Summary:

- Over 4 years of IT experience as a Python Developer , proficient coder in multiple languages and environments including Python , REST API , AWS , Java , C++ and SQL.
- Experienced in object-oriented programming (OOP), Software development life cycle (SDLC).
- Experienced in developing web-based applications using Python, Django, C++, XML, FAST API, Mongo DB, HTML, and JavaScript.
- Experience in web services with protocols SOAP REST and on REST APIs in Python.
- I possess hands-on experience in crafting web applications by employing the Model-View-Controller (MVC) architecture. My expertise extends to utilizing popular Python web frameworks such as Django, Flask, Tornado, and Pyramid to design and implement robust and scalable solutions.
- Experience in implementing python alongside using various libraries such as matplotlib for charts and graphs , MySQLDB for database connectivity, python-twitter, PySide, Pickle, Pandas data frame, network.
- Exceptionally solid background in composing API's along with Web Services over Python
- Hands on experience in using NOSQL libraries like MongoDB, relational databases like Oracle and MYSQL databases.
- Good Knowledge in Amazon AWS concepts like EMR and EC2 webservices.
- Hands-on familiarity with AWS services like EC2, S3, AWS Identity and Access Management, AWS CloudWatch, AWS CloudFront, and AWS EBS.
- Experience in working with various Python Integrated Development Environments like PyCharm, Python IDLE, PyCharm, Eclipse, and IntelliJ Idea.
- Highly experienced with development best practices such as code reviews, unit testing, system integration testing (SIT) and user acceptance testing (UAT).
- Experienced in version control systems using Git, SVN, and Used JIRA for tracking and reviving the progress, Used ServiceNow for ticketing system
- Hands on experience in working with Continuous Integration and Deployment (CI/CD) using Jenkins.
- Highly experienced with Agile development methodology.
- Proficient in Data Structures and algorithms, encompassing Linked lists, Queues, Stacks, Linear search, bubble sort, Binary search algorithms, and more.
- Have flexibility and ability to learn and use new technologies and also work in team environment as well as independently to get things done.

Technical Skills:

Programming Languages: Python, Data Structures, C++, Java

Python Libraries: Numpy, Pandas, Matplotlib, Scikit-learn, SOAP, Scipy

Python Frameworks: Flask, Django, Docker

Python IDE: Sublime Text 3, Eclipse, Jupyter Notebook, VIM, Pycharm.

Databases: RDBMS (Oracle, SQL Server, MySQL), No SQL (MongoDb)

Web Technologies: CSS, HTML, RESTful Web Services

Cloud Environment: AWS, AWS Services (API Gateway, Lambda, DynamoDB, S3, CloudWatch, CodeBuild, CodeDeploy)

Other Tools: Putty, SQL developer, JIRA, Jenkins

Certifications:

- [PCEP-30-02] PCEP – Certified Entry-Level Python Programmer
- AWS Certified Solutions Architect Associate

WORK EXPERIENCE:**Capgemini India PVT LTD****May, 2018 – June, 2022****Role: Software Engineer****Responsibilities:**

- Worked in comprehending and examining the client's business requirements.
- Developed and deployed Python-based web application that integrated data from multiple sources.
- Collaborated with Cross-functional teams to design and develop RESTful APIs to facilitate seamless communication between front-end and back-end systems, improving overall user experience.
- Developed views and templates with Python and Django's view controller
- Developed web applications in Django Framework's model view control (MVC) architecture.
- Performed testing using Django's Test Module.
- Developed Python-based single and multi-page applications and software systems. Troubleshoot and debug issues in existing codebase.
- Wrote and executed unit tests and integration tests, ensuring code quality and reducing number of production issues.
- Collaborated with QA team to perform unit testing and resolve identified issues, ensuring the stability and reliability of the application
- Developed and deployed web application using AWS services such as EC2, S3, Lambda.
- Designed and developed RESTful APIs using AWS API Gateway and Lambda.
- Developed and maintained automated testing frameworks using AWS services such as Code Build and Code Deploy.
- Monitored and troubleshooted application performance using AWS service such as CloudWatch and X-Ray.
- Participate in code reviews and provide constructive feedback.
- Used Git for Version control, Jira for progress tracking and ServiceNow for ticketing system

Education:

- MASTER'S in Computer Science, Auburn University at Montgomery, AL - Aug 2022 to Dec 2023.
