Location: Dallas, Texas, USA

PROFESSIONAL SUMMARY

- **7 years of IT experience** in designing, developing, and deploying **enterprise Java/J2EE web applications** across **Financial and Healthcare** domains.
- Expert in **Java (8/11/17)**, **Spring Framework (Spring Boot, MVC, REST, Cloud, AOP, IoC)** for building scalable microservices and enterprise platforms.
- Hands-on experience in **RESTful API development** using **JPA/Hibernate**, with solid knowledge of **JSON, XML, and API security**.
- Proficient in **front-end technologies: HTML5, CSS3, JavaScript, jQuery**, and **modern frameworks** like **ReactJS** and **Angular 8–13**.
- Skilled in deploying and managing containerized applications using **Docker** and **Kubernetes**, especially on **AWS (EKS)**.
- Strong working knowledge of **AWS services: EC2, S3, Lambda, Elastic Beanstalk, CloudWatch**, and security configurations (IAM, Security Groups).
- Deployed containerized Spring Boot applications to **Microsoft Azure App Service** using Docker images.
- Configured **Azure Container Registry (ACR)** and integrated CI/CD pipelines for automated deployments.
- Monitored application health using **Azure Monitor and Application Insights**.
- Familiar with **CI/CD pipelines** using **Git, Jenkins, Maven**, with experience automating builds, deployments, and testing.
- Proficient in **Oracle, PL/SQL, SQL Server**, and integration of **JDBC/JPA** for transactional enterprise applications.
- Experience with **application servers** including **Tomcat** and **JBoss** in Linux/Unix and Windows environments.
- Agile team contributor with strong collaboration across **DevOps, QA, and Product** teams, committed to clean code, scalable architecture, and rapid delivery.

SKILL

- **Java/J2EE:** Spring Boot, Spring MVC, Hibernate, JDBC
- **Web Technologies:** HTML5, CSS3, JavaScript, Angular 12/13, ReactJS
- **Cloud:** AWS (EC2, S3, IAM, CloudWatch, Lambda), Azure
- **DevOps:** Jenkins, Git, Maven, Docker, Kubernetes, GitHub
- **Databases:** Oracle, MySQL, MongoDB, MS SQL Server, PostgreSQL
- **Tools:** Eclipse, IntelliJ, Postman, SOAP UI, Junit, Apache Kafka, VersionOne, ServiceNow, Mockito
- **App Servers:** Tomcat, WebSphere
- **Methodologies:** SDLC, Agile, Waterfall, Jira

PROFESSIONAL EXPERIENCE

Sr. Java Full-Stack Developer | Citi, Dallas, TX

Sep 2024 – Present

Project: Enterprise Case Management System

- Developed scalable microservices using **Java (11/17)**, **Spring Boot**, and **Spring Cloud** with RESTful API endpoints.
- Integrated the back end with **Oracle** using **JPA/Hibernate** for data persistence and transactional control.
- Designed and secured REST APIs for third-party and front-end integration using **JWT-based authentication**.
- Developed UI interfaces using **JSP, JavaScript, HTML5, and CSS3**, and templated responses for user modules.
- Developed responsive UI components using **React, TypeScript, and REST APIs** for enterprise users.

- Containerized services using **Docker** and orchestrated deployment with **Kubernetes** on **AWS EKS**.
- Deployed infrastructure using **AWS EC2, S3**, and set up **IAM roles** for granular access control.
- Configured **CloudWatch** and application-level logging for monitoring performance and errors.
- Automated deployment pipeline using **Git, Jenkins, and Maven**, implementing CI/CD best practices.
- Wrote unit and integration tests using **JUnit** and **Mockito**, maintaining over 85% test coverage.
- Tuned Oracle queries and stored procedures for performance improvement and lower response time.
- Integrated email and notification services via **AWS Lambda** for real-time event updates.
- Participated in Agile ceremonies, daily stand-ups, and biweekly sprint demos with stakeholders.

Associate Java Developer | Cognizant Technology Solutions, India

Sep 2021 – May 2024

Project : CIM – Trading Application Support

- Built real-time data ingestion and processing pipelines using **Kafka, Apache Spark**, and **Spring Boot**.
- Implemented backend modules in **Java (JEE)** for trade validations and rule-based alerting.
- Created REST APIs to expose trading metrics and market feeds to front-end dashboards.
- Developed client modules using **JSP, Servlets, and JavaScript**, integrating trading rules engine.
- Wrote and optimized **PL/SQL** stored procedures for financial transactions and reporting.
- Containerized microservices using **Docker** and integrated with **Kubernetes** for workload management.
- Deployed services on **AWS EC2**, leveraging **S3** buckets for data snapshots and configuration backup.
- Configured access policies using **IAM** and managed roles for sensitive financial data access.
- Used **Jenkins pipelines** for continuous integration and managed application builds via **Maven**.
- Developed monitoring scripts and alerts using **Python** for real-time system diagnostics.
- Reduced production incidents by 30% by automating health checks and self-healing routines.
- Collaborated with QA teams for system integration testing and release readiness in Agile environment.

Application Development Analyst | Accenture, India

Nov 2018 – Sep 2021

Project: Customer Insights Data Mart

- Developed backend microservices using **Java + Spring MVC**, integrating APIs for customer profile retrieval.
- Created dynamic dashboards using **Power BI**, surfacing KPIs and customer segmentation trends.
- Designed and implemented **RESTful APIs** for report delivery and visualization tools.
- Developed UI modules using **HTML/CSS, JavaScript**, and **JSP** for internal business users.
- Integrated data pipelines with **Oracle** using **JDBC** and batch jobs for daily loads.
- Automated quality checks and alerts using **Airflow DAGs**, reducing bad data propagation.
- Set up Docker-based dev environments to standardize local development across teams.
- Used **Git** and **Bitbucket** for source control and implemented branching strategy for releases.
- Managed deployments to **Tomcat** servers, supporting high-availability data access layers.
- Collaborated with cross-functional teams to translate analytics requirements into data models.
- Authored technical documentation and flow diagrams for onboarding and audit purposes.

EDUCATION:

Bachelor of Engineering in Computer science

2014 – 2018

G Narayanamma Institute of technology and science
