Experience

Centene Corporation

Oct 2023 - Present

Business Analyst

USA

- Conducted systems integration sessions to gather and assess user and business requirements, leveraging Agile methodologies to deliver tailored technical solutions.
- Authored detailed FRD, BRD, and SRS documents to align enterprise systems with business goals, emphasizing CRM optimization.
- Enhanced enterprise data governance for policy administration systems, improving data accuracy by 25% and ensuring compliance through structured documentation in MS SharePoint.
- Customized Tableau dashboards to extract critical insights, supporting robust data extraction and informed decision-making.
- Optimized SQL scripts for seamless data integration, enhancing processing efficiency and accuracy.
- Facilitated Joint Application Development sessions and crafted process maps with Microsoft Visio to effectively support change management.
- Improved project tracking and analysis accuracy using Jira and Microsoft Excel.

Amerisource Bergen

Jan 2022 - Aug 2023

Business Analyst

USA

- Streamlined project processes using the Waterfall methodology, aligning scope definitions with business requirements and technical solutions.
- Utilized MS Project and Excel for meticulous tracking of milestones, ensuring timely project delivery.
- Collected and documented business requirements for system scalability, enhancing integrations through SQL.
- Conducted cost-benefit and SWOT analyses, resulting in a 20% improvement in project efficiency and guiding optimization strategies aligned with healthcare IT standards.
- Led User Acceptance Testing (UAT) phases by executing prewritten test scripts to validate deliverables against business capabilities and customer service goals.
- Encouraged cross-team collaboration and stakeholder engagement to strengthen change management processes.

Trigyn Technologies

Jan 2017 - Dec 2019

Business Analyst

India

- Analyzed and documented business and user requirements using User Stories, Process Flows, and Non-Functional Specifications.
- Performed AIS and To-Be analysis, SWOT analysis, Impact analysis, and Cost-Benefit Analysis to identify key improvement areas.
- Automated workflows and implemented real-time dashboards within JIRA, enhancing issue tracking and resolution.
- Presented complex data insights to non-technical stakeholders using Tableau's storytelling capabilities, leading to improved decision-making and a 15% increase in project approval rates.
- Designed use cases and activity diagrams with MS Visio, translating business requirements into system specifications.
- Managed requirements, test design, execution, and defect management using HP Quality Center, improving project accuracy.
- Communicated complex technical information clearly to non-technical audiences, ensuring alignment and understanding.
