EXPERIENCE

Business Intelligence Developer 06/2023 - 10/2024
Publicplan GmbH

- Developed and automated Python applications to streamline data collection by eliminating repetitive manual tasks, which in turn enhanced team productivity by 20%.
- Enhanced data accuracy by 25% through comprehensive cleaning, structuring, and optimization for effective storage and analysis.
- Developed and delivered interactive dashboards and visualizations using Python and industry-standard tools to drive data-driven decision-making.
- Engineered and deployed an intelligent chatbot using machine learning, vector databases, and open-source frameworks to automate responses to website-related user queries, enhancing user experience and reducing support workload.
- Leveraged Python-based scraping tools to collect data from client websites and translate raw content into meaningful, actionable insights.

Network Specialist 06/2022 - 12/2022
Syrian Islamic Insurance Company

- Administered and maintained server infrastructure to ensure 24/7 availability, strictly enforcing data security protocols to protect system integrity and sensitive information.
- Enhanced network infrastructure by deploying static IP configurations, resulting in a 50% increase in server accessibility and connection stability.
- Identified and repaired hardware failures, maintaining optimal system stability and reliability.
- Implemented and configured critical hardware components to support seamless IT operations and infrastructure scalability.

System Analyst 03/2021 - 05/2021
Syriatel

- Collaborated with stakeholders to gather and document software requirements.
- Developed user stories, wireframes, and SRS documentation for system design.
- Conducted SWOT analysis to identify growth opportunities.
- Presented deliverables and system mockups to executive leadership.

EDUCATION

Management Information Systems - Business Administration 10/2017 - 03/2022
Arab International University - Bachelor's Degree

- Focused on database design, business analytics, and project management using SPSS and Microsoft Project.
