

Srija Nagella

HEALTHCARE DATA ANALYST

Hartford, CT | (203)-418-0538 | srija.nagella@hotmail.com

Healthcare Data Analyst with 4+ years of experience transforming **EHR/EMR, claims, utilization, and population health data** into actionable insights that improve patient outcomes, reduce costs, and ensure compliance with **HIPAA, HEDIS, CMS, and ICD-10 standards**. Experienced in working with **Optum, Truven, and Health Catalyst datasets** for claims and cost data analytics. Proficient in **SQL, Python, Power BI, Tableau, and Excel** for data extraction, cleaning, transformation, and visualization. Skilled in **ETL pipeline development, data governance, predictive modeling, regression and cohort analysis, time series forecasting, and risk adjustment analytics**. Proven track record in **optimizing claims processing, monitoring clinical metrics, identifying care gaps, and supporting value-based care initiatives**. Adept at collaborating with clinicians, payers, and cross-functional teams to deliver **accurate, actionable, and compliant healthcare analytics** that guide strategic decisions and operational improvements.

TECHNICAL SKILLS

Healthcare Data Analysis: EHR/EMR Analytics, Claims Data Analysis, Patient Outcomes Analytics, Population Health Analytics, Risk Adjustment Modeling, Clinical Metrics Reporting

Business Intelligence & Reporting: Tableau Dashboards, Power BI (DAX & Power Query), Excel (Pivot Tables & Power Query), Google Data Studio, KPI Tracking

Programming & Querying: SQL (Joins, CTEs, Window Functions, Stored Procedures), Python (Pandas, NumPy, Matplotlib, Seaborn), R (Statistical Analysis)

ETL & Data Management: Alteryx (Data Transformation), Azure Data Factory, SSIS, Data Cleaning & Validation, Data Profiling

Analytics & Statistical Methods: Regression Analysis, Cohort Analysis, Time Series Forecasting, Predictive Modeling, A/B Testing, Machine Learning for Healthcare

Databases & Cloud Platforms: Azure SQL, MySQL, PostgreSQL, Oracle Database, Google BigQuery

Compliance & Healthcare Standards: HIPAA Compliance, HEDIS Reporting, CMS Reporting, ICD-10 & CPT Coding, Data Security & Privacy

PROFESSIONAL EXPERIENCE

Healthcare Data Analyst | UnitedHealth Group, NJ

Aug 2024 - Current

- Analyzed claims, EHR, and utilization data for 500K+ patients using SQL and Python, identifying care gaps that improved patient outcomes and reduced costs by 12% annually.
- Developed 10+ Tableau and Power BI dashboards to monitor clinical metrics, readmission rates, and population health, enabling leadership to make data-driven strategic decisions.
- Designed and implemented ETL pipelines in Azure Data Factory and Alteryx, streamlining claims and EHR ingestion, reducing data processing time by 30% while maintaining HIPAA compliance.
- Conducted cohort and regression analyses on patient populations to identify readmission risk factors, enabling clinical teams to reduce readmissions by 10%.
- Built predictive models for risk adjustment and chronic disease management, identifying high-risk patient cohorts, improving preventive care targeting, and supporting value-based care initiatives.
- Collaborated with cross-functional teams, including clinicians, payers, and operational leaders, to design KPIs and dashboards that improved population health management and quality scores.
- Implemented data validation and governance frameworks, increasing reporting accuracy by 15% across claims, EHR, and operational datasets while adhering to HEDIS and CMS standards.
- Automated claims and patient outcome reports in Power BI and SQL, reducing report preparation time by 40% and enabling real-time cost monitoring for executive leadership.

Junior Healthcare Data Analyst | Accenture, India

Nov 2020 - Jul 2023

- Extracted, cleaned, and transformed EHR and claims datasets for 200K+ patients, ensuring HIPAA compliance and improving data reliability for healthcare research and reporting.
- Built Excel and Power BI dashboards to monitor patient outcomes, utilization trends, and cost metrics, enabling management to identify gaps in care and improve resource allocation.
- Conducted data profiling and quality checks, reducing errors in patient data by 15%, ensuring reliable analytics for clinical and operational decision-making.
- Assisted in developing SQL queries and stored procedures to extract large healthcare datasets efficiently, supporting regulatory reporting for CMS and HEDIS.
- Supported cohort analyses and predictive modeling for chronic disease and population health initiatives, helping clinicians identify at-risk patients for preventive care.
- Collaborated with consulting and clinical teams to design actionable visualizations and insights, improving decision-making and strategic recommendations for healthcare clients.

EDUCATION

Master of Sciences in Analytical Science | Sacred Heart University, Fairfield, CT

CERTIFICATE

Microsoft Certified: Data Analyst Associate (Power BI) | Google Data Analytics Professional Certificate
