EDUCATION

University of Texas at Dallas

Master of Science in Business Analytics and Artificial Intelligence (GPA - 3.93)

Richardson, TX, USA

Graduating May 2025

Amrita School of Engineering

Bachelor of Technology in Mechanical Engineering (GPA - 3.92)

Coimbatore, TN, India

June 2017 – Aug 2021

COURSEWORK

Advanced statistics for data science, business analytics with R, database foundations for business analytics, predictive and predictive analytics, applied machine learning and big data analytics

TECHNICAL SKILLS

Languages/Databases: Python, SQL Server, MySQL, PostgreSQL, R, SAS, C language

Cloud Services: AWS (S3, Glue, Redshift), Azure (Data Factory, Synapse Analytics, Data Lake Storage, Databricks), GCP

Developer Tools / Visualization Tools : VS Code, Jupyter, JIRA, GIT, MS Excel, Power BI, Tableau

Big Data Technologies: HDFS, Hive, Impala, Hadoop, spark, Flume, kafka, Airflow

CERTIFICATIONS

DP203 Microsoft Certified: Azure Data Engineer Associate

DP600 Microsoft Certified: Fabric Analytics Engineer Associate

Astronomer Certification for Apache Airflow Fundamentals

EXPERIENCE

Kaar Technologies | Senior Analyst

Sep 2021 - Aug 2023

- Led end-to-end data integration project using **Azure Data Factory**, successfully migrating on-premises (**MySQL**, **Cassandra**) and cloud data sources to **Azure Synapse**, resulting in 40% faster data processing and unified analytics platform.
- Architected and implemented data ingestion pipelines on **Azure HDInsight** Spark cluster using **Azure Data Factory** and **Spark SQL**, reducing data processing time by 30% while handling 500GB+ daily data volume.
- **Optimized** monitoring system by transitioning from **Cassandra** to **Azure SQL Data Warehouse**, implementing Log Analytics and **Ambari Web UI**, which improved query performance by 50% and enhanced system visibility.
- Developed executive dashboards using **SSRS** and **Power BI** for real-time business insights, automating weekly reporting process and reducing report generation time from 2 days to 2 hours.

Kaar Technologies | Intern

Jul 2019 - May 2020

- Designed and implemented **ETL pipeline** using **Azure Data Factory**, **Databricks**, and **Synapse Analytics** during 6-month internship, processing 100GB+ data daily while reducing processing time by 25%
- Enhanced **Azure Synapse Analytics** performance through strategic **partitioning** and **indexing**, resulting in 40% faster query execution and improved dashboard responsiveness for 50+ business users.

PROJECTS

Formula 1 Race Dashboard Creation

Jan 2019 - May 2019

- Engineered Formula 1 race analysis platform using **Azure Data Factory** and **Databricks**, reducing data processing time by **40%** and enabling **real-time race performance** insights.
- Developed interactive **dashboards** with **Power BI** to visualize race metrics, driver performance, and pit stop analytics, improving team strategy decisions for **10+ race events**.

Truck Fleet Risk Analysis and Visualization

Jan 2019 - May 2019

- Implemented **HDFS-Tableau** integration using **JDBC** drivers for **Impala** and **Hive**, creating real-time fleet monitoring system that identified **high-risk drivers** with **85% accuracy**.
- Processed and enriched **500GB+** of geo-location and event data through comprehensive **ETL pipeline**, enabling **predictive maintenance decisions** that reduced fleet incidents by **30%**.

COVID-19 Data Dashboard

Jan 2019 - May 2019

- Architected automated data pipeline using **Azure Data Factory** to ingest hourly **COVID-19 data** from **ECDC**, ensuring **99.9%** data accuracy across **200+** countries.
- Created **real-time Power BI** dashboard tracking global cases, vaccination rates, and mortality trends, serving **1000+** daily users and supporting critical **public health decisions**.

AWARDS

- Honored to be a **two-time** BALC mentor, awarded the UTD scholarship **twice**, and invited to join **Phi Kappa Phi**.
- Conducted **100 hours** of training at Kaar Tech and won Gold in an undergraduate Idea Selection competition.
