SUMMARY

Recent Computer Science graduate with a 3.966 GPA and hands-on experience in web development and machine learning through academic projects and certifications. Proficient in Java, Python, React, and Node.js, with skills in building scalable systems using AWS, containers, and microservices. Seeking an entry-level software engineering role in an innovative technology company, willing to learn new languages, frameworks, tools, and adapt quickly to support stakeholder needs.

EDUCATION

Bachelor of Science in Computer Science

Southern New Hampshire University • Manchester, NH • 2025 • 3.966

CERTIFICATIONS

Supervised Machine Learning: Regression and Classification

Coursera • 2025

AWARDS & HONORS

Summa Cum Laude

Southern New Hampshire University • 2025

SKILLS

Programming Languages: Clojure, JavaScript, Java (with object-oriented design), Rust, Python, C, C++, C#

Tools / Technologies: Node.js, Express.js, React, Angular, Spring Boot, Git, SQL, MongoDB, DynamoDB

Other: AWS, Web Development, Cloud Computing, Containers, Microservices, Machine Learning, Data Science, APIs, Automation
