EDUCATION

University of Illinois Urbana-Champaign

Aug 2024 – May 2026

Master of Science – Information Management (GPA: 3.98/4.0)

Coursework: Methods of Data Science, Data Warehousing and Business Intelligence, Data Mining, Information Modelling

Savitribai Phule Pune University

Aug 2020 – May 2024

Bachelor of Technology – Computer Engineering (CGPA: 9.12/10)

Coursework: Software Engineering, Database Management Systems, Machine Learning, Artificial Intelligence

PROFESSIONAL EXPERIENCE

University of Illinois Urbana-Champaign | Data Analyst

Jun 2025 – Present

Tech– Python (NumPy, Matplotlib), API, SQL, Tableau

Champaign, Illinois

- Queried and retrieved **financial data** using **Python** with **API** integration and **JSON** parsing and **SQL** to organize invoices and budget records into a structured format, which streamlined data access and reduced retrieval time by **30%**
- Developed dashboards in **Tableau** to visualize **5+ KPIs** such as monthly budgets, department-wise expense summaries, and spending trends, improving reporting efficiency and minimizing manual effort by **20%**
- Evaluated multi-year enrollment and funding trends using Python libraries like **NumPy** and **Matplotlib** to identify patterns in resource distribution, contributing insights that supported a **10%** improvement in financial decision-making

Business Intelligence Group | Data Analyst

Jan 2025 – May 2025

Tech– Apache Spark, Google Dialogflow CX, Qlik Sense

Champaign, Illinois

- Analyzed **1TB+** of **transactional data** with **SQL** and **Apache Spark** to build an **AI-powered chatbot** in **Google Dialogflow CX**, centralizing historical records and cutting query resolution time by **40%**
- Utilized Python-based data pipelines to process query logs, applied **statistical analysis** to uncover patterns, and implemented **AI/ML-driven NLU models**, optimizing response accuracy by **35%** and lowering errors by **25%**
- Monitored system interactions through **A/B testing** and designed **Qlik Sense** dashboards to track real-time usage patterns, identify performance bottlenecks, and optimize workflows, boosting user engagement by **30%**

Bosch Limited | Data Analyst

Jul 2023 – Dec 2023

Tech– SQL, Power Query, Power BI, ETL, VLOOKUP, Pivot tables, VBA macros

Nashik, India

- Refined **supply chain datasets** using **Power Query** and **SQL** to surface bottlenecks in production flow, enabling early issue detection and facilitating improvements that boosted throughput by **10%**
- Automated weekly reporting tasks using advanced **Excel functions** like **VLOOKUP**, **PivotTables**, **VBA macros**, and visualized trends in **Power BI**, reducing manual effort by **6+ hours/week** and ensuring consistent tracking across teams
- Processed real-time machine sensor data in Snowflake and engineered transformation models in **DBT**, improving **ETL** pipeline efficiency and reducing data lag from **10 to 4 hours**, which enabled faster and more reliable analytics integration

PHN Technology | Data Analyst

Jan 2023 – Jun 2023

Tech– SQL, Alteryx, Machine Learning, Power BI, DAX

Pune, India

- Implemented **XGBoost** churn model using session data and support trends, reaching **85%** accuracy and reduced churn by **18%**
- Used **SQL** and **Alteryx** to analyze **5K+** subscriber records, uncover churn patterns, drive retention, and cut defections by **15%**
- Leveraged **DAX functions** in Power BI to track engagement and campaign metrics, saving **8 hours** and guiding decisions

SKILLS

Programming Languages and Frameworks: Python, C++, R, Java, AngularJS, Node.js

Cloud and Infrastructure: Amazon Web Services, Azure, Azure Synapse, RESTful APIs

Data and Analytics Tools: MySQL, ETL, Power BI, Tableau, Alteryx, Qlik Sense, Databricks, Airtable, Microsoft Excel

Web & Product Analytics Tools: Google Analytics, Google Tag Manager, Google Search Console

Collaboration and Project Management: Agile Methodology, Draw.io, Git, GitLab, GitHub, Jira, Gantt Charts, Documentation

ACADEMIC PROJECTS

Retail Analytics & Forecasting Dashboard | Tech–AWS Redshift, Tableau

- Explored and cleaned **20GB** retail sales data in Python using **one-hot encoding** and lag features, built an **AWS Redshift** data warehouse integrated with Tableau for real-time KPI visualization, improving decision-making and resource allocation

Sales Data Analysis and Visualization | Tech–Databricks, Azure Synapse, Power BI

- Refined sales data in Databricks and **Azure Synapse** using Python and Excel (**Trim**, **PivotTables**, **VBA Macros**), improving accuracy by **25%**, applied **RFM analysis**, and integrated insights into Power BI dashboards, boosting sales productivity

Analysis of ~5 million Electric Vehicles (EV) in US Northeast (2003–2023) | Tech–Tableau

- Built Tableau dashboards to analyze **~5M** registered EV, including evaluations on battery-operated vs hybrid types, annual state-wise breakdown, a 15-month EV forecast for New York, top EV companies and models, distribution of Tesla
