

Keerthi Krishna Kalyanam

Business Analyst

Location: Nashville, USA || **Email:** keerthikrishna6235@gmail.com || **Contact No:** (551) 310-1474 ||

LinkedIn: [linkedin.com/in/keerthi-k-16451730a](https://www.linkedin.com/in/keerthi-k-16451730a)

Professional Summary:

- Business Analyst with over 3 years of experience in the healthcare, finance, and insurance sectors, skilled in program and project management across ERP and CRM systems, including SAP, MS Dynamics Nav, and Salesforce. Proven ability to collaborate on complex projects and drive strategic initiatives, with expertise in process improvement, stakeholder engagement, and metrics-driven decision-making.
- Spearheaded **data strategy** initiatives to enhance **operational improvements** in healthcare and finance, leveraging **big data** and **machine learning** to optimize business processes and improve decision-making accuracy.
- Conducted **data storytelling** to translate complex healthcare and financial data into actionable insights, helping executive teams make informed strategic decisions.
- Collaborated with cross-functional teams to integrate **AI** solutions and **ETL** pipelines, enabling seamless data flow across systems and improving data accessibility for key stakeholders.
- Developed dynamic dashboards and detailed reports by synthesizing data from disparate sources, aiding stakeholders in data-driven decision-making.
- Proficient in leveraging tools like **Pandas**, **Xarray**, and **Stata** to analyze and manipulate large datasets, delivering actionable insights in healthcare and finance.
- Led **data research** efforts to identify trends, risks, and growth opportunities in healthcare finance, utilizing **query** optimization techniques and advanced analytics to generate meaningful reports.
- Experience in healthcare and financial sectors, adept at bridging the gap between business needs and technology solutions and a strong background in **ERP** and **CRM systems**, including **SAP**, **MS Dynamics Nav** & **Salesforce**.
- Proven track record in requirements gathering, process improvement, and implementing data-driven strategies that enhance operational efficiency and decision-making.
- Proficient in **SQL** and **Python** for data analysis, with a strong background in **business intelligence** tools such as **Power BI** and **Tableau** and expertise in **Agile methodologies**, leading Scrum ceremonies and driving significant project efficiency improvements.
- Skilled in creating comprehensive documentation **including BRDs, FRDs and SRS**, ensuring clear communication of project requirements and objectives and expertise in **healthcare industry** standards and regulations, including **ICD**, **EDI** and **HL7**.
- Advanced knowledge of project management tools including **Jira**, **MS Project**, and **Trello**, facilitating seamless project execution and stakeholder collaboration.
- Analyzed conversion data to identify trends and improvement areas, collaborating with cross-functional teams to enhance digital touchpoints and streamline customer journeys.
- Conducted **interviews** with stakeholders to gather requirements, ensuring comprehensive understanding of business needs, which informed project scope and solution design.
- Leveraged **quantitative analysis** methodologies to assess performance metrics and drive continuous improvement initiatives within finance and healthcare operations.
- Leveraged **Oracle** systems for data analysis and reporting, delivering actionable insights to support critical financial processes and compliance within CVS Health and Bitinfocom.
- Demonstrated **teamwork** by working closely with IT, finance, and operations teams to refine project **scope** and ensure alignment with business objectives, reducing project timelines by 15%.
- Utilized strong **problem-solving** skills to identify and resolve issues in financial transactions, ensuring accuracy and compliance with regulatory standards.
- Conducted analysis of operational data and provided **recommendations** on process improvements that aligned with **industry trends**, positioning CVS Health and Bitinfocom as forward-thinking leaders in their respective fields.
- Analyzed **accounting** data to identify cost-saving opportunities, improving financial reporting accuracy and supporting strategic decision-making for both healthcare and finance sectors.

- Experienced in conducting various analytical techniques including cost/benefit analysis, impact analysis, **GAP** analysis, and **SWOT analysis** to drive strategic decision-making.
- Utilized **Anaplan** to support **financial planning** and forecasting processes, enabling more accurate budgeting and strategic decision-making across CVS Health and Finance operations.
- Leveraged Google Tag Manager to track and analyze user interactions across websites, enhancing website performance insights and informing data-driven decisions to improve user experience in healthcare and finance sectors.
- Proficient in data modeling, database management and cloud computing platforms such as **Snowflake** and **Google Cloud Platform**.
- Demonstrated ability to improve data accuracy and reduce report generation time through implementation of data quality processes and interactive dashboards.
- Excellent communication and leadership skills with a proven ability to conduct **JAD sessions**, facilitate cross-functional collaboration and enhance stakeholder satisfaction.

Technical Skills:

