SUMMARY

Detail-oriented and organized Software Engineer with a strong background in developing robust solutions to meet client requirements. Currently working at LVD Strippit, where I collaborate with software development and testing teams to design and implement back-end features using C++ and C#. My experience includes delivering unit-tested systems on time and enhancing user experiences through intuitive interface design and responsive web applications. I possess advanced skills in Microsoft ASP.NET, code development, testing and debugging, and database management. Passionate about software engineering, I am eager to contribute to innovative projects and improve application efficiency while ensuring long-term stability of the software.

EXPERIENCE

*LVD Strippit, **Software Engineer***

Oct 2023 - Present

Collaborated with the software development and testing teams to create effective solutions that addressed client needs for functionality and performance

Designed and implemented back-end features using C# and ASP.NET, delivering unit-tested systems on schedule
