EDUCATION

California State Polytechnic University, Pomona

Pomona, CA

Master of Science, Information Security (Online)

August 2024 - May 2026

California State Polytechnic University, Pomona

Pomona, CA

Bachelor of Science, Computer Information System

August 2021 - May 2023

EXPERIENCE

Data Analyst Intern

October 2025 - January 2026

KCC Capital Partners

Newport Beach, CA (Remote)

- Analyzed and cleaned datasets using Microsoft **Excel (PivotTables, VLOOKUP/XLOOKUP, conditional formatting)** to support reporting and data accuracy.
- Used **SQL queries (SELECT, WHERE, JOIN)** to retrieve and validate data from relational databases for analysis and reconciliation.
- Created summary reports and simple dashboards to communicate insights to stakeholders and support data-driven decisions.

SEO & Web Analytics Intern

August 2025 - November 2025

InRiva AI

Philadelphia, PA (Remote)

- Tracked and analyzed website engagement using **Google Analytics 4, Microsoft Clarity, and Looker Studio**, identifying user-behavior trends that informed content strategy.
- Conducted keyword and competitor analysis using **SEMrush**, increasing organic reach by optimizing metadata and linking structure.
- Managed and optimized a **WordPress** website for **SEO**, improving metadata, internal linking.

Data Analytics Extern

February 2025 - April 2025

TruBridge (via Extern.com)

United States (Remote)

- Analyzed healthcare datasets using **Python (pandas)** and **Power BI** to identify correlations and key performance trends.
- Cleaned and visualized population-level data to support **data-driven** decisions in healthcare operations.

E-commerce & Data Operations Analyst

Dec 2020 - Jan 2025

Alias Inc

South El Monte, CA

- Managed and optimized 30,000+ product listings across **Amazon, eBay, Walmart, and Shopify** to improve visibility and sales.
- Developed **SQL** queries to automate workflows in **Google App Script** and **Google Sheets**, increasing operational efficiency by 20%.
- Designed and maintained relational databases for inventory and sales data, supporting forecasting and trend analysis.
- Analyzed large datasets to identify performance patterns and deliver insights that improved inventory management and sales forecasting.
- Implemented SEO best practices and data-driven strategies, resulting in a 30% increase in organic search traffic and a 15% rise in sales

PROJECTS

IMF Economic Growth | *Power BI, Python, SQL, Excel*

2025

- Created a dynamic dashboard that visualizes Real GDP growth by country and region using Power BI
- Utilized DAX calculations and drill-through pages for deeper insights.

Warehouse Management Systems | *Google App Script, Javascript, Google Sheet*

Dec 2022

- Designed a WMS to track inventory movement and automate stock alerts using Google App Script.
- Automated low-stock alerts using SQL queries to ensure timely replenishment of products.
- Reduced manual data entry by 30% and optimized database performance by 20%.

TECHNICAL SKILLS

Languages: JavaScript, HTML/CSS, PHP, Java, Python, SQL, React, Node.js, Next.js

Libraries/Tools: Pandas, NumPy, Scikit-learn, BeautifulSoup, Matplotlib, Seaborn, Selenium

Data Analysis and Visualization: Python, SQL, Power BI, Tableau, Excel, MySQL, Google Sheet, Google App Script

Other:: Git, GitHub, Firebase, React, Flask, Excel (Advanced), AWS (basic knowledge)
