

Rajareddy Syamala

Java full stack developer

Tempe, AZ, USA | (512) 271 - 1677 | srajareddy.512@gmail.com | [LinkedIn](#)

SUMMARY

Results-driven **Java Full Stack Developer with 3+ years of experience** in Java/Spring Boot microservices, RESTful APIs, and web applications using Angular, React.js, and Thymeleaf, delivering secure, scalable solutions for financial and e-commerce domains. Skilled in Oracle, MySQL, PostgreSQL, MongoDB, AWS, Docker, Kubernetes, and CI/CD pipelines for cloud-native deployment, optimized transaction management, and data integrity. Experienced in Agile/Scrum, unit/integration testing (JUnit, Mockito), Git version control, API integration, code refactoring, and performance tuning, ensuring robust, high-performance applications.

TECHNICAL SKILLS

Core Competencies:	Java, Spring Boot, React.js, Microservices, AWS, Docker, Kubernetes, PostgreSQL, REST APIs, Agile, CI/CD
Programming Languages:	Core, C, C++, SQL
Frameworks:	Struts, Hibernate, Spring Security, Spring IOC, Angular 12, jQuery, Node.js, Express.js
Web Technologies:	HTML5, CSS3, AJAX, jQuery, Bootstrap, XML, JSON, Typescript, Redux, React Hooks, RESTful API
Java/J2EE Technologies:	Servlets, EJB, JPA, JTA, JDBC, JSP, JSTL, Hibernate, ORM
Database:	Oracle SQL, MySQL, MongoDB, PL/SQL
Cloud Platforms:	Amazon Web Services, AWS S3
IDEs:	Visual Studio Code, Eclipse IDE, IntelliJ IDEA, Spring Tool Suite (STS)
Web/Application Servers:	Oracle WebLogic, IBM WebSphere, Apache Tomcat, JBoss
Testing Tools:	JUnit, Mockito, Selenium
Build/ Other Tools:	Maven, Gradle, ANT, Jenkins, SOAP, Postman, Jira, SonarQube, Kafka, Jupyter
Methodologies:	SDLC, Waterfall, SCRUM
Version Control:	Git, GitHub, SVN, Bitbucket
Operating System:	Windows, Linux, Mac OS

WORK EXPERIENCE

Java Full Stack Developer | Wells Fargo, AZ-USA

Aug 2024 – Present

- Developed RESTful APIs with Spring Boot to integrate payment gateways, banking services, and internal platforms, processing over **75K daily transactions** while ensuring low-latency and secure communication across distributed systems.
- Optimized PostgreSQL schemas, queries, and indexing strategies, boosting reporting performance by **35%** and ensuring integrity of large-scale financial datasets used for compliance and real-time audits.
- Designed secure cloud storage solutions with AWS S3 for transactional backups and archival, strengthening disaster recovery and ensuring compliance with financial data retention policies.
- Built interactive React.js dashboards for portfolio, trading, and risk monitoring, improving client engagement by **25%** and enabling real-time visualization of **100K+ portfolio records** with optimized navigation and performance.
- Implemented Java Bean Validation rules across credit, loan, and transaction workflows, enforcing strict governance, eliminating invalid submissions, and improving consistency across multiple integrated services.
- Engineered modular microservices with Spring Cloud, enabling independent scaling of fraud detection, loan processing, and payment modules, improving resilience and accelerating development cycles.
- Automated CI/CD pipelines with Kubernetes and Jenkins/GitLab CI, cutting deployment errors by **38%** and accelerating secure, cloud-native rollouts across mission-critical financial environments.

Java Full Stack Developer | Capgemini, India

April 2021 – July 2023

- Designed and implemented Spring Boot microservices for inventory and cart management, achieving **27% faster stock synchronization** and handling **45K+ daily transactions** during high-demand flash sale campaigns.
- Developed responsive front-end interfaces using HTML5, CSS3, and modular JavaScript, enhancing navigation, checkout speed, and dynamic Wishlist/quick-view features, boosting user retention by **21%** and product discovery by **16%** across devices.
- Deployed applications with Docker containers, streamlining CI/CD pipelines, reducing configuration errors, and supporting **28K+ deployments** per month across multiple staging and production environments.
- Optimized concurrency with Java multithreading, handling parallel order confirmations seamlessly and decreasing checkout failures by **22%** under heavy Black Friday peak loads.
- Leveraged Java Streams API to efficiently process and transform large sales datasets, optimizing performance-critical operations, reducing computation time by **18%**, and processing over **90K orders daily** for real-time analytics dashboards.
- Established real-time communication channels with WebSocket and Node.js, supporting live order status updates, customer support chats, and dynamic notifications, increasing user satisfaction and improving customer engagement rates.
- Followed end-to-end SDLC methodologies, collaborating across teams to deliver scalable, high-quality e-commerce features on schedule, enhancing workflow transparency and accelerating product delivery cycles by **20%**.

EDUCATION

Master of Science in Information Technology – Arizona State University, Tempe, Arizona, USA

Bachelor of Technology in Computer Science and Engineering – Andhra University, Visakhapatnam, India
