

Furkhan M. Syed

+1 8573084150 | furkhanprof@gmail.com | Boston, MA(Open to Relocate)

PROFESSIONAL SUMMARY

Experienced Python Developer with a **master's degree** in **Data Science** from Fitchburg State University and **5 + years** of expertise in **data analysis**, machine learning, and **web development**. **JavaScript** Proficient in creating reports and dashboards using **Python**, Seaborn, and Matplotlib. Applied **machine learning** algorithms, **AI Ops** and Auto **ML libraries** to extract **insights** from data. **Developed** custom data analysis and **Data Visualization** tools tailored to project needs. Implemented JWT authentication with **Django REST APIs**. Skilled in deploying and fine-tuning machine learning **models** and **statistical analyses** with Scikit-Learn. Adaptable to **Agile** and **Waterfall** methodologies, with strong **communication**, collaboration, and **management** skills. Effective in working with diverse stakeholders and cross-functional teams in **healthcare** industries.

EXPERIENCE

Machine Learning Engineer | Finvi | September 2022 to January 2024

- Created **reports** and **dashboards** using Python and its **libraries** for **Data Visualization**, data analysis and processing.
- Applied Artificial **Intelligence**, **machine learning algorithms** with using **PyTorch**, **TensorFlow**, **Encoding**, **standard Scaler**, Hyper-parameter Tuning, **cross-validation**, and Auto ML Libraries.
- Worked on **predicting** using **Machine Learning** Model if a **patient** has a heart failure or not based on social, labs, vitals, other **medical records**.
- **Research** and created **POC** for utilize **LLM**, **Langchain**, **Generative AI**, **Vector Database**, **Open AI**, **Hugging Face** and advanced **NLP text** recognition models to generate report in text on predicted patient details.
- Analyze d integrated and **extensive datasets** to extract value, which directly **impacts** and influences **business** decisions.
- Understood how **transformers** works, **encoders** and **tokenizers** work in generative AI **text generation**.
- Make our **data** more **discoverable** and easier to use for **analytics** and **Machine learning modeling** using **data engineering**.
- Worked on Open-source ML **frameworks** like Auto-SkLearn, H2O.
- Developed models using **classification** and **regression algorithms** with that utilizing **deep learning** and **neural networks**
- Developed custom Data Analysis, **quantitative** analysis, **data mining**, and the **presentation** of data and **visualization** tools such as **Alteryx**, **Tableau**, **Power BI** and with python libraries lie Seaborn and Matplotlib.

- Maintained application with **ML-ops** and **CI/CD pipelines** for models and do **cloud computing** and utilize **AWS Lambda, S3, EC2 Instance, IAM, Azure Databricks** and ML tool **AWS SageMaker**.
- Collaborated with stake holders to create dashboards and reporting tools like **Tableau**.
- Established **Data Pipelines** and **ETL** processes, enhancing data accessibility, AIOps and transformation.
- Production **support**, event **logging**, code **quality** improvement, test cases and automation of tasks.
- Actively **engaged** in continuous **learning** and professional **development** by keeping up-to-date with the latest advancements in data analysis and **visualization**, attending workshops, and **contributing** to online communities such as **GitHub, Jira, Confluence** and **Stack Overflow**.
- Working knowledge of **SQL/query languages** on **MySQL** and **NoSQL** database like **MongoDB**.
- Conducted **exploratory data analysis** (EDA) using **Python**, uncovering hidden patterns and trends within data to guide business strategy and decision-making.
- Worked on **Fast Api** and **stream lit** to validate/ add **frontend** to expose our **model's** interaction.
- Developed and **fine-tuned machine learning models** using **TensorFlow**, including **regression, classification**, clustering, and **deep learning** models, for a wide range of **applications**.
- Collaborated with financial experts to create dashboards and **reporting tools** like Tableau that provide **real-time insights** into financial performance on **healthcare** data, aiding in strategic planning and investment strategies.
- **Researched** on how to utilize the **LLM** on our **application**.

Software Engineer/Data Scientist | Archimydes | April 2021 to July 2022

- **Spearheaded** the conversion of ECG data **handling** from **LabVIEW** to **Python**, improving efficiency.
- Utilized Python libraries like **Matplotlib**, Seaborn, **Pandas**, NumPy and **Scikit-Learn** for data analysis.
- Work with **AI/ML teams** to understand their **business** and **technical** problems and **deliver** data to **support** the **solutions** to those problems
- Implemented **full stack** handling with **Django, Flask** Rest API, **ReactJS frontend**, and CI/CD pipeline.
- Deployed data visualization **techniques** to extract insights from ECG data.
- Worked on Machine Learning **PyTorch, Natural Language Processing**, OpenCV, **Image Processing** and advanced **AI** methods.
- Maximized data analysis and **visualization** potential through expert use of **Python libraries** like **Matplotlib**, Seaborn, Pandas, **NumPy**, Regular Expression (re), and Scikit-Learn on **Heartrate** ECG data.
- Pioneered **data-driven** insights, **data cleaning**, preprocessing, and manipulation initiatives using **Pandas** and NumPy libraries, ensuring data accuracy and **quality**.

