848-400-1162

Professional Summary

- Software Professional 3+years of experience in Object Oriented programming, design, developing and testing of Client/Server, Enterprise and Web Applications
- Strong Knowledge on Application Development using Software Development Life Cycle SDLC using various methodologies like Waterfall, Agile/Scrum.
- In depth knowledge of JavaScript frameworks like Java 8+JDK, JavaScript, jQuery, AJAX, Angular.js, react.js, express.js and Backbone.js.
- In depth knowledge of developing front-end using HTML 5, CSS 3, JavaScript, Type script and Angular JS 1.4, 1.5, 2/4.
- Proficiency in developing Web Services using - SOAP/RESTFUL WS and programming skills.
- Extensively experience in Angular.js components like Controllers, Directives, Factory, Service resources, Routing, Dependency injection, 2-way Data Binding, Filters and Events.
- Implemented web Methods Flow Service and java service including transaction management, error handling, HTTP and SMTP client.
- Expertise in CSS Background, CSS Positioning, CSS Text, CSS Border, CSS Margin, CSS Padding, CSS Table, Pseudo Classes, Pseudo Elements, CSS Preprocessors (SASS, LESS) and CSS Behaviors.
- Experience in working with third party web services APIs and Web Services using AJAX and JQUERY.
- Expertise in using all popular editors like Eclipse, Sublime Text, Notepad++ and Brackets.
- Responsible for administration, maintenance, Performance analysis, and Capacity planning for MongoDB clusters.
- Experience with Use-Case design, Class and Sequence diagrams using UML.
- Experience working with Amazon Web Services like EC2, S3 bucket, RDS, SQS, Elastic Load Balancer, Dynamo DB, through AWS Console and API Integration.
- Experience in building Microservice applications using Spring Boot for developing RESTful Web services.
- Expertise in using PL/SQL and SQL to write Stored Procedures, Functions, Packages and Triggers.
- Extensively worked with MVC Architecture using spring, hibernate, Apache Struts.
- Expertise in Micro services to build flexible and independently deployable software
- Experience on Java polymorphism, Multi-Threading, Collection Framework, Interfaces, Synchronization, and Exception Handling.
- Strong experience of data structures, algorithms and design patterns (GoF).
- Experience in building web applications using Spring 3.x Framework features like MVC (Model View Controller), AOP (Aspect Oriented Programming), IOC (Inversion of Control), DAO (Data Access Object) and template classes.
- Strong experience in JDBC and writing SQL Queries, PL/SQL Stored Procedures, Triggers, Views, Functions and SQL packages.
- Expertise in programming and debugging in Unix Shell Scripting.
- Extensively worked on Cloud-bees Jenkins for continuous integration (CI) and (CD) Continuous Deployment and for End-to-End automation for all build and deployments.
- Involved in writing the Maven and Gradle scripts for the configuration of J2EE applications.
- Managed all the bugs and changes into a production environment using the Jira tracking tool.
- Worked on many AWS Cloud resources which includes EC2, S3 VPC, Lambda, SNS, RDS, EBS, Cloud Watch, Cloud Trail, Cloud Formation AWS Config, Autos calling, Cloud Front, IAM, Route 53.
- Proficiency in Administration and Support upfront with Atlassian Suite viz. Confluence, Crowd Jira and Bit-Bucket.
- Experience in installing, configuring, tuning Web Logic Server, Apache Tomcat, JBOSS Fuse.
- Expertise in using ANT and Maven for build automation.
- Expertise in different test-driven development frameworks like TDD and BDD using cucumber, Selenium and protractor.
- Proficient in Web based testing viz. Integration Testing, System Testing, Performance Testing, Functional Testing and Unit Testing.
- Adaptable in quickly changing technical environments with very strong organizational and analytic skills.
- Excellent team player with good communication, people and leadership skills. Successfully delivered projects under strict schedules and following quality control.

TECHNICAL SKILLS:

Programming Languages	C, C++, Java, JavaScript
J2EE Technologies	Servlets, JSP, Java Beans, JDBC, JSF, JNDI, EJB3, JMS, JMX, JPA, JAXB, JAX-WS, JAX-RS, Console, Stack, VisualVM
Web Technologies	HTML, HTML5, XML, XHTML, CSS, JSON, AJAX, XSD, SOAP, WSDL, ExtJS, Node Js
Databases	Oracle, MySQL, Sql, Pl/Sql, PostgreSQL, SQLServer, MongoDB (NoSQL), AWS, Cassandra DB, Mongo DB, Couch DB, PCF
Frameworks and Libraries	Spring, Hibernate, MyBatis, Spring MVC, Spring web flow, Spring Batch, Spring Integration, Spring-WS, Struts, Apache Camel, Mule ESB, Kafka, Junit, Mockito,Slf4j, Log4j, Json, UML, Selenium
UI Frameworks and Libraries	JQuery, Angular JS, Node JS, React JS, Typescript, Bootstrap
Application Servers	IBM WebSphere, JBoss, Apache Tomcat
Build Tools and IDE's	Maven, IntelliJ, Eclipse, Spring Tool Suite, Jenkins
Operating Systems	Windows, UNIX, SUN Solaris, Linux, Mac OS X
Tools	SVN, JIRA, Toad, SQL Developer, Git, Clear Case, perforce

