Education

M.S., Experimental & Clinical Pharmacology | University of Minnesota | 2023-2025

- Focus: Orphan Drug Development, Clinical Pharmacology, and Pharmacokinetics
- Relevant Coursework: Biostatistics, Regulatory Issues, Clinical Trial Simulation, Advanced PK

B.S., Health Sciences | University of Minnesota | 2019-2022

- Minor: Chemistry and Lab-Based Sciences Concentration
-

Relevant Experience

Graduate Researcher | University of Minnesota | Minneapolis, MN | 2024-Present

- Developed and managed clinical and laboratory study protocols for biomarker research in rare and neurodegenerative diseases, including Phase 1 clinical studies with 30-100 patient cohorts.
- Applied analytical, quality control, and regulatory-informed approaches to biomarker data collection, validation, and analysis across industry-sponsored trials and pharmacology projects.

Clinical Pharmacology Intern | Vertex Pharmaceuticals | Boston, MA | May-Aug 2025

- Integrated SAS programming with RStudio and Phoenix WinNonlin for pharmacokinetic and statistical analyses supporting Phase 2 clinical studies.
- Researched regulatory guidance (FDA, EMA, ICH) to inform clinical pharmacology strategies, contributing to study design, concomitant medication assessments, and commercial presentations.

Clinical Research Associate | MIVI Neuroscience Inc. | Eden Prairie, MN | 2023-2024

- Conducted site initiation, routine monitoring, and close-out visits for medical device clinical studies, overseeing multi-site compliance, data integrity, and adherence to study protocols.
- Developed and maintained medical device-specific regulatory documentation, study protocols, CRFs, and data collection tools in compliance with ISO 14155, ICH/GCP, and FDA regulations.

Clinical Research Coordinator | Nucleus Network | St. Paul, MN | 2022-2023

- Supported 30+ Phase 1 clinical trials, managing study participants, site activities, and day-to-day clinical operations while ensuring full regulatory compliance and accurate documentation.
- Applied expert knowledge of EDC systems (REDCap, MedNet, iMedNet) to manage regulatory compliant data capture, queries, and study monitoring, ensuring high-quality, audit-ready datasets.

Research Assistant | Mayo Clinic | Rochester, MN | 2019-2022

- Supported Critical Care Research Center staff and investigators in conducting multiple fast-paced, concurrent, 24-hour clinical studies within the Emergency Department.
 - Coordinated participant screening, enrollment, and informed consent, and performed accurate data collection, ensuring compliance with study protocols and regulatory requirements.
-

Technical Skills

- **Software:** EDC Databases (REDCap, MedNet, iMedNet), MS Office, SAS, Phoenix WinNonlin, R, NONMEM, STELLA
 - **Certifications:** Good Clinical Practice (ICH-GCP), NCA, Population Modeling (NLME)
 - **Expertise:** Clinical Trial Operations, QC Reviews, Regulatory Compliance, NCA PK Analysis
 - **Laboratory:** Sample Processing, Protein Isolation and Characterization, ELISA, Western Blot, Flow Cytometry, Molecular Profiling, Biomarker Validation Data Analysis
 - **Strengths:** Strong Communicator, Effective Collaborator, Detail-Oriented in Data Reporting
-

Awards & Publications

- **Phan N.,** Gates T., Subramanian S., Kartha R. Biomarker potential of allele-specific extracellular vesicles in Gaucher disease. *Molecular Genetics and Metabolism*, 2025; 144(2):108894.
- **A-PReP Fellowship**, Clinical and Translational Science Institute, University of Minnesota (2025)
- **Rare Disease Day Research Award**, Stem Cell Institute & Center for Orphan Drug Research, University of Minnesota (2025)
- **Wallin Foundation Scholar** (2019)
