Summary

- Results driven Data Analyst with a Master's degree in Applied Data Analytics from Boston University, experienced in analyzing large datasets, developing dashboards, and delivering actionable insights. Strong expertise in SQL, Python, Excel, and Power BI, with hands on experience in data cleaning, exploratory analysis, ETL pipelines, and performance optimization. Actively seeking a Data Analyst role to support data driven decision making.

Education

- Boston University**, Master of Science in Applied Data Analytics Sept 2024 – Jan 2026
- GPA: 3.56/4.0
 - Coursework: Machine Learning, Data Mining, Data Science with Python, Web Mining & Graph Analytics, Design of Data Warehouses, Advanced Database Management, Data Analytics
- VIT AP University**, B.Tech in Computer Science (Data Analytics) Aug 2020 – May 2024
- GPA: 3.37/4.0

Skills

- Programming & Querying:** SQL, Python, R
- Data Analysis & Statistics:** Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Hypothesis Testing, Regression, Trend Analysis
- BI & Visualization Tools:** Power BI, Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query), Tableau
- Databases & Data Engineering:** ETL/ELT Pipelines, Data Warehousing, Star Schema, SCD (Type 1/2/3), Relational Databases
- Analytics & Tools:** Jupyter Notebook, Git, GitHub, PostgreSQL, CSV/JSON datasets
- Soft Skills:** Data Storytelling, Stakeholder Communication, Business Problem Solving, Attention to Detail

Projects

AI-Powered SQL Query Performance Analyzer

- Developed a SQL performance analysis tool using PostgreSQL EXPLAIN plans.
- Analyzed query execution times and recommended indexing strategies to reduce runtime by up to 50%.
- Compared SQL vs Python based execution to evaluate performance tradeoffs.
- Delivered findings through structured reports and visual summaries.

Customer & Business Analytics Dashboards

- Analyzed datasets with 100K+ records to identify trends, anomalies, and business insights.
- Built Power BI dashboard to track KPIs, trends, and operational metrics.
- Presented insights in a non technical format for business and academic stakeholders.

Healthcare Data Warehouse & Analytics Project

- Designed a healthcare data warehouse using star schema with SCD Type 1, 2, and 3 dimensions.
- Built ETL pipelines using SQL and Python to ingest, clean, and transform healthcare datasets.
- Improved query performance by 30% through indexing and optimized SQL queries.
- Created analytical views to support reporting on patient trends, provider performance, and operational KPIs.

Experience

- Software Engineer Intern, Emagia - Lewisville, TX** June 2025
- Built Python data pipelines to extract and structure financial document data using LLMs.
 - Automated analytics workflows and integrated processed data into reporting systems.
 - Conducted throughput and performance analysis, improving processing efficiency by 25%.
 - Supported analytics teams by ensuring data accuracy and consistency.

- Graduate Assistant, Boston University - Boston, MA** Feb 2025 - May 2025
- Supported faculty with data analysis, reporting, and research datasets.
 - Cleaned and validated structured datasets using Python and Excel.
 - Assisted in preparing analytical reports and visualizations for academic decision making.
 - Collaborated with cross functional teams, strengthening communication and teamwork skills.
