

SAI CHANDER REDDY PATLOLLA

Data Analyst

+1 719-463-7681 • saichanderreddypatlolla@gmail.com • Colorado Springs, Colorado

Summary

Experienced Data Analyst dedicated to empowering businesses with data-driven solutions. For over five years, I've utilized SQL, Python, and Tableau to analyze complex datasets, optimize internal operations, and significantly improve website performance. My passion lies in translating intricate data into clear, actionable insights that support strategic growth, and I am seeking a Data Analyst position to continue delivering these impactful results.

PROFESSIONAL EXPERIENCE

Associate Data Analyst

Chennai, India

PII Management and Marketing Solutions Pvt. Ltd

07/2019 - 12/2022

- Developed Python and SQL scripts to ensure high data quality and geospatial accuracy for Google Street view projects
- Executed comprehensive ETL processes to integrate diverse datasets, supporting advanced analytics for visual content
- Created and maintained interactive Tableau and Power BI dashboards, offering real-time insights into Street View project performance
- Conducted exploratory data analysis on localized business data to inform targeted marketing strategies and operational enhancements
- Leveraged advanced Excel and statistical methods for image metadata analysis, guiding improvements in visual content and search optimization
- Owned data validation, implementing automated and manual checks to maintain data accuracy for precise client location representation
- Assisted in prototyping new data models for emerging visual data streams, directly contributing to solution scalability
- Identified and automated data workflows, significantly boosting team efficiency and reducing manual data handling errors
- Significantly improved the precision of Google Street View mapping by implementing a robust Python-based data quality framework, directly enhancing the accuracy of client location representations
- Streamlined data processing, reducing manual effort by 20% via automated ETL workflows, which significantly accelerated the delivery of insights for marketing solutions

Data Analyst Intern

Hyderabad, India

VS2 Software Solutions

05/2018 - 06/2019

- Collaborated on a group project to develop an Online Parking System aimed at streamlining urban parking reservations, management, and payment processing
- Utilized SQL to extract and manipulate raw parking transaction data, improving data accessibility for analysis
- Performed comprehensive data cleaning and validation in Microsoft Excel, including VLOOKUP and basic formulas, ensuring data accuracy by identifying and correcting inconsistencies
- Developed PivotTables and applied data functions in Excel to summarize complex parking usage patterns, providing initial insights into system performance
- Designed and built interactive dashboards in Power BI, integrated charts and maps to visualize real-time parking availability and revenue trends
- Analyzed simulated sensor data to identify peak occupancy times and potential operational bottlenecks, contributing to more efficient resource allocation
- Contributed to a 15% reduction in data entry errors by proposing new data validation rules based on identified inconsistencies, significantly improving data quality
- Automated daily performance reports, reducing manual reporting time by an estimated 3 hours per week and enabling quicker decision-making
- Provided data-driven insights that informed discussions for implementing dynamic pricing models, potentially increasing revenue by optimizing parking rates
- Presented the key takeaways from my analysis to the team, making it easier for them to grasp system performance and spot opportunities for enhancement

Skills / Proficiencies

- **Programming Languages:** SQL, Python
- **Data Visualization & BI Tools:** Tableau, Power BI, Microsoft Excel (Advanced: Pivot Tables, VLOOKUPS, Data Functions)
- **Databases:** MySQL Workbench, Database Management
- **Development Tools:** PyCharm
- **Workflow & Collaboration Tools:** Microsoft Teams, Version Control (Git/GitHub), Data Orchestration (Apache Airflow)

Academic Projects / Personal Projects

Title: Radio Frequency ID card detector - Using rc522 and Arduino UNO Board

- Engineered an RFID card detection system using Arduino UNO and RC522 module to read unique identifiers.
- Developed a functional prototype demonstrating RFID technology for access control or identification.

Title: Arduino Alarm Clock - Using Arduino UNO Board

- Built a digital alarm clock using Arduino UNO, implementing timekeeping and alarm functionalities.
- Integrated user interface components for alarm setting and display, demonstrating microcontroller programming and hardware interfacing skills.

Reels & Media Download for Insta & WhatsApp

- Developed a Flutter application allowing users to download Instagram and WhatsApp reels, photos, and videos in HD quality.
- Contributed as a User Interface designer for this application.

Clones 2D Game

- Developed a 2D game using UNITY with UI/UX elements crafted in Photoshop

Education

Indiana Wesleyan University
Master's Degree in Data Analytics Management

Indiana, United States

ICFAI Foundation for Higher Education
Bachelor of Technology in Electronics & Communication Engineering

Hyderabad, India

Hobbies/Interests

Avid sports fan and participant.
