☎ (510) 905-2112 | ✉ prudhvim.w2@gmail.com | [linkedin.com/in/prudhvimw2](https://www.linkedin.com/in/prudhvimw2)

Professional Summary

- Around 5 years of experience in analysis, development, testing, and implementing Web based, Client/Server Applications and Enterprise and Distributed applications across the entire Software Development Life Cycle using Java and J2EE Technologies.
- Knowledge in using spring modules like Spring Core, Spring DAO, Spring MVC, Spring AOP, Spring IOC, Spring JDBC, and Spring JPA.
- Expertise in Core Java concepts like OOPS, Data structures and algorithms, Collections, Swing, Event handling, Multithreading, Garbage Collector, Java Features, Exception Handling, and Dependency Injection.
- Experience in building Web User Interface (UI) using Angular, React JS, Node.js, HTML5, CSS3, XML, Tailwind CSS, Thymeleaf, JavaScript, Typescript, jQuery, and Bootstrap.
- Experience in integrating the internal security model into new projects with Spring Batch, Spring Microservices, and Spring Boot.
- Implemented AWS solutions using EC2, S3, Lambdas, RDS, EBS, Elastic Load Balancer, Step Functions, Cloud Formation, Dynamo DB, and Auto-scaling groups.
- Deployed AWS Lambda code using Amazon S3 buckets and event-driven functions, delivered a reliable and scalable processing solution in a serverless architecture.
- Hands-on experience in Amazon Web Services (AWS) like EC2, Lambda, ECS, S3, EBS, VPC, ELB, RDS, Cloud watch, Cloud Formation, Security Groups, and Simple Notification Services (SNS).
- Good understanding of Azure Cloud Services (PaaS & IaaS), Azure Kubernetes Services (AKS), Virtual Machines, Azure Database, Azure Storage, Azure Monitor, Azure Service Bus, Azure Storage Queues.
- Used persistence frameworks, Hibernate ORM, JPA to map POJOs to a relational database.
- Experience with RDBMS concepts like Functions, Triggers, Stored Procedures, DDL, DML SQL queries, PL/SQL programming, and Spring Batch Processing.
- Experienced in deploying web and JEE enterprise applications in Tomcat Server, Web Logic, Web Sphere, and JBoss.
- Expertise in migrating and upgrading WebLogic server applying patches and installing service packs for Web Logic server.
- Experience in SOAP-based Web Services, REST Web Services, JAX-WS, JAX-RS, JAXB, SOA, AJAX, and MVC.
- Performed unit and automation testing using JUnit 4, 5, Cypress, and Selenium Java Frameworks.
- Experience with XP engineering practices like approaching Behavior Driven Development (BDD) and Test-Driven Development (TDD) using the SCRUM framework in Agile Methodology

Technical Skills

Programming Languages	JAVA (JDK 1.8/1.11/1.17), J2EE, SQL, PL/SQL, C, Python
Web Technologies	HTML5, CSS3, JavaScript, Typescript, React JS (React 18/ 16), Node.js, Angular 10/12/14, Bootstrap, jQuery, JSON, Thymeleaf.
J2EE Technologies	EJB, Servlets, JSP, JDBC, JMS
Application/Web Server	IBM WebSphere, Oracle WebLogic, JBoss, Apache Tomcat
Databases	MongoDB, Oracle, PostgreSQL, DynamoDB, HBASE, Hive, Aurora DB, Oracle, MySQL, DB2, Cassandra, Maria.
Web Services	SOAP, REST, JAX-WS, JAX-RPC, JAX-RS
Methodologies	Agile, Waterfall, SCRUM.
Application Frameworks	Struts 1.x/2.x, Spring (Dependency Injection, Spring MVC, Factory Pattern, Core, Spring Context, Spring DAO, Spring IOC, Spring JDBC, Spring Security, Spring Boot, Spring Batch, Spring with Hibernate)
ORM Frameworks	JPA, Hibernate, Spring JPA, DAO
Version Control	Git
Other Tools	Maven, Jenkins, Junit, JIRA, Selenium, Oracle EBS, Postman, SOAPUI, Mockito, Log4j, Slf4j, Splunk, CloudWatch.
Cloud Computing	AWS (Amazon Web Services), EC2, RDS, S3, ECS, Lambda and Azure.
Micro services	Swagger, Spring Micro Services, Spring Boot.
DevOps	Docker, Kubernetes, Jenkins, CI/CD
IDE	Eclipse, IntelliJ, VS Code
Risk and Compliance Tools	CloudWatch, Splunk, AWS CloudFormation, JIRA, Postman, Log4j

Certifications:

- Oracle Certified Professional (OCP) Java SE Programmer 2024
- Oracle Certified Associate (OCA) Java SE Programmer
- Certified Salesforce admin 2023

Professional Experience:

AT&T.

