EDUCATION

Bachelor of Arts in Computer Science

July 2025

Florida International University; Miami, FL

- Dean's List 2024 and 2025

Associate Degree in Game Design and Development

April 2023

Miami Dade College; Miami, FL

- M.A.G.I.C. Club member

PROFESSIONAL SUMMARY

Results-driven Python and Game Developer with a strong background in building and optimizing back-end services, interactive game mechanics, and contributing to cross-functional Agile teams. Adept at translating complex requirements into innovative, efficient solutions and skilled in Python, SQL, C++, Unity Game Engine, and the Django framework.

TECHNICAL SKILLS

Languages: Native Spanish, Fluent English

Frameworks & Tools: Microsoft Office, Unity Game Engine, MySQL Workbench, Git, GitHub, Django, Maven, Javalin, JUnit, Mockito, Logback, Spring Framework, Spring Boot, Spring Web Module, Spring Data JPA Module.

Programming Languages & Database Management: C/C++, JAVA, Python, HTML, CSS, JavaScript, SQL, JDBC,

PROJECTS

Freelancer Invoice & Time Tracker | Miami, FL

Jul 2025

- Designed, architected, and implemented a full-featured freelance business web application using Django/Django REST Framework to track time, manage clients/projects, and generate PDF invoices.
- Built secure user authentication with Djoser (TokenAuth/SessionAuth), invoice lifecycle management (Draft/Sent/Paid), searchable history logs, and client/project associations
- Deployed the application in Render.com, using PostgreSQL in production, achieving sub-3s response times and adhering to high availability and performance targets.
- Created a responsive, user-centric dashboard to help freelancers reduce billing errors and present professional invoicing workflows.

Restaurant Backend API | Miami, FL

Aug 2024

- Developed a robust backend API for a restaurant management system, enabling seamless operations and efficient data handling.
- Established secure user authentication and authorization with Djoser to ensure data privacy and secure access control.
- Built on Django(Python) with SQLite as the database and deployed on Render.com.

Engine Trouble Virtual Reality Game | Miami, FL

Jan 2022 - May 2023

- Implemented essential features and mechanics to enhance gameplay and players experience.
- Collaborated in drafting and executing levels, including basic adjustments, development, and arrangement of tools in game levels.
- Learned to collaborate with a team of 20 people while working on a game project using Git.
- Learned and familiarize to work with Virtual Reality Technologies.

CERTIFICATIONS

IBM - Python for Data Science, AI & Development

Meta - Back-End Developer Specialization

Meta - Database Engineer Specialization

RELEVANT COURSEWORK

- Software Engineering II
- Database Management
- Data Structures
- Artificial Intelligence
- Java Programming
- Systems Programing

WORK EXPERIENCE

Java Intern

Aug 2025 - Present

Revature; Miami, FL

- Developed programming skills in Java, SQL, RESTful API Construction and Spring Framework
- Implemented project work including construction of functional REST APIs using Test Driven Development methodologies
- Completed 144 Coding Activities
- Showcased understanding of concepts through fourteen (14) evaluations
- Leverage Java APIs to write algorithms to solve various challenges and problem sets

VOLUNTEER EXPERIENCE

[P1] Games | Miami, FL

Nov 2024 - Apr 2025

Game Programmer

- Engineered and optimized game mechanics, scripting, and gameplay features using Unity(C#).
- Partnered with a cross-functional teams of over 10 people, including designers, artists, and producers, within an Agile development framework.
- Created and maintained reusable codebases, reducing development time for future projects.
- Performed version control workflows using Git and contributed to technical documentation.
- Prototyped experimental features to validate gameplay ideas, integrating user feedback.
