazon RDS, Elastic Cache, SNS, SQS.
- Gained experience in developing Docker file to containerize applications to deploy on managed Kubernetes service EKS and AKS.
- Gained experience with various frameworks, namely Struts framework, Jakarta Server Faces (JSF), Spring Boot, Hibernate, Spring IOC, Spring Security, OWASP, Spring Cloud, Spring AOP, spring transaction Management, Spring Data, Spring Batch and Spring MVC.
- Proficient in configuring and optimizing CI/CD workflows, primarily using Jenkins, to enable smooth continuous integration, delivery, and deployment.
- Major responsibilities include understanding Business Requirements, Functional and Technical Specs, Detail Technical Analysis and Design, Identification of Resources, Requirement Gathering, Analysis, Testing and Quality assessment, Data Modelling, Software Development Life Cycle (SDLC) methodologies and have rich experience working with Agile (scrum) software development methodologies.
- Excellent verbal, written communication and presentation skills, problem solving and conflict resolution skills.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, SQL

Web Development: Spring Boot, Spring, React.Js, Node.Js, HTML5, CSS3, XML, Postman, JSP, JSF

Databases: MySQL, MongoDB, PostgreSQL

Cloud Services: AWS EC2, AWS Lambda, AWS Elastic Beanstalk, AWS CloudWatch, AWS EKS, Google Cloud Platform

Miscellaneous: Docker, Kubernetes, Maven, Apache Kafka, JIRA, JUnit, Mockito, J2EE, Linux, Jenkins

WORK EXPERIENCE

Symiler, Application Developer

01/2024 – Present

Tech Stack: Java, JSP, JavaScript, jQuery, Spring Boot, React, PostgreSQL

- Redesigned **REST APIs** and backend services with Java Spring Boot, to visualize and manage the user data, watchlists, and friend recommendations.
- Managed relational and non-relational data using **PostgreSQL** for user profiles and watchlists, and **MongoDB** for movie metadata.
- Integrated **Firebase Cloud Messaging (FCM)** to send push notifications for streaming availability and friend suggestions, boosting user retention by **15%**.
- Implemented secure **OAuth 2.0** authentication (Google/Facebook) and session management with **JWT** (JSON Web Tokens).
- Deployed the Application on **Amazon Web Services** (EC2, S3) for hosting and file storage, ensuring scalability, performance and an **85%** uptime.
- Implemented **Redis** Caching at the service layer, optimizing data retrieval speeds by **45%**.
- Involved in preparing **Unit Test** cases, used Mockito to prepare automated test cases.
- Involved in Team's Iteration plan meetings, Retro's and Design Meetings

Cognizant Technology Solutions, Java Developer

Client: Punjab National Bank

05/2022 - 07/2023

Tech Stack: Java, Spring Boot, MySQL, Spring MVC, Spring Cloud, Spring Batch, JUnit, Apache Kafka, Docker, AWS

- Modernized home loan system for a banking client, enhancing customer experience and efficiency. The transformative measures introduced cut down the loan processing time from **5 days to 12 hours**, resulting in highest mortgage disbursal.
- Engineered a microservice architecture using Spring Boot, focusing on Interest rate, Aadhar KYC verification and Credit Assessment modules. facilitated microservice communication using Spring Cloud Stream and **Apache Kafka**.
- Developed a robust data infrastructure using **Amazon RDS** with **MySQL** and **Spring Data JPA**. Implemented **Redis** Caching at the service layer, optimizing data retrieval speeds by **35%**.
- Engineered a production-grade **REST API** in Java Spring Boot to automate index creation on the database which reduced index creation time by **74%**.
- Enhanced the backend system security by implementing **Spring Security** and Azure Directory for OAuth2.0 authorization in microservices architecture, enhancing the security and compliance of credit assessment report access.

- Attained **95%** test coverage by adding Unit Tests to **20+** backend classes and **80+** methods using JUnit and Mockito.
- Collaborated with the **DevOps** team to write **Docker** files for application containerization and contributed to the orchestration of deployments on **AWS EKS** using **Kubernetes**, ensuring a consistent **90%** uptime.
- Emphasized best practices in code quality, adept at service-oriented architecture and **functional programming**.

Cognizant Technology Solutions, Java Developer

Client: Imagine Communications

07/2021 - 05/2022

Tech Stack: Java, JUnit, C#, XML, JavaScript

- Created end-to-end video playout solution workflows using **Java**-based Blueprint Generation tool scripts, improving workflow efficiency by **20%**.
- Analyzed and resolved playout issues related to audio, video, or metadata components in workflows.
- Enhanced the web-based playout configuration manager tool using **JavaScript**, increasing user interaction efficiency.
- Integrated workflow components to create a playout workflow, leading to an overall improvement in system performance.
- Performed **code** reviews and provided insights on design improvements, enhancing code quality.
- Conducted **manual UI testing** and created unit test cases, increasing test coverage by **40%**.
- Utilized **Jenkins** as **CI/CD** pipeline to deploy application/ code changes to development, test, acceptance and production environments for continuous integration and continuous deployment.

Cognizant Technology Solutions, Software Developer Intern

01/2021 - 06/2021

Tech Stack: Java, Apache Kafka, Spring Boot, AWS EC2, RDS

- Developed backend **microservices** for an e-commerce website, managing product descriptions stored in **AWS RDS** and displayed on the UI based on filters like price range and category.
- Deployed microservices on **EC2** instances for public accessibility.
- Created Unit Tests for the application.

PROJECT EXPERIENCE

Comprehensive E-Wallet Microservices Platform

- Engineered a scalable e-wallet platform utilizing Java and Spring Boot, segregating core functionalities into microservices for User Profiles, Financial Transactions, Wallet Balances, and Real-Time Notifications, adhering to RESTful standards
- Implemented Apache Kafka for efficient message queuing and stream processing across services, coupled with Redis caching to expedite transactional data access and improve system responsiveness under high-load scenarios
- Fortified application security by integrating Spring Security and OAuth2 frameworks for stringent authentication and authorization, and orchestrated service deployment using Docker containers to streamline development, testing, and production workflows

Scalable Event Booking Web Application on AWS

- Developed a full stack web application for events booking hosting with MERN Stack and Integrated Stripe payment gateway
- Built a custom AMI for a web application using Packer, with all necessary dependencies and system service file, resulting in **99%** automated startup of EC2 instances and saving **90%** of manual work with user-data scripts
- Deployed production-ready infrastructure including auto-scaling groups, load balancers, RDS instances, and CloudWatch alarms across multiple availability zones, succeeding with **90%** uptime and seamless horizontal scaling during peak traffic
- Established GitHub Actions to trigger merge requests and motorized workflows with checks of the Unit tests

EDUCATION

University of Central Missouri

08/2023 - 12/2024

Master of Science in Computer Science

Courses: Data Structures & Algorithms, Software System Design Implementation, Database Systems

Gayatri Vidya Parishad College of Engineering| Visakhapatnam, India

08/2017 - 05/2021

Bachelor of Technology in Electronics and Communication Engineering

ACHEIVEMENTS

- Honored with 'Always striving, never settling' award for my debutant project at Cognizant.
- Honored with 'Project Team of the Quarter' award for my project at Cognizant.
