BACKEND JAVA DEVELOPER

Skilled software development professional with more than five years of hands-on experience supporting enhancements in systems and processes with the application of advanced technical and analytical acumen. Practiced mentor and contributor to IT projects ranging in value and complexity, working closely with users to identify and address requirements. Experienced in implementing several application projects through complete SDLC using the latest technologies such as Java, Spring, Hibernate, Restful, React, and design patterns for both frontend and backend modules.

Java Programming • Web Application Development • Software Development Lifecycle (SDLC)
Front-End Development • Testing • Server-Side Development • Technical Documentation
Requirements Management • Object-Oriented Programming • Web Services • Microservices • Amazon Web Services

Languages: Java

Web: JSP, JPA, JMS (Java Message Service), JavaScript, React, HTML5, XML, CSS3

Web Services: Restful, SOAP (Simple Object Access Protocol), Microservices

Web & Application Servers: Apache, Tomcat, NGINX, Glassfish

Frameworks: Twitter Bootstrap, Java Server Faces (JSF), Spring Core, Spring Boot, Spring Cloud, Hibernate, Mockito

Databases: Oracle DB, Microsoft SQL, MySQL, NoSQL (MongoDB), HBase, Phoenix

Design Patterns: Singleton, Prototype, Factory, Facade, Proxy, Front Controller, Inversion of Control, Dependency Injection, Session, Session Factory, Abstract Factory

SDLC: Agile

Tools: Eclipse, IntelliJ, GitHub, Star UML, Slack, Maven, Postman, Bitbucket, RabbitMQ, Jira, Confluence

DevOps: Jenkins, Docker, Kubernetes, Git, New Relic, Splunk

Platforms: Mac OS, Windows, Linux, AZURE, PCF

PROFESSIONAL EXPERIENCE

Drishticon Inc, California, USA • 02.2021- Present

Staffing firm that provides technology consulting & implementation services.

Software Engineer – Gap Inc

Requirements gathering, design, development, deployment, and support phases of a product.

Tasks Performed:

- Define technical solutions for microservices and web applications. Communicate these technical designs to multiple teams inside the organization.
- Development and delivery of back-end based software solutions including testing strategies.
- Maintain DevOps team to support owned products from design and into production.

JULES UWINEZA

Page Two • +1 727 432 5461 • julesuwineza@gmail.com • www.linkedin.com/in/JUwineza

Achievements:

- Developed high-quality code using standards-based solutions, drove adoption through guiding other engineers
- Implement CI/CD pipelines in Jenkins.
- Create unit tests using JUnit and Mockito for Java.
- End to End testing with Cucumber.
- Application deployment to PCF
- Maximized system availability and ensuring functional and performance SLAs are met.
- Improved search and refresh performance of the application by reducing the user waiting time by half.

Technologies Used: Java, Spring boot, Gladle, React, Pivotal Cloud Foundry (PCF), Git, Jenkins, JIRA, PagerDuty, New Relic and Splunk, MongoDB, CAWA, Citrix, Jest, Cypress, Mockito, Junit.

JEMBI HEALTH SYSTEMS, Kigali, Rwanda • 07.2018-10.2019

Non-profit driving advancement of eHealth and health information systems in developing countries.

Software Developer

Designed to upgrade and improve the open-source OpenMrs enterprise electronic medical record system.

Tasks Performed:

- Liaised with the Ministry of Health to identify new requirements, deploy new features, and deliver support.
- Used AWS (Amazon Web Services) Beanstalk for deploying and scaling web applications and services.
- Coded to medical domain industry standards and implemented applications in a secured environment using Spring, Hibernate, Rest API and Microservices.

Achievements:

- Developed new features to retrieve patient statistics and log message analytics from main servers through custom SQL query scripts.
- Developed the applications using Java, JDBC, Webservices, JavaScript

Technologies Used: Java/JEE, JavaScript, SQL, JSP, Spring, Hibernate, JMS, REST API, HTML 5, jQuery, Eclipse, Jenkins, SonarQube, Junit, Mockito, Maven, Tomcat, Git, Jira, SQL Pro, Linux, Windows

AIRTEL, Kigali, Rwanda • 02.2017-07.2018

A leading global telecommunications company.

System Analyst

Drove development, support, and system administration for software and servers.

Tasks Performed:

- Trained the systems' end users and wrote instructional manuals.
- Oversaw the installation and configuration of new systems, customizing them for the company.
- Supported IT Manager with the research and development of emerging technologies

Achievements:

- Involved in the Development, Integration, and Testing of Enterprise application modules.
- Delivered a prominent level of customer service and satisfaction.
- Created deployment automation using tools such as Jenkins.
- Used Jira for bug tracking and project management.

Technologies Used: Java, JSP, Spring MVC, Spring Boot, Hibernate, Jenkins, Maven, JDBC, REST API, PL/SQL, WebSphere, JUnit, JAXB, Jira.

EDUCATION

Master of Science in Computer Science

(December 2022)

Maharishi International University – Fairfield, Iowa

Key Courses: Core Java, Algorithm, Web Application Architecture, Enterprise Architecture, Software Architecture, Big Data, Machine Learning.

Bachelor of Science in Computer Science

National University of Rwanda, Huye, Rwanda (July 2016)
