

YESWANTH KUMAR LEKKALA

813-334-6784 | lekkalayeswanthkumar@gmail.com | LinkedIn | Irving, TX

PROFESSIONAL SUMMARY

Agile-driven Business Analyst & Project Manager with 4+ years of experience delivering solutions in logistics, energy, IT modernization, and process automation. Proven expertise in translating business needs into technical solutions across logistics and energy sectors, managing end-to-end SDLC, and driving 20%+ efficiency gains using Agile/Scrum. Certified in Google Project Management and PMI GenAI, with hands-on experience in requirements elicitation, Jira-driven sprint planning, and stakeholder alignment. Successfully led cross-functional teams in optimizing workflows for Fortune 500 logistics firms and offshore energy projects.

EXPERIENCE

Ecorfy Inc (Client: CRST)

Business Analyst & Project Manager

Aug 2024 - Present

Irving, TX

Legacy Driver Application Modernization (Driver Rewrite Project)

- Spearheaded end-to-end modernization of CRST's legacy driver application by migrating to new programming languages (Java/Python) and redesigning UI/UX.
- Conducted gap analysis of the existing system, documenting 50+ screens via screenshots and collaborating with stakeholders to finalize design requirements.
- Developed Figma prototypes aligned with CRST's branding guidelines, reducing UI revision cycles by 40% through iterative stakeholder feedback.
- Orchestrated Agile sprints via Jira, assigning tasks to 8 developers and conducting daily standups to resolve blockers, ensuring 100% sprint completion.
- Coordinated with QA teams to execute UAT, resolving 15+ critical bugs pre-launch and achieving zero post-deployment escalations.

Invoice Back-Billing Automation Web Application

- Automated manual invoice back-billing processes by developing a full-stack web application, eliminating 200+ hours/month of manual Excel workflows.
- Performed stakeholder analysis across 4 departments, gathering requirements and mapping workflows using process diagrams (Visio) to identify automation opportunities.
- Designed interactive Figma prototypes for client approval, reducing requirement ambiguity and accelerating development kickoff by 3 weeks.
- Managed SDLC in Agile, breaking down deliverables into 2-week sprints and prioritizing backlogs to ensure on-time MVP delivery.
- Conducted end-user testing to validate functionality, reducing post-launch errors by 35% and enhancing cross-departmental data transparency.

ARAMARK

Student Lead

Aug 2022 - May 2024

USF-Tampa, FL

- Delivered 95% of projects on time by leading 15-member teams, boosting client satisfaction by 18% through Agile risk mitigation.
- Automated reporting via Power BI, slashing manual data entry by 25% and accelerating decision-making for stakeholders.
- Reduced labor costs by 15% by optimizing team schedules and resource allocation for cross-functional operations.
- Improved inventory turnover by 20% using MS Excel/Power Query tools, enhancing logistics and cost control.
- Designed real-time Power BI dashboards for sales/trend analysis, enabling data-driven strategies across departments.

OCEANERGY

Project Manager

Nov 2019 - Jul 2022

Mumbai, India

- Led cross-functional teams in oil & gas and renewable energy projects, blending Agile (R&D for floating solar) and Waterfall (oil rig design) methodologies to align deliverables with client requirements.
- Elicited technical and design requirements from stakeholders for offshore structures and floating solar plants, translating them into actionable engineering specifications.

- Optimized CFD analysis workflows through process automation, reducing project costs by 10% and turnaround time by 20% while improving modeling accuracy by 15%.
- Collaborated with clients to define project scope, timelines, and success metrics, ensuring compliance with industry standards (e.g., marine engineering, renewable energy).
- Streamlined resource allocation and risk management for structural analysis projects, achieving 100% on-time delivery despite complex technical constraints.
- Bridged gaps between engineering teams and stakeholders using SDLC principles, ensuring seamless alignment of technical execution with business goals.

Steel Exchange India Ltd

May 2018 - Aug 2018

Project Manager Intern

Srirampuram

- Assisted in process improvement initiatives for steel manufacturing, collecting and analyzing data to optimize production processes
- Participated in cross-functional team meetings, contributing to technical problem-solving discussions and project planning
- Gained hands-on experience in industrial operations, quality control procedures, and safety protocols in a steel manufacturing environment
- Conducted data analysis using Excel to identify inefficiencies in the production line, presenting findings to senior engineers
- Shadowed project managers, learning about project lifecycle management and stakeholder communication in an industrial setting

EDUCATION

University of South Florida

Aug 2022 - May 2024

Master's in Business Analytics and Information Systems

GPA: 3.75/4

- Relevant Coursework: Project Management, International Management, Data Visualization, Enterprise Information Resource Management, Analytical Method for Business, Data Mining

National Institute of Technology

2015 - 2019

Bachelor of Technology, Mechanical Engineering

CGPA: 7.3/10

TECHNICAL SKILLS

- Project Management: JIRA, Microsoft Project, Trello, Agile, Scrum, Kanban
- Software Development: SDLC, CI/CD, DevOps, Git
- Cloud Platforms: AWS, Azure (basic knowledge)
- Programming: Python, SQL
- Databases: MySQL, PostgreSQL
- Data Analysis & Visualization: Power BI, Tableau, Excel
- Engineering Tools: ANSYS, AutoCAD

CERTIFICATIONS & TRAINING

- Google Project Management Certification (Coursera)
- PMI Certifications: Talking to AI: Prompt Engineering for Project Managers, Data Landscape of GenAI for Project Managers, Generative AI Overview for Project Managers
- PMP Certification (In progress)
- Accenture North America Project Management Job Simulation (Forage) - September 2024
