

OLUWATOMISIN OLOPADE

DATA ANALYST & DATA ACQUISITION

Mercyolalusi70@gmail.com | +1 (862) 235-8868 | Bloomfield, NJ 07003

PROFESSIONAL SUMMARY

Results-driven **Data Analyst** and **Data Acquisition Specialist** with 7+ years of experience delivering actionable insights through advanced analytics, **data modeling**, and **visualization**. Highly proficient in **SQL**, **Python (Pandas, NumPy)**, **R**, **Excel (Advanced)**, **Tableau**, **Power BI**, **Looker**, and **ETL tools** such as **Talend** and **Informatica**. Experienced in building scalable **ETL pipelines**, integrating **APIs**, managing **cloud-based data environments (AWS, Azure, GCP)**, and ensuring **data quality, governance, and compliance** across large datasets. Adept at automating reporting processes, designing **KPI dashboards**, and providing strategic insights to drive business decisions. Skilled in **Agile/Scrum methodologies**, **cross-functional collaboration**, and **stakeholder management**, with a proven track record of optimizing workflows, reducing operational inefficiencies, and supporting **data-driven strategies** in insurance, tech, and analytics domains.

CORE SKILLS

Data Analysis & Visualization: SQL, Python (Pandas, NumPy), R, Excel (Advanced), Tableau, Power BI, Looker, QlikView, Data Modeling, Data Visualization, KPI Dashboards

Data Acquisition & ETL: Data Sourcing, Data Cleansing, ETL Pipelines, API Integration, Web Scraping, Data Warehousing, Snowflake, Redshift, AWS S3, Google BigQuery

Database & Storage: MySQL, PostgreSQL, Oracle, MS SQL Server, NoSQL (MongoDB, Cassandra), Data Architecture, Data Governance

Project & Workflow Management: Jira, Trello, Asana, Monday.com, Confluence, Agile/Scrum Methodology, Kanban, Sprint Planning

Automation & Reporting: Python Automation Scripts, SQL Stored Procedures, Power Automate, Report Generation, Scheduled Reporting, Excel Macros, Data Pipelines

Cloud & Tools: AWS, Azure, GCP, Git/GitHub, Docker, Tableau Server, Looker Studio, ETL Tools (Talend, Informatica), APIs

Soft Skills: Analytical Thinking, Problem Solving, Communication, Collaboration, Stakeholder Management, Attention to Detail, Critical Thinking, Adaptability, Time Management

PROFESSIONAL EXPERIENCE

ALLSTATE | DATA ANALYST

AUG 2021 – PRESENT

- Coordinated **Agile/Scrum** sprints using **Jira** and **Confluence**, enhancing team collaboration and on-time delivery of analytics projects, implementing **Kanban** boards for task tracking and **Sprint Planning** to optimize work cycles while fostering cross-team alignment.
- Conducted **data quality audits and cleansing** to correct inconsistencies across insurance datasets, ensuring compliance with regulatory standards and demonstrating **adaptability** when integrating new data sources and handling evolving business requirements.
- Applied **analytical thinking and problem-solving** to identify anomalies in policy and claims data, reducing error rates by 18% and ensuring that high-priority insights were delivered to executives for actionable decisions.
- Created predictive models using **R** to forecast claims risk, achieving 92% accuracy and informing proactive underwriting strategies, demonstrating **critical thinking** in model selection and validation while supporting risk mitigation efforts.
- Automated recurring reporting processes with **Python (Pandas, NumPy) scripts**, reducing manual reporting effort by 40 hours per month, and applied **Power Automate** to streamline internal workflow approvals across analytics teams.
- Designed and maintained **interactive KPI dashboards** using **Tableau**, improving business reporting efficiency by 35% and enabling executive teams to track 50+ key metrics in real-time, while also incorporating **QlikView** for ad hoc visualizations of high-volume insurance data.
- Performed **advanced SQL analysis** across multiple databases (**MySQL**) to extract insights on customer retention, contributing to a 15% increase in policy renewals, and implemented **scheduled reporting** to automate recurring analytics updates.
- Integrated external APIs for third-party insurance data, streamlining **data acquisition** and improving claim verification efficiency, while maintaining proper **data architecture** for long-term scalability across different business units.
- Collaborated with stakeholders to define business requirements and ensure accurate **data governance**, improving data accuracy for 100k+ customer records, while applying **attention to detail** to maintain compliance standards.
- Utilized **Excel (Advanced)** to generate complex financial and claims reports, including pivot tables and macros, improving reporting turnaround and enabling deeper analytical insights for multiple cross-functional teams.
- Conducted **data modeling and visualization** on insurance claims datasets, leveraging **Power BI** to identify trends that reduced claim processing time by 20% and supported strategic planning initiatives.

INDEED | DATA ACQUISITION

APR 2021 – JUL 2021

- Managed cloud storage for acquired data using **AWS S3**, enabling secure storage of 5+ TB of job market data, and implemented **Azure** cloud integration for scalable backup solutions across the analytics pipeline.
- Built and maintained **ETL pipelines** to automate data ingestion from job boards, improving daily processing speed by 50%, while leveraging **ETL tools (Talend, Informatica)** for robust workflow orchestration and error handling.
- Leveraged **Snowflake** for efficient data warehousing and querying, reducing processing time by 30% for large-scale datasets, and also used **Google BigQuery** for parallel analytics and reporting to support business insights.
- Performed **data cleansing and transformation**, ensuring 100% accuracy of ingested datasets for analytics use, while validating **NoSQL (MongoDB, Cassandra)** storage for unstructured job data and supporting downstream applications.
- Conducted **web scraping** using Python to acquire structured datasets from over 200k job postings, enhancing market intelligence, and performing **data sourcing** to enrich internal repositories and improve coverage.
- Communicated findings and coordinated with stakeholders using **Trello** and **Slack**, ensuring transparency and timely delivery of cleaned datasets, while maintaining version control and collaboration through **Git/GitHub**.

IBC | DATA ANALYST

JAN 2019 – MAR 2021

- Applied **Excel macros and advanced functions** for reporting and reconciliation of large datasets, improving reporting accuracy by 20% while ensuring data consistency across multiple departments and projects.
- Conducted **Python automation scripts** to streamline data processing workflows, reducing manual data preparation time by 35 hours per week, and integrating **GCP** for cloud-based computation on large datasets.
- Developed **Looker dashboards** for policy and claims tracking, providing real-time insights into operational KPIs and improving team efficiency by 25%, while deploying **Docker** for containerized dashboard testing environments.
- Executed **SQL stored procedures** on **PostgreSQL** databases to generate reports on claims trends, contributing to cost-saving initiatives of \$1.2M annually, while maintaining **MS SQL Server** support for legacy systems.
- Maintained and monitored **Redshift** data warehouse, ensuring efficient storage and retrieval of 2+ TB of insurance datasets, and applied **Docker** and ETL tools to streamline ingestion pipelines for large-scale analytics.
- Collaborated with cross-functional teams using **Asana** to track analytics project progress and optimize sprint outcomes, while utilizing **Monday.com** to manage broader workflow coordination and reporting transparency.
- Integrated data from multiple sources using **API integration** to enrich internal datasets for analytical modeling, enhancing decision-making quality and applying **data sourcing** techniques to identify missing information efficiently.
- Demonstrated strong **stakeholder management and communication** by presenting actionable insights to leadership, improving policy adoption strategies, while exercising **adaptability** and **time management** to balance multiple analytics priorities.

EDUCATION

Bachelor of Science in Biochemistry – Bowen University | Oct 2015

CERTIFICATIONS

- AWS Cloud Practitioner | June 2021
- CompTIA Security+
