EXPERIENCE SUMMARY:

Software Engineer with a Master's in Computer Science and around 3 years of experience in Software Development, Salesforce Development and Cloud technologies. Proficient in developing and optimizing Salesforce solutions, developed an experience cloud and deployed site with improved system availability by 35% leading to smooth and easy usability. Experienced in building front-end and back-end applications with lower latency. Certified in Salesforce Administration, with a strong background in Git, Docker, and CI/CD pipelines. Actively pursuing a career in Generative AI, supported by industry certifications, completed Oracle Professional Gen AI and GenAI Bootcamp by Akkodis. Engaged in hands-on projects during the Akkodis bootcamp, developing three scalable AI solutions that optimize data processing workflows for increased efficiency.

EXPERIENCE

Software Engineer Intern

Jersey STEM

Jun 2024 – Present

Florham Park, NJ, USA

- Developed a Python-based back-end web service to manage Volunteer Details with MySQL integration, improving HR talent acquisition by 60%, while also driving front-end enhancements using UI Bakery, JavaScript, and SQL for continuous application availability so there will be no miscommunication between teams.
- Implemented advanced coding techniques in JavaScript by reducing front-end codebase by 35%, while increasing product iteration speed.
- Designed an automatic email notification system for account changes, ensuring real-time alerts to account owners and decreasing response time by 40%, thus improving cross-team communication and accountability.
- Created “Jest tests” for JavaScript operations, for mocking functions and writing unit tests and achieving 99% code coverage across all tests. This helped my team with unit testing JavaScript.

Software Engineer

DXC Technology

Jun 2020 – Jul 2022

Bengaluru, KA, IN

- Evaluated client needs along with software requirements to develop intuitive applications and robust libraries ensured all enhancements were implemented within timeline while achieving a satisfaction rating above 90% from users.
- Contributed to the Field Service Application Designing and development team to maintain record of field service worker, technical staff, item dispatch time and location with time and availability by 90% accuracy, also part of deployment with 99.95% operated on production.
- Generated the automated Email trigger to primary and alternate contact based on updates on the order placed from the time order placed to maintenance staff as installed the system in client place. Designed it using Python for email templates and HTML, CSS, JavaScript for its appearance, improving load times by 30%.
- Effective communication with client's technical and non-technical team to clear all the doubts of the requirements and develop Track the location and status of your inventory, warehouses, service vehicles, and customer sites with Python Code, JS, AWS, and data structures, ensuring 75% test coverage and resolving technical design challenges.

SKILLS

Language: Python, C++, JavaScript (Certified), SQL, Visual Force, Apex, Spark.

Web Designing: HTML, Django, XML, REST, MySQL, Kafka, DynamoDB, SAAS, Salesforce.

Developer Tools: Git, GitHub, LINUX, Jira, Eclipse, Jupyter, Docker, Kubernetes, VS Code, Open LLM, AWS, Postman, Tableau

Certification: Akkodis Academy's GenAI Engineering Bootcamp 2024, Salesforce Certified Administrator (SCA), MTA: Introduction to JavaScript, Oracle Generative AI Certified Professional.

PROJECTS

GEN-AI RAG Application | *Python, Flask, Docker, Fly.io*

Successfully completed the GenAI Bootcamp by Akkodis, specializing in Large Language Models (LLMs), Artificial Intelligence (AI), Retrieval-Augmented Generation (RAG), and classification of imbalanced datasets. Developed a RAG web application from the ground up utilizing advanced prompting techniques, Fast API, and Flask for text classification with LLMs, integrating GPT-3.5 and a vector database. Deployed the application using Fly.io.

EDUCATION

New Jersey Institute of Technology, Newark (GPA :3.5/4) | Master of Science in Computer Science | Sep 2022 – May 2024

REVA University, Bengaluru (GPA: 3/4) | Bachelor of Technology in Computer Science and IT | Aug 2017- May 2020
