SUMMARY:

Accomplished and detail-oriented Quality Assurance and Business Analysis Professional with over 5 years of proven experience in the field, offering a unique blend of analytical skills, technical proficiency, and project management capabilities. Specializing in the development and implementation of comprehensive testing strategies, automation processes, and business requirements analysis, I have consistently delivered high-quality software solutions that meet and exceed project goals and business expectations. My expertise encompasses a wide range of testing methodologies, tools, and technologies, coupled with a strong foundation in business process improvement and stakeholder management. As a dynamic team leader and effective communicator, I excel in fast-paced environments, driving project success through innovative solutions, meticulous planning, and collaborative teamwork. My commitment to excellence, continuous learning, and process optimization has been instrumental in streamlining operations, enhancing system functionality, and achieving strategic business outcomes. Skilled in navigating complex project landscapes, I am adept at balancing technical challenges with business needs to deliver solutions that are not only technically sound but also aligned with business objectives.

TECHNICAL SKILLS

Testing Tools: Selenium, JIRA, HP ALM, Postman, SoapUI

Business Analysis Tools: MS Visio, Balsamiq, Lucid chart

Databases: SQL Server, MySQL

Programming Languages: SQL, Python (basic)

Project Management Tools: Trello, Asana, MS Project

Documentation & Collaboration: Confluence, Microsoft Office Suite, Google Docs

WORK EXPERIENCE

BRIGHT HEALTH, Bloomington, Minnesota

Sr. Quality Assurance and Business Analyst

JANUARY 2021 - PRESENT

Responsibilities:

- Led the end-to-end testing strategy implementation, improving software quality and user satisfaction.
- Conducted in-depth requirements gathering and analysis to align technology solutions with business goals.
- Developed automated testing frameworks, reducing manual testing efforts by 40%.
- Managed project timelines and deliverables, ensuring on-time completion within budget.
- Facilitated agile ceremonies, enhancing team collaboration and project visibility.
- Designed and executed comprehensive test plans and cases for system, integration, and UAT phases.
- Collaborated with development teams to prioritize and resolve defects efficiently.
- Created and maintained detailed documentation, including test reports and requirements specifications.
- Analyzed performance data to identify bottlenecks and recommend system improvements.
- Conducted risk assessments, proposing mitigation strategies to manage project uncertainties.
- Oversaw regression testing activities for each release, ensuring no critical issues were introduced.
- Coordinated with stakeholders to validate business requirements and system functionality.
- Implemented continuous improvement practices to optimize QA and BA processes.
- Trained new team members, enhancing team capability and knowledge sharing.
- Utilized SQL for database testing and validation, ensuring data integrity and accuracy.
- Participated in post-deployment support, gathering user feedback for future enhancements.
- Advocated for best practices in testing and documentation, improving team standards.
- Assessed and integrated new tools and technologies to enhance testing and analysis capabilities.

- Led cross-functional team meetings, fostering effective communication between technical and non-technical stakeholders.
- Monitored industry trends to recommend updates and adaptations in testing and analysis methodologies.

SIRIUS POINT, Bermuda, NY

QA/BA Analyst

FEBRUARY 2019 - NOVEMBER 2020

Responsibilities:

- Assisted in developing test strategies and plans to ensure comprehensive coverage.
- Participated in requirements gathering sessions, documenting clear and actionable specifications.
- Executed test cases for functional, usability, and security testing, identifying and reporting defects.
- Supported the implementation of automated testing for routine test scenarios.
- Engaged in UAT sessions with end-users to confirm product meets business and user needs.
- Maintained accurate and up-to-date documentation of test results and defect tracking.
- Worked closely with developers to reproduce issues and verify fixes on time.
- Contributed to continuous improvement initiatives by providing feedback on processes and tools.
- Helped manage project documentation, including requirements, user stories, and release notes.
- Assisted in risk analysis and mitigation planning to minimize project delays and cost overruns.
- Supported the configuration and management of testing environments.
- Conducted data validation and integrity checks using SQL.
- Participated in agile development processes, contributing to sprint planning and review meetings.
- Aided in the evaluation of user feedback to guide future development priorities.
- Facilitated communication between the project team and stakeholders through regular updates.
- Contributed to the assessment of new technologies and tools to enhance testing efficiency.
- Participated in peer review sessions to ensure the quality of test cases and documentation.
- Assisted in training sessions for users on new system features and functionalities.
- Supported cross-functional teams in resolving technical challenges and blockers.
- Engaged in professional development activities to keep skills and knowledge up to date.

EDUCATION

Bachelor of Healthcare Management Minor Business Admin at Colby-Sawyer College
