Carlos Javier Maldonado Santiago

Data Analyst with a background in Biology and Genomic Quality control seeking an opportunity with growth potential and competitive benefits in a dynamic and innovative organization where I can apply my skills and experience to drive success.

Curriculum Vitae

Skills & abilities

Strong analytical and problem-solving skills. Exceptional organizational and project management skills. Proficient in multiple programs with detail-oriented in regulated environments and collaborating with cross-functional teams to ensure accuracy and integrity.

Technical Skills

- SQL
- Microsoft Excel (advanced functions, data validation, reporting)
- Power BI (dashboard creation and data visualization)

Characteristics

- Fast learner
- Bilingual
- Adaptability in regulated environments

Education

Bachelor of Science in Biology

Aug 2017 – May 2022

Interamerican University
Ponce Campus

High School Diploma

Aug 2014 – May 2017

Lysander Borrero Terry
Villalba, Puerto Rico

Experience

Data Analyst – Quality Control

May 2024 – present

Corteva Agriscience
Global Core Data Analysis team

Responsibilities:

- Analyze high-throughput SNP genotype datasets to assess sample- and marker-level quality metrics.
- Communicate QC findings and data discrepancies to laboratory scientists and project requestors across multiple labs such as Hawaii, Brazil, Iowa, Canada, Germany and Puerto Rico.
- Identify and troubleshoot data integrity issues including low call rate clusters, batch drift, sample swaps, contamination signals, and allele frequency anomalies.
- Perform interpretive QC analysis prior to downstream breeding and genomic selection workflows.

- Time management

- Utilize SQL, Excel, and Power BI to generate reports and support data-driven decisions.
- Ensure adherence to quality standards within production-scale DNA laboratory operations.

Manufacture Technician

May 2022-Feb 2024

Medtronic

Villalba, Puerto Rico

Responsibilities:

- Assembled and inspected medical devices under strict regulatory and quality control standards.
- GMP and SOP protocols followed in a highly regulated production environment.
- Performed in-process quality checks to ensure product compliance and patient safety.
- Maintained detailed documentation to support traceability and audit readiness.
- Contributed to continuous improvement initiatives to enhance production accuracy and efficiency.
