Profile Summary

Clinical Data Management Specialist with 8+ years of experience leading global trials across all phases. Highly skilled in CRF/EDC design, data validation, and vendor oversight, with strong regulatory expertise (FDA, ICH-GCP, CDISC). Known for driving cross-functional collaboration to keep timelines on track and data quality high. Recently led database lock for eight studies, achieving a 94% query resolution rate with zero audit findings. A trusted contributor to high-stakes clinical programs by minimizing delays and delivering clean, compliant datasets under pressure..

Skills

Clinical Data Management ✓ CRF & EDC Design Oversight ✓ Data Quality & Validation ✓ Regulatory Compliance (GCP) ✓ CRO & Vendor Oversight ✓ Study Start-Up Activities ✓ Stakeholder Collaboration ✓ Project & Timeline Tracking ✓ Data Cleaning & Query Management - **High proficiency in these skills as demonstrated below.**

Experience

[Navitas Life Sciences](#) | Clinical Data Manager

Feb 2022 - Dec 2025

A global CRO (500+ employees, ~\$50M revenue), where I lead clinical data activities from start-up to lock across multiple studies using EDC, CRF, and GCP standards.

Clinical Data Management: Led end-to-end data activities from study start-up to close-out, ensuring milestones were consistently met within timelines and budget.

Study Start-Up: Coordinated regulatory documentation across global studies, supporting timely site activation and minimizing study delays.

CRF & EDC Oversight: Oversaw UAT for eCRFs and validation documents, ensuring build accuracy and alignment with protocol requirements.

Data Quality & Validation: Performed data checks and supported query resolution efforts to improve dataset integrity and readiness for submission.

CRO & Vendor Oversight: Managed external data vendors and partners, maintaining alignment on deliverables, timelines, and quality standards.

Stakeholder Collaboration: Collaborated with internal teams and study sites throughout the lifecycle, resolving issues and maintaining study momentum.

[Progenity](#) | Senior Clinical Data Manager

Sep 2020 - Feb 2022

A biotech company (700+ employees, \$100M+ revenue), where I led end-to-end data management across Phase I–III trials, managing vendors, EDC systems, query resolution, and regulatory-compliant database locks.

Clinical Data Management: Led the full data lifecycle across multiple studies, ensuring timely delivery and adherence to CDISC, GCP, and internal data standards.

CRF & EDC Design Oversight: Created CRFs, edit checks, and CRF Completion Guidelines, contributing to reduced downstream queries and improved data clarity.

Data Quality & Validation: Conducted trend reviews and discrepancy analysis, proactively resolving issues and improving overall data quality.

Regulatory Compliance (GCP): Developed data management plans and UAT documentation in line with ICH-GCP and FDA requirements, supporting audit readiness.

Vendor Oversight: Collaborated with EDC vendors to resolve system issues and implement updates that enhanced usability and operational efficiency.

Seachange Pharmaceuticals | Lead Clinical Data Manager

Jan 2020 - Aug 2020

A mid-sized pharmaceutical firm (200+ employees), where I managed CRF design, edit checks, and Medidata RAVE builds, while mentoring junior CDMs and ensuring timely database lock for global studies.

Clinical Data Management: Managed the full data management lifecycle across multiple studies, delivering clean datasets aligned with CDISC standards and sponsor expectations.

Regulatory Compliance (GCP): Ensured accuracy of Trial Master File documentation and compliance with SOPs to support audit readiness and alignment with GCP guidelines.

CRF & EDC Design Oversight: Directed UAT of Medidata RAVE CRFs and edit specifications, enhancing build accuracy and reducing the need for rework.

Study Start-Up Activities: Reviewed protocols and led CRF development to ensure that data capture strategies aligned with study endpoints from the outset.

Data Quality & Validation: Identified and resolved data issues prior to database lock through real-time listing reviews and proactive trend analysis.

Seachange Pharmaceuticals | Clinical Data Manager

Jan 2019 - Dec 2019

Oversaw timelines, query workflows, and clinical data integrity, ensuring database readiness across multiple trials.

Clinical Data Management: Directed data management activities for global studies, ensuring consistent achievement of timelines, revenue goals, and SOP compliance.

Stakeholder Collaboration: Represented data management in sponsor meetings and cross-functional study teams, aligning deliverables and addressing scope and risk proactively.

CRO & Vendor Oversight: Managed deliverables across multiple vendors, ensuring data reconciliations and technical specifications met protocol and quality standards.

Data Cleaning & Query Management: Oversaw query resolution and external data reconciliations, contributing to cleaner datasets prior to database lock.

Seachange Pharmaceuticals | Senior Clinical Data Coordinator

Feb 2017 - Dec 2018

Supported CRF development, reconciliation, and site data tracking as a key point of contact for data queries and compliance documentation.

Clinical Data Management: Supported the full data management lifecycle across multiple trials with minimal supervision, contributing to timely and high-quality data delivery.

MedDRA & WHODrug Coding: Assisted with coding tasks and reconciliations, ensuring consistency with global safety and pharmacovigilance requirements.

Study Start-Up Activities: Contributed to the design and testing of CRFs for new studies, enabling accurate and protocol-aligned data capture from launch.

Project & Timeline Tracking: Monitored report submissions and site data status, ensuring timely updates were communicated to clinical teams and stakeholders.

Education

Master of Science: Health Management & Informatics | Kennesaw State University

Master of Science: Biology | Kennesaw State University

Tools & Platforms: Medidata Rave, Oracle InForm, Veeva, REDCap, SAS, Excel, JIRA
