

Dushyanth Srinilay Jalaparthi

857-381-7802 | jdsrinilay@gmail.com

<https://www.linkedin.com/in/jdsrinilay/>

Dynamic software engineer with expertise in full-stack web development, cloud deployment, and CI/CD implementation. Demonstrates consistent success in delivering high-performance, user-centric applications and optimizing system processes to enhance efficiency. Proficient in modern frameworks and cloud technologies, driving impactful contributions to engineering teams and aligning with organizational goals. Recognized for bridging technical knowledge with business needs to deliver measurable outcomes.

PROFESSIONAL EXPERIENCE

Oros Tech LLC, Florida | Software Engineer | Apr 2023 – Nov 2023

Hired to spearhead the development of scalable web applications tailored to meet business demands for robust, user-friendly platforms.

- Designed and developed high-performance web applications using technologies like HTML5, CSS3, React.js, JavaScript, and Tailwind, significantly enhancing the front-end user experience.
- Optimized system integration processes by improving API performance, collaborating with backend teams to achieve a 30% increase in efficiency.
- Streamlined the CI/CD pipeline implementation using Jenkins, reducing deployment errors by 15% and accelerating delivery timelines by 20%.

Microbase Computers, Hyderabad (Full-Time) | Software Developer | Jan 2021 – Dec 2021

Hired to support and enhance internal business applications while gaining hands-on experience in .NET development.

- Assisted in maintaining and enhancing legacy .NET Windows Applications (WinForms) for internal business processes.
- Supported software development teams in troubleshooting application issues, ensuring smooth operation.
- Gained experience with SQL Server, performing database queries and basic performance tuning.
- Developed and optimized Windows applications using C#, .NET Framework, SQL Server, and Entity Framework, improving user experience.

Orostech LLC | Software Engineer | Apr 2024 - Mar 2025

Worked on cloud-based solutions and enterprise-level application development, focusing on scalability and performance.

- Developed and deployed scalable web applications using ASP.NET Core, Angular, and Azure services, ensuring high availability.
- Led the migration of legacy business applications to cloud-native architectures, reducing infrastructure costs and enhancing reliability.
- Designed and implemented automated deployment pipelines using Azure DevOps and Terraform, improving deployment efficiency.
- Built and maintained microservices-based solutions using .NET Core and Docker, improving modularity and scalability.
- Worked with SQL Server and Cosmos DB, optimizing database performance and implementing efficient data retrieval techniques.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript, SQL
- Web Technologies:** HTML, CSS, React.js, Node.js, Angular, Bootstrap
- Backend Technologies:** Spring Boot, Hibernate, GraphQL, Express.js, Vue.js
- Tools & Frameworks:** Jenkins (CI/CD), Docker, Git, IntelliJ, Eclipse, VS Code, ASP.NET
- Cloud & APIs:** AWS, REST APIs, SOAP APIs, GraphQL

ACADEMIC PROJECTS

Wirefly

Technologies: Spring Boot, Hibernate, SQL, Thymeleaf

- Developed an online marketplace enabling seamless item sales and purchases with robust admin controls for user and product insights.
- Enhanced system functionality through Spring Boot and Hibernate, providing a reliable platform for sellers and buyers.

Mobile Plan Finder

Technologies: Lottie Files, React Router, Socket.io, JWT, Stripe API, MongoDB

- Engineered an application to identify optimal family cellular plans, integrating secure payment systems and real-time chat features.
- Facilitated efficient connections between users and family plan owners, driving a practical solution for cost-conscious consumers.
