

Revanth Kolipaka

(313) 314-1214 • revanthkolipaka89@gmail.com

PROFESSIONAL SUMMARY

Highly accomplished Senior Software Developer with 5 years of comprehensive experience in designing, developing, and optimizing robust enterprise applications across diverse sectors. Possesses profound expertise in Core Java/J2EE, including JSP, Servlets, EJB, JMS, and JCA, alongside strong hands-on experience with open-source Java frameworks like Spring and Hibernate/JPA for efficient transaction management and ORM. Proficient in both front-end and back-end development, ensuring seamless integration and optimal user experiences through modern front-end technologies like React.js and responsive web interfaces. Demonstrated ability to analyze complex business requirements, perform gap analysis, design technical specifications, and implement scalable solutions using SOAP and RESTful web services. Adept at leading multiple application releases, enforcing stringent code standards, and mentoring junior developers, ensuring full lifecycle involvement from requirement gathering to quality assurance.

WORK EXPERIENCE

Capital One @ McLean, Virginia
Senior Software Developer

July 2024 – Present

- Designed and implemented robust enterprise applications using Java and Spring Boot microservices for critical financial transactions and payment processing.
- Developed and maintained highly scalable RESTful APIs, handling millions of daily requests with demonstrated sub-100ms latency for optimal performance.
- Led the migration of monolithic services to cloud-based microservices on AWS, significantly reducing application downtime by 40%.
- Built real-time fraud detection modules seamlessly integrated with data streaming pipelines, enhancing system security and reliability.
- Automated comprehensive CI/CD pipelines using Jenkins, Docker, and Kubernetes, decreasing deployment failures by 60% across multiple application releases.
- Designed advanced event-driven architectures leveraging Kafka for efficient and reliable inter-service communication within distributed systems.
- Collaborated closely with business analysts to gather requirements and deliver technical specifications for personalized credit scoring insights.
- Ensured comprehensive application security with OAuth2, JWT authentication, and maintained PCI-DSS compliance for all enterprise applications.
- Provided mentorship and conducted rigorous code reviews for junior developers, elevating overall code quality and adherence to best practices.

Environment: Java, J2EE, Spring Boot, Hibernate/JPA, REST APIs, AWS, Docker, Kubernetes, Kafka, Redis, Jenkins, PostgreSQL

Epic Systems @ Verona, Wisconsin
Software Developer

Mar 2021 – Aug 2023

- Developed secure healthcare enterprise applications using .NET Core and React.js for managing EMR, claims, and patient data.
- Designed and implemented FHIR-compliant RESTful APIs, enabling seamless interoperability between clinical systems and mobile applications.
- Automated critical data integration workflows for EMR systems, improving reporting efficiency and data accuracy by 30%.
- Migrated existing applications to Azure App Services, significantly enhancing system scalability, reliability, and performance.

- Created responsive web interfaces and interactive dashboards with React.js, integrating real-time patient monitoring APIs for an optimal user experience.
- Built HIPAA-compliant solutions, ensuring secure handling of PHI and implementing robust role-based access control mechanisms.
- Integrated HL7 messaging protocols for smooth and reliable communication between diverse hospital systems and third-party platforms.
- Executed comprehensive unit and integration tests using JUnit and Cypress, achieving an impressive 90% code coverage for quality assurance.
- Participated in Agile ceremonies, collaborating closely with clinicians and business analysts to refine requirements and technical specifications.

Environment: C#, .NET Core, .NET Core MVC, React.js, Azure, FHIR, HL7, SQL Server, Cypress, JUnit, HTML5, CSS3, Bootstrap

Walmart Global Tech @ Bentonville, Arkansas
Software Developer

Dec 2019 – Feb 2021

- Developed scalable backend services using Python and Django for comprehensive inventory, pricing, and e-commerce order processing.
- Designed and implemented a resilient microservices architecture supporting high-volume retail operations across over 1,000 stores.
- Integrated robust APIs for real-time inventory updates, ensuring seamless synchronization between warehouse systems and the online platform.
- Built responsive React.js front-end dashboards for merchandising and supply chain teams, optimizing operational visibility and control.
- Migrated legacy reporting modules into containerized microservices deployed on Kubernetes, enhancing system flexibility and deployment efficiency.
- Implemented message queues using Kafka for efficient asynchronous communication between diverse services, improving system responsiveness.
- Improved database performance by optimizing complex queries on PostgreSQL and MongoDB, reducing data retrieval times by 20%.
- Developed extensive unit and functional tests, achieving 85% automated coverage using PyTest, ensuring high-quality software delivery.
- Collaborated with product managers and UX designers to enhance checkout performance and ensure an optimal user experience.

Environment: Python, Django, React.js, PostgreSQL, MongoDB, Docker, Kubernetes, Kafka, PyTest, Azure, HTML5, CSS3

TECHNICAL SKILLS

Core Java/J2EE: Java, JSP, Servlets, EJB, JMS, MDB, JCA

Java Frameworks: Spring Boot, Spring, Hibernate/JPA, Struts

Web Services & Integration: RESTful APIs, SOAP, GraphQL, WebSockets, XSLT transformations

Front-End Development: React.js, Angular, HTML5, CSS3, Bootstrap, JavaScript, TypeScript

Cloud Platforms: AWS (EC2, S3, Lambda, RDS), Azure (App Services, Functions), GCP

Databases: MySQL, PostgreSQL, MongoDB, Oracle, Redis

DevOps & CI/CD: Docker, Kubernetes, Jenkins, Terraform, GitHub Actions

Other Tools: Microservices, Performance Optimization, Agile/Scrum, VS Code, GitHub, Confluence, Swagger

.NET Technologies: .NET Core, .NET Core MVC, C#, Entity Framework

EDUCATION

Lindsey Wilson University

MS In Technology Management
