SUMMARY

Results-driven Java Developer with 5 years of experience designing, developing, and deploying scalable web and enterprise applications using Java, Spring Boot, React.js, and RESTful APIs. Skilled in modernizing legacy systems into cloud-native microservices on AWS and implementing end-to-end CI/CD pipelines using Jenkins, Docker, and Kubernetes. Strong background in Agile/Scrum environments, with hands-on expertise in SQL, MongoDB, and real-time messaging using Kafka. Proficient in leveraging Gen AI APIs and modern frameworks for automation, analytics, and intelligent feature integration. Adept at collaborating with cross-functional teams to deliver secure, high-performing solutions in healthcare, telecom, and insurance domains.

SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, R
Web Development: HTML5, CSS, React.js, jQuery, Bootstrap, XML, Angular, Node.js
Frameworks and Tools: Spring boot, AngularJS, Hibernate, Hadoop, Spark, Git
Databases and Cloud: SQL, MongoDB, AWS ECS, S3, GCP
Software Engineering: Design Patterns, OOPs, Service Oriented Architecture, TDD, Scrum and Agile methodologies
Application Servers: Apache Tomcat, Apache Camel, JBoss, WebLogic
Security & Authentication: OAuth, JWT, API Gateway Security
IDE & Testing Tools: Eclipse, IntelliJ, NetBeans, JUnit, Mockito
DevOps Tools: CI/CD (Jenkins), Docker, OpenShift, GitHub, Kubernetes

WORK EXPERIENCE

AT&T

Atlanta, TX

Java Developer

June 2023 - Present

- Developed and maintained scalable microservices using **Java 11** and **Spring Boot** to manage customer orders, real-time status updates, and provisioning flows for AT&T's high-traffic order management platform.
- Designed and consumed **RESTful APIs** to enable seamless communication between the customer portal, billing system, and order orchestration engine.
- Implemented **Spring Data JPA** and optimized complex queries for Oracle DB to ensure high performance in processing customer order data and historical lookups.
- Integrated **Apache Kafka** for asynchronous messaging between internal services, improving reliability and responsiveness of order updates and notifications.
- Participated in backend performance tuning and refactored services to reduce response time by **~30%** under peak load conditions.
- Used **Redis caching** to minimize database hits for frequently accessed configuration and order tracking data, enhancing throughput and reducing latency.
- Wrote comprehensive **unit and integration tests** using JUnit and Mockito, achieving **85%+ code coverage** across backend modules.
- Deployed microservices to **AWS ECS** using **Docker containers** and configured **Elastic Load Balancing (ELB)** for high availability and fault tolerance in a multi-region setup.
- Integrated backend services with **AWS S3** for document storage, and used **CloudWatch** for centralized logging, custom metrics, and proactive alerting of service health and performance issues.
- Participated in production support rotations to troubleshoot backend issues and ensured SLA compliance with AT&T service teams.
- Mentored junior developers in code quality, Git workflows (feature branching, PRs), and Agile best practices.
- Used **Postman** and **REST Assured** for API testing and validation during development and release cycles.
- Managed **GIT** repositories and established CI/CD pipelines using **Jenkins** and **Maven**, reducing deployment cycles and improving release efficiency by **25%**.
- Collaborated with cross-functional teams in **Agile sprints**, actively contributing to **daily stand-ups**, **sprint planning**, and **code reviews** to maintain code quality and timely delivery.

Optum

Hyderabad, TS, India

Java Developer

Sept 2021 - Aug 2022

- Engineered scalable microservices using **Java**, **Spring Boot**, and **Apache Kafka** to automate claims adjudication workflows, processing over **2 million claims/month** with a **40% reduction in latency**.
- Designed and implemented centralized **logging and monitoring** using **ELK Stack** and **AWS CloudWatch**, cutting incident resolution time by **45%**.
- Assisted in containerizing services with **Docker** and deploying them on **AWS ECS (Fargate)** for scalable and managed compute infrastructure.
- Supported UI development using **React.js** and **Material-UI**, ensuring responsive and accessible interfaces for claim review modules.
- Implemented basic security features using **OAuth 2.0** and helped manage secrets and credentials securely with **AWS Secrets Manager**.
- Optimized database queries for claims history retrieval using **Spring Data JPA** and **PostgreSQL**, reducing query execution time by **60%** and improving system responsiveness during peak hours.
- Automated deployment workflows with **CI/CD pipelines** in **AWS CodePipeline** and **CodeBuild**, reducing manual errors and improving release frequency.
- Achieved **95%-unit test coverage** using **JUnit**, **Mockito**, and **Spring Cloud Contract**, significantly lowering post-release defects.

- Participated in daily stand-ups, sprint planning, and retrospectives as part of an Agile team to ensure on-time and high-quality deliverables.

DXC Technologies
Associate Software Engineer

Hyderabad, TS, India
Oct 2019 - Aug 2021

- Developed **data ingestion pipelines** using **Apache Camel** to transform and route XML/JSON claim data between external APIs, internal rules engine, and the database.
- Developed and maintained RESTful APIs using **Java** and **Spring Boot** for a policy administration module serving 1M+ insurance customers, improving API response time by **30%**.
- Collaborated in migrating a monolithic application to **microservices architecture** using **Spring Cloud** and **Docker**, which improved service scalability and reduced deployment time by **40%**.
- Used **OAuth 2.0** and **JWT** for secure authentication and session management across internal microservices and third-party claim evaluation tools.
- Created reusable UI components using **React.js** and **Redux** for a claims management dashboard, improving claim process visibility and reducing customer complaints by **25%**.
- Used **Jenkins pipelines** and **Docker files** to automate multi-stage deployment workflows, ensuring traceability and versioning in UAT and production.
- Participated in the creation of **CI/CD pipelines** using **Jenkins**, **Git**, and **Maven**, resulting in **3x faster release cycles** and fewer deployment rollbacks.
- Created and tuned **MongoDB aggregations** for analytics views that powered risk scoring engines and report generation modules.
- Worked in an **Agile (Scrum) environment**, participating in **daily stand-ups, sprint planning, and peer code reviews** to ensure timely delivery of features and continuous improvement.

EDUCATION

The University of Memphis
MS in Computer Science (GPA: 3.4)

Memphis, TN

- Relevant Coursework: Software Engineering, Operating Systems, Algorithms & Data Structures, Data Mining.

ACADEMIC PROJECTS

Email Phishing Detection | HTML, CSS, MySQL, React.js, Node.js |

- Worked on a **machine learning-based web app** to detect phishing emails with **92% accuracy**, using **Naive Bayes classification** and optimizing data processing with **MongoDB**.
- Designed **RESTful APIs** for real-time phishing alerts and integrated a user-friendly **React.js frontend**, enhancing security by analyzing spam trends and flagging risky keywords.

Property Administrative Management | ReactJS, JavaScript, MySQL, HTML, Bootstrap, SDLC, AWS |

- Developed a system for **tenant management, lease tracking, and financial reporting**, hosted on AWS.
- Designed a **user-friendly interface** and developed **back-end functionality** in **Java**, improving data processing by 15%.
- Collaborated with teams to gather requirements and employed **agile** practices for feature delivery. Practices to iteratively deliver features and respond to evolving needs in the property management domain.

CERTIFICATIONS

- SAP Certified Development Associate – ABAP with SAP NetWeaver 7.50 issued by SAP SE for scoring 94% in SAP Global Certification test. ([Link](#))
- Received Coursera certifications in Getting started with Python and Web Development using HTML, CSS, and PHP. ([Link](#))
- AWS Certified Cloud Practitioner ([Link](#))