- Full stack **handling** with Django and **Flask Rest Api** and ReactJS frontend, with CI/CD pipeline with **version control** of **Git** and **GitHub**, and containerization with **Kubernetes (Jenkins)**
- Increased **code quality** with **exception** handling and **logging management**.
- Developed **Django Cronjob's** for scheduled tasks and computation.
- Adopted the Regular Expression (re) library for advanced **pattern** matching and **text processing** in ECG data, enhancing **data extraction** capabilities.
- Conducted **statistical analysis** using **Python** libraries like **SciPy** and **Stats** models.

Python Developer | Apollo Hospitals and Telehealth | October 2019 to March-2021

- Assisted in the development of **full-stack web applications** leveraging **Python**, Django, **MySQL**, **HTML**, **CSS**, **jQuery**, **Jinja Templating** and **JavaScript**, elevating user experiences and overall functionality.
- Worked on **Object Relation-Mapping** (Django ORM) for **query**.
- Executed server-side application development, designing **RESTful APIs** and integrating **databases**.
- Experienced Python Developer with a **master's degree** in Data Science from Fitchburg State University and 3 + years of expertise in data analysis, machine learning, and web development. Proficient in **Data Visualization** using Python, Plotly, Seaborn, and Matplotlib. Applied **machine learning** algorithms and **Auto ML** libraries to extract insights from data. **Developed** custom data **analysis** and visualization tools tailored to **project** needs. Implemented **JWT authentication** with Django **REST APIs**. Skilled in **deploying** and fine-tuning machine learning **models** and statistical analyses with Scikit-Learn. Adaptable to **Agile** and **Waterfall** methodologies, with strong **communication**, collaboration, and **management** skills. Effective in working with diverse **stakeholders** and **cross-functional** teams. front-end **web development** frameworks like **ReactJS**, **Bootstrap**, and **jQuery**.
- Executed server-side application development using Python and **Django**, designing **RESTful APIs** and integrating **MySQL databases**, streamlining data management and processing.
- Managed sophisticated database systems using **MySQL**, **PostgreSQL** and **MongoDB**, ensuring **secure**, efficient **data** storage and **retrieval**.
- Integrated cutting-edge front-end web development frameworks like **ReactJS**, **Bootstrap**, **jQuery**, **Ajax** and **JavaScript** libraries, **optimizing** application **responsiveness** and interactivity **Json Web Token (JWT)** Login Authentication with Django Rest APIs.
- collaboration, branch **management**, and **seamless code** integration.
- Empowered data-driven decision-making by creating rich, **interactive dashboards** and reports using **Tableau**.
- Administered version control via **Git** and **GitHub**, **facilitating** efficient team collaboration.

SKILLS

Python | Data Science | Full Stack Development | Machine Learning | Data Analysis | Rest API | Data Visualization | Flask | HTML5 | JavaScript | Django | ReactJS | Deep Learning| CSS3 | R | MongoDB | Tableau | AI | NLP | Java | Computer Vision | OpenCV | GitHub | Jenkins | CI/CD pipelines | ML-Ops | MySQL | Kubernetes | SkLearn | Scipy |Presentational Skills| Databricks Stream Lit | Large Language Model (LLM)

Tools

Jenkins | Jupyter Notebook | VS Code | AWS SageMaker | Rancher | Dynatrace | Cloudbees | Gitlab | Bitbucket | GitHub Desktop | MYSQL Workbench | Tableau | Power BI | Azure | Talend | Studio 3T | Power point Presentation | word document | Excel

EDUCATION

Masters in Data Science | Fitchburg State University | December 2023

Bachelors of Engineering (CS) | Osmania University | October 2020

CERTIFICATIONS

- [Machine Learning], [Udemy] - [2023]
- [Data Analysis], [ANZ] - [2020]
- [Big Data], [Udemy] - [2020]
- [Python Programming], [Udemy] - [2020]

CURRENT LEARNINGS/WORKING

- Focusing on advanced AI-models like large language Models (LLM) such Generative AI and LLMs (such as GPT-4, LLAMA or BERT), OpenAI, Hugging Face, Croma-DB and FAISS for utilizing open-source chat algorithms.

PROFILE

LinkedIn: <https://www.linkedin.com/in/furkhan26/>

GitHub: <https://github.com/furkhan26>

INTERESTS

- Passionate about playing and watching cricket.
- Interested in collaborating on web development and AI projects.
- Enjoys attending stand-up comedy shows and watching comedy movies.