Professional Experience

Client: Omnicell, Fort Worth, TX, USA (Remote)

July 2022 - Till Now

Java Developer

Responsibilities: -

- Utilized microservices and decoupled architectures for building RESTful APIs.
- Experienced first-hand practices for integrating microservices into an existing system architecture.
- Setup the (CI) and (CD) process for the application using the Jenkins.
- Wrote SQL Queries, PL/SQL stored procedures, triggers and packages on Oracle database.
- Developed web pages by using Spring MVC and JSP pages.
- Developed Automation Framework for Acceptance Testing using Cucumber BDD and JUnit.
- Created Rich UI applications using Angular integrating with REST APIs built on Micro services.
- Developed class using design patterns like Factory and singleton. Writing logic for all the front-end in HTML with integration of AngularJS components, involving validation of Specific fields using Angular Plugins.
- Accessed few jQuery bootstrap with combination of Angular UI Bootstrap to get access to predefined templates.
- Knowledge of using flux architecture in ReactJS for building client-side web application.
- involved in creating the Hibernate POJO Objects and mapped using Hibernate Annotations.
- Used JPA to develop server-side logic by writing configurations.
- Using Struts in presentation tier and used Spring Core/IOC to wire/inject the object dependencies.
- Responsible for getting business approvals for testing deliverables.
- Developed Data access objects using DAO pattern, JDBC, Spring, Hibernate.
- Developed API to display currency checker on UI.
- Used Test Driven Development (TTD) tools like Selenium and Cucumber for Java Automation.
- Responsible for all code committed to sub version (SVN) and merging of changes to the latest code from the branch.
- Analyzed use cases, created interfaces and designed the core functionality from Presentation layer to business logic layer using UML and Rational Rose.
- Involved in Design, Development and Support phases of Software Development Life Cycle (SDLC).
- Used AGILE methodology and participated in SCRUM meetings.
- AWS EC2 instances were configured in developing and QA environments with NodeJS.
- Designed interactive web pages with front-end screens using HTML5 and CSS3.
- Designed and implemented the user interface using HTML5, CSS3, JavaScript and Angular JS.

Environment: Java, Springbot, AWS, JSP, Servlet, HTML, CSS, JavaScript, jQuery, AJAX, Angular JS, Struts, Spring, Hibernate, LDAP, JAXP, JAXB, JMS, SVN, WebLogic, RHEL, MYSQL, RESTful Web Services, ANT, AXIS.

Responsibilities: -

- Provided technical guidance to business analysts, gathered the requirements and converted them into technical specifications/artifacts.
- Configured spring to manage objects and set their dependencies in a spring context file and integrated middle tier with spring application framework.
- Implemented the business layer by using Hibernate with Spring DAO and also developed mapping files and POJO java classes using ORM tool Implemented caching techniques, wrote POJO classes for storing data and DAO'S database configurations using Hibernate to retrieve the data and did other O Developed ORM mappings using Hibernate annotations and also established data integrity among all tables sitting on Oracle Database
- Designed and developed Customer registration and login screens using JSP, HTML, CSS and JavaScript
- Developed web pages to display the account transactions and details pertaining to that account using JSP, HTML, Spring MVC, AJAX and CSS
- Designed and implemented DAO. Singleton. Factory and DTO Design Patterns.
- Responsible for the configuration of Spring Web Application Context in web layer and web.xml.
- Developed SOAP-Web services in a Service Oriented Architecture (SOA) consisting of the integration tier with Web services external to organization. Middle tier with Spring Application Framework
- Configured handler mappings and view resolvers in Spring MVC Web layer.
- Followed Agile Methodology (TDD SCRUM) to satisfy the customers and wrote JUnit test cases for unit testing the integration layer
- Developed various reusable Helper and Utility classes which are used across all the modules of the application Used log4j for tracking errors and debugging the code.
- Developed scripts using Maven, search products responsible for preparing test scripts for the system testing
- Used log4j for tracking errors and debugging the code various reusable Helper and shell scripts to build and Check-in/Check-out to understand the system efficiently
- Utility classes which are used across all the modules of the application deploy the application in JBoss Application Server in Subversion.
- Implementing Branching Methodology Plan and performed that enable users
- Involved in O Developed various O Involved in unit testing using JUnit MVC, Spring ORM
- Wrote activities like transaction and system testing and also, JSP, JDBC, JNDI, XML, HTML,
- Build & deployment history, Subversion, Eclipse, WSDL, JMS, AJAX, SOA,

Environment: Java, JEE, Servlets, Spring JBoss Application Server, JUnit, Sun Solaris and Oracle.

Education:

Bachelors completed in 2020 B. Tech in Computer Science From JNTUH

Masters Completed In 2022 M. Tech In Computer Science in From Concordia University, St. Paul
