EXPERIENCE

BSI Financial Services.

Dallas, TX

Data Analyst Intern

January 2024 – June 2024

- Created dashboards for Operations, Sales and Execution using Power BI to help in monitoring KPI's and business metrics. Worked directly with business leads to ensure dashboards reflect their requirements accurately.
- Conducted thorough data cleaning and preparation using SQL, Python for data manipulation and to maintain data integrity. Applied statistical methods to analyze trends and provide actionable insights to support ongoing business strategies.

Red Heal | Hale Clinics Pvt Ltd.

Remote, Hyderabad, India

Data Analyst

April 2022 – January 2023

- Leveraged Python, Tableau, and SQL to conduct in-depth analysis on patient bookings, follow-ups, and doctor availability; uncovered key insights that enhanced operational efficiency by 30% and boosted patient retention by 20%.
- Partnered with operations manager in identifying pain points of doctors. Based on the feedback designed a recommendation module which automatically suggests medicine name as the doctor types a letter.
- Worked on a python module that matches an incoming patient call to the best possible doctor in the network based on the availability, specialization, seniority, etc.

Market Data Forecast Pvt Ltd.

Remote, Hyderabad, India

Data Analyst

December 2021 – March 2022

- Worked directly under the CEO to implement observability tooling on the MarketDataForecast website.
- Implemented Mixpanel to collect information on website visitor behavior. Created funnel in Mixpanel to understand where exactly the highest % drop is and reported the insights to the CEO.
- Also, worked with the researchers to get market data from their data vendors, create visualizations that are used in the research reports. Ingested the data in a SQL database and used Tableau to create the visualizations.
- Improved the operational planning outcomes by creating a “what new reports to work on” monthly initiative.
- I've used google trends and Semrush to see what keywords/research reports users are searching for. Then I've used Open AI Api to map with existing reports in the database and provided insights on the new reports to prioritize.

Accenture

Bangalore, India

Data Analyst

November 2020 – November 2021

- Built an internal reporting dashboard for executives using React and Node. Consolidated 10 plus data sources/ excel files into the reporting website.
- Part of a 5 member team that built Automation Compass which helped identify process improvement opportunities
- Improved website latency from 3+ seconds to <1 second by optimizing for repeat traffic and parallelizing part of the testing code.
- Created a data ingestion pipeline to automate daily data refresh and created an easy interface for BI tools consumption. Also setup alerts to respective stakeholders when the pipelines fail.
- Identified and resolved data integrity issues impacting client experience and affecting the business logic. Reduced inaccurate data reporting issues from 5 per month to 0.

Python, SQL, Tableau, Scala, Spark, Azure data bricks, Azure devops, Git, IBM, SPSS, JavaScript, Angular, React, Node JS, HTML, CSS

PROJECTS

Optimal Incentives for reducing user churn | Machine Learning.

Dallas, TX

Created a web application that generates incentives based on user churn model

August 2023 – November 2023

- Talked to a customer success manager at a SaaS company and built a web application using React.
- The application takes in an input of user's churn score and generates incentives to retain the customer while optimizing for the business profitability metrics.
