SUMMARY

Junior Data Analyst with hands-on experience in SQL, Python, Excel, and BI tools supporting business intelligence and data-driven decision-making. Skilled in cleaning and validating datasets, performing exploratory data analysis, and developing dashboards using Tableau and Power BI. Proven ability to identify trends, build performance metrics, and deliver insights to stakeholders through data visualization and statistical analysis.

TECHNICAL SKILLS

Programming & Query Languages: Python (Pandas, NumPy), SQL (MySQL, PostgreSQL, SQL Server), R
Data Analysis & BI Tools: Tableau, Power BI, Excel (Pivot Tables, Advanced Formulas, Data Analysis Tools)
Data Skills: Data Cleaning, Data Validation, Exploratory Data Analysis, Data Visualization, Statistical Analysis
Databases: MySQL, PostgreSQL, SQL Server, AWS RDS
Cloud & Platforms: AWS (S3, RDS), ChatGPT, Claude AI
Collaboration Tools: Git, GitHub, Jira, Confluence

EXPERIENCE

Cognizant Jan 2025 - Present
Data Analyst

- Cleaned and validated structured datasets using SQL and Python (Pandas, NumPy) ensuring data integrity and accuracy.
- Developed dashboards and reports in Tableau and Power BI tracking KPIs and performance metrics for stakeholders.
- Performed exploratory data analysis identifying trends and patterns reducing manual analysis time by 50 %.
- Wrote SQL queries to extract and manipulate data from MySQL and PostgreSQL databases supporting business intelligence.

Tata Consultancy Services (TCS) Jan 2022 – Jul 2023
Junior Data Analyst

- Collected and validated unstructured and structured datasets from multiple sources using SQL and Excel.
- Built data models and performance metrics in Excel and Power BI supporting operational reporting and analytics.
- Automated data validation processes using Python scripts reducing manual validation time by 40 %.
- Assisted senior analysts in delivering insights to business teams through data visualization and trend analysis.

EDUCATION

University of Dayton, Dayton, Ohio May 2025
M.S. in Computer Science GPA: 3.8

PROJECTS

Customer Analytics Dashboard – Tableau & SQL

- Developed interactive dashboards in Tableau visualizing customer trends and engagement metrics from SQL queries.
- Performed exploratory data analysis using Python (Pandas, NumPy) and ChatGPT to identify patterns and correlations.

Sales Performance Reporting – Power BI & Excel

- Built automated reports in Power BI and Excel tracking sales KPIs and performance metrics for business stakeholders.
- Cleaned and validated multi-year sales datasets using SQL and Python ensuring data integrity and accuracy.

Data Quality Framework – Python & SQL

- Designed data validation framework using Python and SQL to ensure data integrity across reporting systems.
- Documented processes and maintained data quality standards leveraging Claude AI for process optimization.
