

DHANUSH KORTIKERE JAGADISH

Texas, USA (Open to Relocation) | +1 (657)-631-8384 | dhanushsubbaiah59@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL EXPERIENCE

ReplyQuick.AI | *Software Engineer*

Aug 2025 - Present

- Implemented backend workflows for DentalScan V1 supporting enrollment, consent validation, and scan access across 1,000+ student records used in live school deployments.
- Architected and optimized REST APIs in a microservices architecture, reducing backend load by ~15% and improving request routing reliability under production traffic.
- Integrated Twilio, Telnyx, and RetellAI to automate high-volume messaging workflows, reducing manual outreach by ~30% across communication flows.
- Engineered Dockerized telecom automation for number provisioning, failover routing, and metadata tracking, increasing provisioning throughput by ~40% and reducing ops overhead by ~20%.
- Delivered React and Next.js dashboards with authenticated workflows and real-time operational visibility, used daily by 15+ internal users to manage live processes and teams.

Microsoft | *Microsoft Azure Intern*

Oct 2021 - Mar 2022

- Deployed a healthcare web application on Microsoft Azure with secure real-time communication, supporting multi-user pilot testing under production-like conditions.
- Modeled Cosmos DB schemas to support 1,000+ records with low-latency reads and high availability, aligning data design with healthcare reliability requirements.
- Integrated Azure Communication Services to stabilize real-time messaging, improving delivery reliability and increasing pilot user engagement by ~60%.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C++

Backend & APIs: Node.js, Express, REST APIs, JWT authentication, Prisma ORM

Cloud & DevOps: Microsoft Azure, AWS, GCP, Docker, Git, CI/CD fundamentals, Postman

Databases: PostgreSQL, MySQL, MongoDB, Azure Cosmos DB

Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS

Systems & AI/ML: Linux/Unix, TCP/IP, PyTorch, TensorFlow, Scikit-learn

PROJECTS

MapVia – Map-based job search

Oct 2025 - Dec 2025

- Developed a map-centric discovery platform with clustered rendering and sub-second interactions across 1,000+ company locations.
- Implemented a data ingestion and enrichment pipeline processing 1,200+ records, normalizing location data, and deduplicating sources.
- Exposed backend APIs for bounding-box and keyword queries to support high-frequency map interactions with predictable response times.

Image Generation using GANs (DCGAN & StyleGAN)

Feb 2024 - May 2024

- Trained DCGAN and StyleGAN on ~1,000 image samples to explore AI-based image generation and evaluation techniques.
- Analyzed model output using similarity scores, clarity metrics, and performance trends across 50+ generated images.
- Optimized key hyperparameters using PyTorch and visualized training outputs across 100+ epochs for performance evaluation.

Cloud Service Access Management System

Oct 2023 - Dec 2023

- Built a backend system in Node.js simulating access control for cloud APIs with 3 distinct role-based subscription tiers.
- Verified authentication flow via JWT and MongoDB, achieving 100% success rate on 30+ Postman-based integration tests.
- Designed middleware-based request validation and usage checks to prevent unauthorized access and ensure consistent enforcement across API endpoints.

EDUCATION

California State University, Fullerton | *Master of Science, Computer Science (GPA: 3.74)*

May 2025

Dr Ambedkar Institute of Technology | *B.E., Computer Science and Engineering (GPA: 3.48)*

Aug 2022

CERTIFICATIONS

- Completed Smart Contracts course related to Blockchain offered by the University at Buffalo from Coursera.
- Completed AWS Services for Solutions Architect Associate from Udemy.