Languages:	SQL, R, Python, VBA.
Methodology:	Software Development Life Cycle, Agile, Waterfall, Kanban.
Documentations:	FRD, BRD, SRS, Test Plan, User Guide.
Project Management Tools:	MS Project, Microsoft Excel, MS SharePoint, Asana, Trello, Jira, Rally.
Visualization Tools:	Tableau, Power BI.
Tracking Tools:	HP Quality Center, Rational ClearQuest, RTM.
Cloud Computing Platforms:	Snowflake, Google Cloud Platform.
ERP Planning & CRM:	SAP, MS Dynamics Nav, Salesforce, HubSpot.
Technical Skills:	KPI, UAT, Alteryx, Business Analysis (Cost/Benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis), Requirement gathering, Google Analytics, Data Analysis, MS Visio, JAD, Microsoft Office, User Story creation, Software development & testing, Data Modelling, Database Knowledge, Business Intelligence (BI) Tools, Process Mapping, User Experience (UX) Understanding, Financial Analysis, Financial Planning, Google Analytics, Accounting, Quantitative Analysis, Business Case Development, Business Strategy, Data Reporting, Data Models, Requirement Analysis, Data Extraction, Ad-Hoc, Data Sets, Data Visualization, Root Cause Analysis, Business Strategies, Quality Assurance (QA) Knowledge, A/B Testing, Prototyping, Data Analytics, Data Mining.
Soft Skills:	Time management, Analytical Skills, Critical Thinking, Detail-Oriented, Leadership, Management, Problem-solving, Organizational Skills, Continuous Improvement, Decision Making, Continuous Learning, Attention to detail, Multi-tasking, Documentation, and Presentation, work collaboratively, Oral and Written Communication skills, Collaborative Analysis, Strategic Planning, Verbal communication Skills, Sprint Planning.

Education:

Masters in business Analytics- Lewis University, Chicago, IL

Bachelor of Science- Rai Technology University, Bangalore, India

Professional Experience:

CVS Health

Jan 2023 – Present

Business Analyst

- Ensured compliance with Medicare regulations and standards and used HP ALM for test management and

defect tracking.

- Developed and maintained detailed class diagrams, sequence diagrams, and collaboration diagrams using UML.
- Led Joint Application Development (JAD) sessions to gather stakeholder input and refine requirements and enhanced stakeholder satisfaction by 20% through effective communication and timely delivery of project milestones.
- Demonstrated expertise in TriZetto's Facets system, focusing on healthcare payer requirements, including claims processing, benefits administration, and care management.
- Analyzed and optimized claims workflows in FACETS, enhancing operational efficiency and ensuring alignment with industry best practices and payer guidelines
- Led initiatives to enhance FACETS system capabilities, leveraging technology to support product and pricing updates, claims processing efficiencies, and benefits configuration improvements.
- Utilized Microsoft applications, including Excel and PowerPoint, to create and present data-driven reports, enhancing transparency and communication with senior management.
- Applied innovative solutions and best practices to optimize business processes, leading to increased efficiency and a more streamlined customer experience.
- Engaged in collaborative projects with cross-functional teams to assess business requirements and align solutions, enhancing customer engagement and ensuring optimal service delivery.
- Provided strategic consulting to project stakeholders, utilizing insights on industry trends to recommend innovative solutions that drive efficiency and meet evolving business needs.
- Played a key role in implementing and managing Microsoft Project to track project milestones, streamline workflows, and enhance overall program management.
- Conducted gap analysis and impact analysis to identify areas of improvement in current processes and led SWOT analysis to evaluate strengths, weaknesses, opportunities and threats related to project initiatives.
- Gathered and documented business requirements (BRD) and functional requirements (FRD) for healthcare data management systems and improved data accuracy by 30% through the implementation of rigorous data quality checks and validation processes.
- Developed System Requirements Specifications (SRS) and created detailed user stories and use cases.
- Facilitated Agile Scrum ceremonies including sprint planning, daily stand-ups, and retrospectives and achieved a 25% increase in project efficiency by adopting Agile methodologies and conducting regular sprint reviews.
- Collaborated with cross-functional teams to ensure compliance with ICD, EDI and HL7 standards and implemented electronic medical records (EMR) and electronic health records (EHR) systems.
- Created and maintained project documentation including business process models using MS Visio.
- Designed and implemented data visualization dashboards in Power BI for real-time insights and reduced report generation time by 40% with the creation of interactive dashboards in Power BI.

Bitinfocom, India

May 2019 – Jun 2021

Business Analyst

- Gathered comprehensive business and functional requirements essential for a robust risk management system, ensuring alignment with organizational goals and regulatory requirements.
- Conducted detailed evaluations of project financial impacts, utilizing ClearCase and ClearQuest for meticulous version control and defect tracking. Identified critical improvement areas through rigorous impact and gap analysis.
- Spearheaded proactive risk management strategies, planning and mitigating potential project risks effectively. Implemented advanced risk management models, resulting in a significant 35% reduction in risk exposure.
- Optimized system performance by implementing enhanced SQL queries and streamlining data processing workflows, leading to a notable 25% improvement in efficiency.
- Utilized MS Visio to develop comprehensive business process models, enhancing clarity and precision in system workflows. Leveraged Rational Rose for advanced system modeling and design, ensuring robust architecture.
- Conducted advanced statistics analysis on financial data to uncover key insights and trends, improving reporting accuracy and supporting data-driven decisions for finance initiatives.

- Integrated MAXIMO data with PowerBI to create interactive dashboards, enabling real-time tracking of asset performance, maintenance costs, and operational efficiency improvements.
- Designed and developed dynamic, interactive Tableau dashboards for real-time monitoring of key performance indicators (KPIs), enhancing decision-making efficiency by 20%.
- Maintained a meticulous requirements traceability matrix (RTM) to ensure all project requirements were effectively captured, tracked, and validated throughout the project lifecycle.
- Validated system functionality and user requirements through rigorous user acceptance testing (UAT), ensuring seamless integration and alignment with stakeholder expectations.
- Created and maintained detailed class, sequence, and collaboration diagrams using UML, providing comprehensive visual representations of system architecture and interactions.
- Facilitated Joint Application Development (JAD) sessions to gather stakeholder input, refine requirements iteratively, and ensure continuous alignment with evolving business needs and objectives.
