

MICHAEL A. PALERMO

Westchester, IL | 7089402779 | michaelpalermooo@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Engineer with 4+ years of experience developing scalable web applications using Java, React, and AWS. Proven expertise in building robust UI and backend solutions, including RESTful APIs and cloud deployments. Adept at agile methodologies, optimizing CI/CD pipelines, and collaborating with cross-functional teams to deliver high-performance, production-ready solutions.

TECHNICAL SKILLS

- **Languages:** Java, TypeScript, JavaScript, Python, C#, Go, SQL, .NET
- **Cloud/DevOps:** AWS (Lambda, S3, API Gateway, CloudFront, Route53, CloudWatch, Kinesis), GitLab CI/CD, Docker, Terraform
- **Frameworks:** Spring Boot, React, Angular, NodeJS, GraphQL
- **Databases:** MySQL, SQL Server, PostgreSQL, DynamoDB
- **Tools:** Git, GitHub, GitLab, Jira, Confluence, Postman, Jest, SonarQube, Agile Methodology

PROFESSIONAL EXPERIENCE

Ellumen, Inc

Dec 2023 - Jun 2025

Full Stack Engineer

Remote

- Developed and maintained dynamic, full life-cycle web applications using React, HTML5, and CSS3, ensuring responsive UI and scalable component-based architecture.
- Built scalable back-end services with C#, .NET by designing and managing REST and GraphQL APIs integrated with AWS DynamoDB, aligning with modern web architecture and API design principles.
- Deployed and managed applications on the AWS Cloud using Lambda, API Gateway, and S3, and collaborated with cross-functional teams to troubleshoot and enhance performance, scalability, and reliability.

Ellumen, Inc

Mar 2023 - Dec 2023

AWS Cloud Engineer

Remote

- Engineered and deployed serverless AWS applications with Lambda, S3, and cloud monitoring tools; ensured the reliability and scalability of back-end services aligned with Agile methodologies.
- Created robust REST APIs with AWS API Gateway, integrating modern software architecture practices and facilitating seamless system integration using GitLab CI/CD.
- Implemented automated unit tests with Jest and maintained high code quality through SonarQube (85%+ coverage), effectively reducing release cycles from one week to one day.
- Authored custom Java backend solutions to optimize file export processes, adhering to modular design and data handling standards while actively collaborating with cross-functional teams.

LabCorp Drug Development

Sep 2021 - Dec 2022

Full Stack Software Developer

Remote

- Frontend: Built and tested mobile features using Android Studio (Java) and Xcode (Swift / Objective-C) for both Android and iOS platforms.
- Backend: Developed scalable microservices using Java with Spring Boot, contributing to core functionality including patient workflows and trial management.
- Database: Worked with PostgreSQL, performing schema updates and managing data through pgAdmin to support backend service needs.
- Infrastructure: Participated in DevOps tasks by testing and validating Jenkins CI/CD pipelines to ensure successful and reliable deployments across environments.

Thatcher Technology Group

Feb 2021 - Aug 2021

SQL Developer

Naperville, IL

- Optimized large-scale SQL Server queries, increasing performance by 30%
- Supported .NET development and Spring Boot microservice enhancements
- Handled deployments and live upgrades, maintaining near-perfect system uptime

ComEd

Jun 2019 - Aug 2019

Software Development Intern

Oakbrook Terrace, IL

- Created Alexa Smart Home Skills using AWS Lambda and Node.js
- Presented final results to 100+ executives

EDUCATION

Lewis University

2016 - 2020

Bachelor of Science, Computer Engineering

- **GPA:** 3.74
- **Achievements:** Dean's List All Semesters, Fitzpatrick Scholarship Recipient
