EDUCATION

North Carolina Central University – Durham, NC

Graduation Date: December 2024 *Bachelor of Science in Information Technology & Business*

Relevant Courses: Machine Learning, Data Structures, Algorithms, Files & Databases, Business Programming

TECHNICAL SKILLS

Languages: C++, **Java**, JavaScript, **Python**, **R**, **Scala**, **SQL**

Technologies: Docker, Flask, Git, Node.js, **PyTorch**, React.js, REST APIs

Tools: Apache Beam/Hadoop/Spark, **BigQuery**, **GCP**, Jira, Jenkins, **Jupyter**, Snowflake, **Tableau**

EXPERIENCE

Sennos | Durham, Nc Nov. 2025 - Current *IT Service Technician*

- Install, configure, and commission Sennos **sensor systems** in both lab and field environments, ensuring proper hardware setup, network connectivity, and system functionality prior to deployment.
- Perform routine maintenance, **calibration**, and functional testing of environmental and industrial sensors to ensure accurate, reliable, and **consistent data collection** over time.
- Utilize **MRP Easy** to track inventory, manage parts usage, **monitor work orders**, and support production and service workflows, ensuring accurate material planning and documentation.
- Use **Jira** to document service tickets, log defects, track troubleshooting progress, and collaborate with engineering and operations teams to resolve technical issues.
- Diagnose and troubleshoot **hardware**, **firmware**, and connectivity issues across sensor units, gateways, and supporting infrastructure, identifying root causes and implementing corrective actions efficiently.

Technology Integration & Classroom Management | Fayetteville, Nc Jan. 2025 -Aug. 2025 *Substitute Teacher*

- Implemented digital learning tools such as **Google Classroom** and **Microsoft Teams** to facilitate virtual instruction and maintain academic continuity.
- Troubleshoot classroom technology, including **smartboards**, **Chromebooks**, and **wireless connectivity**, *ensuring minimal downtime* during lessons.
- Streamlined attendance tracking and lesson documentation by digitizing paper processes, improving efficiency and accuracy.
- Collaborated with educators to adapt digital resources for diverse learning needs, reinforcing digital literacy across multiple grade levels.
 - Enhanced classroom management systems by leveraging school-based software to monitor student engagement and progress.

North Carolina Central University Library | Durham, NC Feb. 2024 - Dec. 2024 *Lab Technician/ IT Eagles*

- Delivered first-line **IT support to 200+** students and faculty, resolving technical issues related to printers, networks, and user logins.
- Diagnosed and resolved **hardware/software malfunctions**, improving average system uptime by 15%.
- Maintained lab infrastructure by conducting regular audits of 50+ devices and ensuring full operational readiness.
 - Optimized resource management by tracking supply usage and implementing a **digital inventory system**, **reducing material shortages by 25%**.
- Supported the ITS team by attending mandatory training and staying updated on maintenance schedules and system changes.

The Hunt Institute | Cary, Nc Jun. 2023 - Jan. 2024 *Data Analyst*

- Analyzed DEI data trends using **SQL** and **Excel** to identify disparities across educational initiatives, guiding leadership toward equitable and data-driven policy recommendations.
- Developed a comprehensive DEI strategy by compiling and cleaning internal datasets with SQL and Excel, resulting in a measurable increase in inclusion initiatives across departments.
- Collaborated with senior leaders to design interactive dashboards in **Excel** and other analytics tools that visualized performance metrics and DEI progress over time.
- Presented actionable insights and recommendations to cross-functional teams, leveraging **SQL-based reporting** to influence strategic direction and operational decisions.

State Employees Credit Union | Durham, Nc Jun. 2022 - Aug. 2022 *Data Analytics Intern*

- Consolidated insurance databases across multiple systems, improving data retrieval speed by 30%. Automated repetitive **SQL queries** to reduce manual workload and enhance reporting accuracy.
- Generated interactive dashboards for Member Insurance Services, increasing visibility into client data and performance metrics.
- Ensured **data integrity** by auditing inconsistencies and coordinating corrections with IT and business teams.

North Carolina Central University Sheppard Library | Durham, Nc Mar. 2021 – May. 2021 *Lab Technician*

- Provided **IT support** to over 300 students and faculty, **resolving hardware, software, and network connectivity issues**.
- Administered and maintained 60+ lab computers, reporting and documenting equipment failures for timely resolution.
- Trained students and staff on core university systems (Banner, MyEOL, and print management tools), improving user efficiency and satisfaction.
- Collaborated with the support team to develop user-facing guides, reducing recurring service requests by 20%.

PROJECTS

Sensor Troubleshooting & Repair Project

- Diagnosed and resolved hardware, firmware, and connectivity issues affecting sensor performance, including power failures, signal loss, and data inconsistencies.
- Logged issues and corrective actions in Jira, collaborating with engineering teams to identify root causes and prevent recurring failures.
- Repaired and replaced faulty electronic and mechanical components using standard tools and testing equipment.

Technical Documentation & Knowledge Base Development

- Created and maintained technical documentation, including service procedures, troubleshooting guides, and installation checklists in Confluence.
- Improved knowledge-sharing across teams by standardizing documentation and ensuring clarity for technicians and engineers.
- Updated documentation based on field findings and system updates to reflect real-world conditions.

Database Management System (SQL)

- Situation: Inefficient student data tracking hindered reporting accuracy.
- Action: Designed and implemented a normalized relational database using SQL to organize and manage student

records.

- Result: Reduced redundancy by 40% and improved query performance for reporting and analytics.

Python Automation Script

- Situation: Manual data entry consumed excessive administrative hours.
- Action: Developed a Python script to automate data import/export processes with error logging and validation.
- Result: Saved approximately five hours weekly and improved data accuracy by 98%.
- Skills Used: Python, CSV/Excel handling, scripting logic.

Cybersecurity Risk Assessment Case Study

- Situation: Organization faced potential vulnerabilities in network infrastructure.
- Action: Conducted a comprehensive risk assessment, identified weak points, and proposed security enhancements.
- Result: Improved simulated network resilience and informed best practices for access control and data protection.
- Skills Used: Cybersecurity fundamentals, risk analysis, technical documentation.

KEY SKILLS

- **Technical Skills:** Python, SQL, Microsoft Excel, Tableau, Power BI, HTML/CSS, Hardware & Software Troubleshooting
- **IT Support:** Network Configuration, System Maintenance, User Account Management ●
- **Data Analytics:** Data Cleaning, Dashboard Creation, Data Visualization, Trend Analysis ●
- **Soft Skills:** Communication, Adaptability, Problem-Solving, Cross-Team Collaboration

SKILLS

- Deep knowledge of python
- Practice in Analytics
- Computer troubleshooting (Windows & Mac)
- Software installation & configuration
- Hardware repair (printers, laptops, desktops)
- Network & Wi-Fi connectivity support
- Microsoft Office Suite (Word, Excel, PowerPoint, Outlook)
- Google Workspace (Docs, Sheets, Drive, Gmail)
- Customer service & communication
- Problem-solving under pressure
- Time management & reliability
- Team collaboration
- Attention to detail
- Adaptability & quick learner
- Training/mentoring peers (if you've helped others learn tech)

ORGANIZATIONS

Alpha Phi Alpha Fraternity Inc.

March 2022 - Present

Durham,NC

Kappa Kappa Psi National Honorary Band Fraternity Inc.

October 2022 - Present

Durham,NC

IT Eagles

August 2020 - December 2024

Durham, Nc
