PROFESSIONAL SUMMARY

Data Analyst with 6+ years of experience transforming complex datasets into actionable business intelligence across diverse financial and enterprise software domains. Expertise in developing comprehensive data analysis solutions, dashboards, and reporting mechanisms. Proficient with Python, R, SQL, Tableau, Power BI, and cloud platforms including AWS S3 and EMR. Skilled in extracting critical insights from large data volumes to inform decision-making and drive operational improvements. Focuses on data integrity and delivering clear, impactful data narratives for stakeholders.

WORK EXPERIENCE

Nationwide, Data Analyst	Oct 2021 to Present
- Developed complex SQL queries in Snowflake to extract and transform diverse financial data, supporting essential reporting and detailed business analysis across departments at Nationwide. - Performed extensive data cleaning and manipulation using Excel spreadsheets, preparing raw datasets for further analysis and ensuring data quality for financial operations. - Built interactive dashboards using Tableau to visualize key performance indicators, offering clear insights into various insurance product lines and operational efficiency. - Created Python scripts to automate routine data processing tasks, which helped in preparing datasets for trend analysis and initial exploratory data investigations. - Developed statistical analyses in R to identify significant trends within customer data, informing strategies for improving customer engagement and retention efforts. - Processed and cleaned large volumes of raw data using SQL and Excel, ensuring accuracy and consistency for downstream analytical models and operational reports. - Generated comprehensive data reports from various sources, presenting findings clearly to support business decision-making regarding product performance and market trends. - Analyzed complex datasets to identify patterns and insights, contributing to a better understanding of business performance metrics and potential areas for improvement. - Prepared visual presentations and summaries of data findings for cross-functional teams, explaining analytical outcomes to support strategic planning discussions effectively. - Supported ad-hoc data requests from different business units, extracting and organizing information quickly to address specific operational and strategic inquiries.	
Workday, Data Scientist	Dec 2019 to Apr 2021
- Developed SQL queries to clean and validate financial transaction data within enterprise planning applications, ensuring data integrity for downstream analytics. - Performed detailed data analysis using Excel, preparing reports on human resources metrics and spend management trends to support strategic decision-making. - Built interactive dashboards in Power BI, visualizing key performance indicators for HR and finance operations to provide actionable insights for various client initiatives. - Generated comprehensive reports on workforce planning data, translating complex datasets into clear summaries for stakeholders involved in global HR program development. - Designed and optimized SQL scripts to extract specific data sets from financial management systems, supporting ad-hoc requests for deep dive analytical investigations. - Created Python scripts to automate preliminary data cleaning and transformation processes for HR talent acquisition datasets, improving efficiency for analytical workflows. - Implemented new visualizations in Tableau to track budget adherence and forecast variances within spend management modules, enhancing financial oversight and reporting. - Conducted statistical analysis using R to identify significant patterns in employee engagement surveys, providing data-driven recommendations for HR program enhancements. - Analyzed operational data from enterprise analytics platforms to uncover insights into financial performance, formulating actionable recommendations for process improvements. - Prepared data presentations and summaries for cross-functional teams, facilitating informed discussions on quarterly financial reviews and HR strategy development.	

TECHNICAL SKILLS

Cloud Platforms: AWS S3, AWS EMR, AWS Glue, AWS SageMaker
Data Management Tools: Excel
Programming Languages: Python, R, SQL
Data Analysis & ML Libraries: Pandas, scikit-learn, XGBoost, spaCy, TensorFlow
Data Warehousing & Processing: Snowflake, Spark, PySpark
Business Intelligence & Visualization: Tableau, Power BI

EDUCATION

Master's, Data Science/M.B.A
Lindsey Wilson University 08/2025 - Present
M.S in Biomedical Engineering, Case Western Reserve University, Cleveland,OH
Digital Health Analytics

CERTIFICATIONS

Business Analytics From Harvard Business School Online
Databricks Certified Data Engineer Associate
Engineering Excellence In Big Data Analytics and Optimization
Data Science and Machine learning: Making Data-Driven Decision