Dec 2022 - Present

Java Full Stack Developer | Dallas, Texas

- Collaborated in all stages of Agile SDLC and developed scalable microservices and REST APIs with Java 8/11, Spring Boot, Spring JPA, Spring Cloud, Spring Batch, and Spring Integration.
- Created front-end application with React JS, and middle-tier using Spring Boot, and used Maven build tools to configure applications.
- Developed server-side functionality using Spring Boot and Java 11 and implemented a scalable microservices architecture.
- Used Spring Boot services that communicated through RESTful APIs and Apache Kafka message brokers. Employed jQuery for fetching data in response to user requests.
- Worked on service-oriented systems that utilize REST web frameworks, SOAP, and message queue technologies (Spring MVC, Spring REST Template, Rabbit MQ, Spring Integration).
- Used Java and back-end features such as Collection Framework, Interfaces, Exception Handling programming, Streams, and Lambda Functions.
- Designed front-end pages for client-facing applications using React and TypeScript to create interactive, cross-browser functionality and a complex user interface. Employed Node.js for server-side operations, ensuring responsive and dynamic pages.
- Used React to develop UI responsive applications and used Mocha to test them.
- Developed routing components in the application using the React-router module for various components and views.
- Experience in implementing Component life cycle architecture, store actions, using socket.io in React-Redux app to handle real-time data, installing React Router, Redux-Thunk for API calls in React JS.
- Developed various react functional and presentation components using JSX, XML, HTML, and Bootstrap.
- Designed and deployed solutions on AWS, using Docker on the AWS platform with EKS (Elastic Kubernetes Service)
- Developed AWS Lambda based Microservices interacting with SNS/SQS using AWS SDK to trigger the events related to the migration of data.
- Configured Docker files to build and push images into a test Docker repository with test configuration to validate an image and deployed application on the AWS Platform utilizing EKS (Elastic Kubernetes Service) and used Jenkins for orchestrating.
- Implemented Apache Kafka clusters for real-time message processing, data streaming of the application, and asynchronous message exchange between applications running on different platforms.
- Implemented AWS CloudWatch to track the application's performance, used JUnit and Mockito to conduct unit tests, and utilized Postman to test the APIs.
- Developed CI/CD system with Jenkins on Kubernetes environment, used Kubernetes and Docker for the runtime environment for the CI/CD system to build, Test, and Deploy.
- Experience in designing and migrating projects to Azure Environment and worked on Azure cloud technologies like App Services, Azure Functions, Storage services, and Azure SQL.
- Monitored Azure Log Analytics for troubleshooting the issues.
- Implemented OAUTH 2.0 in our application to communicate securely with other protected resources by exchanging access tokens for authentication.
- Experience in Slf4j for extensive logging, debugging, and error tracing. Configured and customized logs using Slf4j.

Environment: Java 11, Typescript, Angular, JavaScript, Node.js, jQuery, JSON, Spring Boot, Agile, Cloud, VS Code IDE, IntelliJ, PostgreSQL, Cassandra, Spring Boot, J2EE, Jenkins, JIRA, Docker, Kubernetes, Slf4j, Apache Kafka, Git, AWS, Azure Cloud, Protractor, Mockito, JUnit, Splunk, Unix, Linux, OAUTH 2.0, Postman, SOAP UI.

Inditech Global

Jan 2019– Aug 2021

Java Full Stack Developer | Hyderabad, India

- Worked on Agile Methodology with bi-weekly sprints, and daily scrum meetings with backlogs and story points.
- Used Java 11 to build modules and utilized Spring Boot framework to construct the microservices.
- Implemented front-end features for a Single Page Application (SPA) using React, Redux, ES6, and Webpack, following the React Redux architecture.

- Worked on ReactJS components, Forms, Events, Keys, and Router, plus Redux, Animations, and Flux concepts.
- Involved in supporting XML and JSON based REST web services, integrating with the front-end.
- Used Struts the MVC framework for building web applications.
- Used the Axios concept in React to integrate the front-end part into the back-end part of the application.
- Implemented features like logging, and user session validation using Spring-AOP module and Spring IOC.
- Integrated spring with Hibernate using configurations and implemented DAO layer to save entities into the database.
- Used Spring Boot JPA to integrate the Oracle DB to the server side. Wrote Stored SQL procedures, triggers, and effective SQL queries to retrieve the data from the Oracle DB.
- Built and consumed RESTful services in modules and implemented serialization using Spring Boot REST APIs and JSON.
- Experience working using Mongo DB.
- Designed and developed the REST-based Microservices using Spring Boot.
- Experienced in Amazon Web Services (AWS) like EC2, Lambda, S3, Security Groups, and Simple Notification Services (SNS) and deployed applications on an EC2 instance and connected to databases.

Environment: Java 1.8, J2EE, Spring Boot, React JS, jQuery, TypeScript, JavaScript, Node JS, NPM, Express.js, PostgreSQL, Mongo DB, NGINX, Kafka, Splunk, JUnit, Mockito, JWT, Log4j, JBoss, Maven, Git.

Education:

Master of Science: Computer Science | Southern Illinois University | Carbondale, IL.

Bachelor of Science: VNR VJIET | Hyderabad, India.
