Professional Summary

Software Engineer with hands-on experience in building and deploying full-stack and backend systems using Python, Java, and AWS. Skilled in developing RESTful APIs, automating workflows, and working with cloud-based and distributed platforms. Experienced in supporting production systems, collaborating with cross-functional teams, and delivering scalable, reliable applications.

Education

Purdue University

Master of Science in Computer & Information Science

Dec 2025

Indianapolis, IN

- **Coursework:** Cloud Computing, Database Systems, Advanced Algorithms, Computer Networks, Operating Systems

Technical Skills

Languages : Python, Java, SQL, Shell Scripting
Web & Backend : Flask, RESTful APIs, MVC Architecture, Authentication
Data Engineering : ETL/ELT, Data Modeling, Batch Processing, Pandas
Databases : PostgreSQL, MySQL, Amazon Redshift, MongoDB, SQLite
Cloud & DevOps : AWS (EC2, S3, Lambda, Glue, IAM, SNS/SQS), Docker, CI/CD (GitHub Actions)
Tools & Analytics : Git, Jira, Power BI, Tableau, Excel, Google Sheets
Core CS : Data Structures, Algorithms, Operating Systems, Computer Networks, OOP

Experience

Carelon Global Solutions Pvt Ltd

Associate Software Engineer

Sep 2023 – Dec 2023

India

- Supported enterprise-scale customer engagement platforms built on the **Genesys framework** within production **CRM environments**.
- Automated workflow simulations and deployment tasks using **Python** and **Shell scripting**, reducing manual effort by 30%.
- Worked on **system integrations** across **distributed services** to improve reliability and performance.
- Collaborated with engineering teams to troubleshoot **production issues** and enhance platform stability.

GreyCampus Edutech Pvt Ltd

Software Engineer Intern

Feb 2023 – Aug 2023

India

- Resolved technical tickets involving **SQL queries**, data inconsistencies, and application workflow issues across internal platforms.
- Developed **Python-based modules** and **REST APIs** to process learner engagement data.
- Collaborated with the sales team to build a **Sales Analytics Dashboard** using **Python, SQL, AWS S3, and Power BI**.
- Automated **data pipelines** and engineered **KPIs** for business reporting.
- Tested internal applications and validated **data pipelines** supporting coding labs and assignments.

EZ Trainings & Technologies

Technical Trainer & Data Analyst

Aug 2022 – Feb 2023

India

- Delivered training in **Python, Java, Data Structures, and Problem Solving** to 300+ students.
- Developed an end-to-end analytics pipeline using **Python (Pandas)** and **SQL**.
- Built reporting dashboards using **Excel** and **Google Sheets** to track performance metrics.

Projects

Full Stack Learning Management System | Python, Flask, AWS, PostgreSQL

- Developed a full-stack web application using **Python** and **Flask** for managing courses, users, and assessments.
- Designed and implemented **RESTful APIs** for secure data access, validation, and business logic.
- Integrated **PostgreSQL** for efficient data storage, indexing, and query optimization.
- Deployed and maintained the application on **AWS** using **EC2, S3, and IAM**.
- Implemented **authentication, role-based access control**, and automated backup mechanisms.
