

Miles Shoaf

8309 Bowsprit Lane, Hurst, Texas, 76053

(512) 810-1928 - milesashoaf@gmail.com - www.linkedin.com/in/miles-shoaf

Objective

Master of Science in Economics graduate with two years of experience in risk modeling and data analytics, seeking a full-time role in the financial or economics industry leveraging expertise in machine learning, predictive modeling, and data-driven decision-making.

Experience

Mr. Cooper

Coppell, TX

July 2023- Present

Senior Risk Modeling Analyst

- Built and optimized datasets in SAS, reducing data preparation time by 30% and accelerating model development cycles.
- Engineered and deployed machine learning models in Python (LightGBM) that improved prediction accuracy and enhanced risk assessment processes.
- Collaborated with leadership to deploy models into production, ensuring scalability, reliability, and measurable business impact.
- Produced data-driven insights that influenced strategic decisions, improving operational efficiency and risk mitigation.

Mr. Cooper

Coppell, TX

June 2022- December 2022

Workforce Management Analyst

- Conducted data analysis and reporting on call center adherence and agent performance to optimize workforce efficiency.
- Built dashboards and reports to identify trends, anomalies, and process improvements.
- Partnered with managers to translate findings into operational adjustments that reduced inefficiencies.

University of North Texas, Department of Economics

Denton, TX

August 2022- May 2023

Graduate Research Assistant

- Assisted in economic research through data cleaning, statistical analysis, and literature review.
- Prepared datasets and preliminary models to support faculty-led research projects.

Education

University of North Texas

Denton, TX

MASTER OF SCIENCE IN ECONOMICS

Spring 2023

University of North Texas

Denton, TX

BACHELOR OF SCIENCE IN ECONOMICS AND MINOR IN MATHEMATICS

Spring 2021

Skills

Technical Skills

- **Programming & Tools:** Python (LightGBM, pandas, scikit-learn), SAS, SQL, Visual Studio Code
- **Analytics:** Machine Learning, Predictive Modeling, Statistical Analysis, Data Visualization
- **Software:** Microsoft Excel, PowerPoint, Word, Outlook

Professional Skills

- **Data-Driven Decision Making | Problem Solving | Communication | Time Management | Collaboration**

Projects

College Football Analytics and Predictions

August 2024- Present

- Designed and maintained a data pipeline pulling historical and current college football data (team stats, recruiting, returning production, efficiency metrics).
- Developed machine learning models in Python (LightGBM, pandas, scikit-learn) for spread and game outcome predictions, segmented by season week groupings to improve accuracy.
- Created forecasts and forward-looking rankings to assess team strength, game outcomes, and season projections.
