SUMMARY:

- Software Engineer with 2+ years of experience in Java development and SAP Data Services, specializing in designing and building high-performance, scalable data services and microservices using Spring Boot.
- Experienced in implementing reliable, availability-focused data stores and collaborating across cross-functional teams to deliver secure, enterprise-grade solutions.
- Skilled in object-oriented design, system designing, API development, and performance optimization.

EDUCATION:

- **Master's in Computer Science**
SUNY Binghamton University, New York, USA
Aug 2023 - Dec 2025
- **Bachelor of Technology in Information Technology**
Sri Sai Ram Engineering College, India
Aug 2017 – May 2021

SKILLS:

- **Programming:** Java, C, Python, JavaScript, SQL, HTML, CSS, React, Spring Boot, Data Structures & Algorithms
- **Data Services:** ETL, SAP DS, Microservices, CTRL-M, Git
- **Tools & Processes:** Jira, ServiceNow, Agile, SDLC, Testing, Debugging, Automation
- **Systems & Platforms :** Linux, OS Fundamentals, Networking Concepts, Embedded Development (exposure)
- **Web & Application Development :** MERN Stack (MongoDB, Express.js, React.js, Node.js), REST APIs, Frontend & Backend Integration
- **AI & Language Model Engineering :** Applied Generative AI, Large Language Model Integration (ChatGPT, Llama 3, Gemini), AI Workflow Design, Intelligent System Development, and Prompt Optimization Techniques

EXPERIENCE

- Accenture** - Software Engineer Jul 2021 – July 2023
- Developed **Java microservices** with **Spring Boot** to implement a low balance alert system for a banking service, improving notification responsiveness and system scalability.
 - Designed and automated daily **ETL** batch jobs using **SAP Data Services** and **SQL** to efficiently process large-scale datasets, ensuring reliable and timely availability of information.
 - Optimized 10+ ETL workflows by redesigning processing pipelines, achieving a 30% performance gain and meeting SLA requirements.
 - Built and tested integration services to migrate customer information from SAP ABAP systems to third-party applications, ensuring smooth and accurate transfers.
 - Collaborated with cross-functional teams to deliver scalable, secure, and efficient services, applying best practices in object-oriented design, API development, and performance tuning
 - Optimized SQL scripts to address high-priority production changes, maintaining seamless operations and earning client recognition for exceptional delivery.
 - Key Skills: SAP DS, Microservices, ETL, Spring Boot, Java, SQL, JIRA, Confluence, MS SQL server, Excel, Service now, Visual Studio.

PROJECTS

Mini In-Memory Key Value Store

- Designed and implemented a lightweight **in-memory data store** supporting efficient create, read, update, and delete operations.
- Integrated **key expiration (TTL)** and **smart cache eviction (LRU)** to manage memory efficiently and prevent stale data.
- Achieved **O(1) average time complexity** for lookups and insertions using optimized data structures and demonstrated **low-level system design** and data-management fundamentals similar to Redis internals.
- Key skills: **Data Structures**, HashMap, LRU cache, key expiration (TTL), efficient CRUD operations.

AlgoNizer — Interactive Algorithm Visualizer

- Built a web-based visualizer that animates different data structures and algorithms to demonstrate time-complexity **trade-offs**, utilizing React hooks and state management to handle animations, user controls, and algorithm selection dynamically.
- Enabled adjustable **visualization** speed and interactive **UI**, improving user engagement and understanding of algorithmic behavior and knowledge.
- Key skills: React.js, JavaScript, HTML, CSS, DSA, **problem solving**, visualization, **MERN** stack.

E-commerce Order & Inventory Management System

- Developed a backend system to manage Products, Orders, and Inventory with strong emphasis on **transactional integrity**. Implemented **concurrency handling** to manage simultaneous order placements without overselling.
- Added **asynchronous email service** for order confirmations using event-driven design and achieved scalable, data consistent and real-world design.
- Key skills: Java, Spring Boot, SQL, REST APIs, Concurrency, Async Services.

ACHIEVEMENTS:

- FY23 Individual Award Accenture
- Skill Star Award Category
- Accenture Celebrates Excellence Award
