

JAVA DEVELOPER

SUMMARY:

Experienced Java Full Stack Developer with over 5 years of experience leading projects through the software development life cycle. Skilled in developing scalable modules for both backend and frontend applications. Proficient in Java, Spring Framework, Spring Boot, Spring Cloud, Microservices, Design Patterns, Git, SQL, NoSQL, JavaScript, and more. In my Java coding experience, I have worked extensively with various aspects of the language, including Interfaces, Lambda functions, Inheritance, Threads, and Synchronization. Strong experience in developing and testing software, identifying, and resolving technical issues, and creating detailed design documentation. Excel in creating functional user interfaces and integrating features seamlessly. Ambitious and knowledgeable, seeking a challenging role to contribute to innovative projects.

TECHNICAL SKILLS:

- Java
- SQL
- Kotlin
- JavaScript
- Spring Framework
- Spring Boot
- SOAP and RESTful Web Services
- Spring MVC
- Spring JPA
- Spring Security
- Spring Data integration.
- AOP
- Dependency Injection (IoC)
- Spring Cloud
- SOA
- Microservices Architecture
- Eureka
- Circuit Breaker
- Java Message Service
- Kafka
- ActiveMQ,
- RabbitMQ
- JSON
- XML
- Maven
- Grable Build Tool
- Apache Tomcat
- Design patterns: Singleton, Prototype, Session, Session Factory, Abstract Factory
- Databases: MySQL, Oracle, MongoDB, PostgreSQL
- Open Repository Integration
- React
- HTML
- CSS
- Nodejs and Express
- Hibernate ORM
- Multithreading
- Functionality Implementation
- Testing and debugging
- Performance Improvements
- Java Modules
- Git Version Control
- Subversion (SVN)
- GitHub collaboration
- Usability understanding
- Usability principles
- Code debugging.
- SDLC compliance
- Object-Oriented Programming
- Java Persistence API
- Cross-Functional Teamwork
- Requirements Gathering and Analysis
- Amazon Web Services
- Software Testing and Validation
- Google Cloud Platform
- Project Documentation
- Lambdas and Streams
- Continuous Integration Systems
- Code validation.
- Java Database Connectivity
- Quality Assurance Testing
- API Design and Development
- Software Development Tools: JIRA, Confluence
- Agile development methodologies
- Docker Containers
- Jenkins
- JUnit Testing
- Mockito Testing
- Algorithm implementation
- Performance Evaluation and Optimization

- Protocols: TCP/IP, HTTP, HTTPS

EXPERIENCE:

Java developer | Freedom Mortgage | Remote | February 2023 - Present

- Demonstrated proficiency in creating functional user interfaces, optimizing code quality, and streamlining feature integration.
- Developed scalable server-side applications using Java, Spring Framework, Spring Boot, Spring Security, Spring Data, Spring Annotation, Spring Integration, and Spring Cloud.
- Collaborated in a team-based, Agile environment to accomplish objectives by deadlines.
- Corrected, modified, and upgraded software to improve performance.
- Reviewed code and debugged errors to improve performance.
- Reduced software bugs by conducting thorough unit testing and collaborating with QA teams.
- Create unit test cases and automated functional test cases using the Behavior Driven Development (BDD) technique following Test Driven Development (TDD) practices.
- Designed scalable architecture for web applications that supported significant growth in user traffic without compromising performance.

Career Break| Education Break | February 2022 - January 2023: I took time off to concentrate on earning a master's degree in computer science at Maharishi International University.

Java Software Developer | Bank of Abyssinia | Ethiopia | January 2018 - January 2022

- Developed and maintained Java-based applications for banking services, ensuring reliability, security, and compliance with industry standards.
- Designed and implemented a microservice' architecture for a complex inventory management system, leading to a 45% reduction in response time.
- Worked with business teams to understand needs and address production questions.
- Developed applications and software to increase department efficiency.
- Optimized database interactions by implementing efficient data access patterns within Java applications, improving overall system performance.
- Improved application security by incorporating robust authentication mechanisms and adhering to industry-standard best practices in secure coding techniques.

EDUCATION:

Master of Science in Computer Science -Maharishi International University

Fairfield, IA | Expected in December 2024.

Status: In progress

Bachelor's in Computer Science – Maharishi International University

Fairfield, IA | February 2023

Status: Completed

Bachelor's in Electrical and Computer Engineering – Haramaya University

Ethiopia | August 2015

Status: Completed
