PROFESSIONAL SUMMARY

- Over 5 years of experience in the IT industry as a Software Engineer with a strong focus on designing integration patterns involving **APIs, ETLs, Databases, and Middleware**.
- Proficient in developing scalable **RESTful APIs** and backend services using **Python (Django, Flask), Java, C++** enhancing performance and user engagement by up to 40%.
- Solid understanding of distributed systems, **AWS services (EC2, VPC, S3, Lambda, IAM)**, and experienced in deploying applications, leading to a 40% reduction in system downtime.
- Skilled in web application development using **HTML, CSS, JavaScript, React, Angular** with significant improvements in data flow efficiency (30%) and client satisfaction (15%).
- Strong background in database management and optimization, utilizing **SQL Server, MySQL, and NoSQL**, with expertise in complex **SQL queries** and **data migration strategies** that reduced downtime by **40%**.
- Proven ability to lead and collaborate with **cross-functional teams**, reducing project delays by 30% and enhancing team productivity by **90%** through mentoring and training.
- Excellent communicator with a talent for translating product requirements into **well-designed systems and architecture**, with a strong commitment to corporate security and information protection.

TECHNICAL SKILLS

Methodology: SDLC, Agile, Waterfall

Languages & Frameworks: Python, OOPS, Java, C++, ETL, Jest

Web Technologies & Version Control Tools: HTML, CSS, Bootstrap, JavaScript, Jira

AWS Services: EC2, VPC, S3, Lambda, Directory Services, Code Pipeline

Operating System: Windows, Linux

Databases: SQL Server, MySQL, NoSQL

Other Tools & Technologies: Docker, Kubernetes, Jenkins

WORK EXPERIENCE

Sr Software Engineer - L&T Technology Service, Plano, TX

Aug 2023 – Present

- Participated in the full **software development life cycle**, including requirements gathering, analysis, and design.
- Developed and maintained website user interfaces using **HTML, CSS, XML, JavaScript, and React JS**, ensuring adherence to user interface standards.
- Developed and tested applications using **Node.js and Jest**, ensuring high code quality.
- Designed and developed **SQL database structures within the Django framework**, following Agile methodology.
- Collaboratively engineered **RESTful web services (APIs)**. Created functional API test cases for **REST APIs using Postman**.
- Managed client-side and server-side user validations and built data management systems using **MySQL**.
- Experienced in using **GIT** for version control. Accessed database objects through **Django Database APIs**.
- Responsible for **debugging and troubleshooting** applications. Generated **use case diagrams, activity flow diagrams**, and object diagrams during the design phase.
- Deployed and managed applications on **Kubernetes** for scalability and resilience.
- Designed and developed multi-tiered and **multi-threaded software applications**. Participated in **code reviews, test-driven development**, and design processes.

Sr Software Engineer - DXC Technology, Hyderabad, IN

Jan 2022 – Jul 2022

- Engineered robust and scalable **RESTful APIs using Python** and frameworks like **Django, Flask**; achieved efficient integration of frontend and backend components, resulting in enhanced performance and increased user engagement by 40%.
- Developed and maintained scalable and resilient applications using **React.js, Angular**, and backend technologies such as **Python**. Designed and implemented APIs that improved data flow efficiency by 30%, while ensuring robust privacy permissions and seamless integration between frontend and backend systems.
- Assisted in Developed complex **SQL queries** to extract and analyze user engagement data from multiple databases. Utilized **Python and JavaScript** to build interactive **data visualization dashboards**, enhancing user insights.

- Partnered with client teams across 20+ projects, delivering quick-turn analytics and enabling rapid client development.
- Managed and analyzed large datasets using **AWS cloud services**, ensuring scalability and performance. This led to a **40% reduction** in system downtime and improved **application performance** and stability across multiple projects.
- Established and maintained **CI/CD pipelines**. Utilized **Docker** containers to package and deploy **microservices** to **AWS EKS**, ensuring reliability.
- Employed **AWS CloudFormation** to automate the provisioning and management of resources, optimizing costs using **AWS Lambda** and **Python**.
- Adhered in an **agile environment** to deliver **50+ high-quality applications** and collaborated with more than 10 business and other engineering teams to possess better knowledge about project.
- Influenced **cross-functional teams** without formal authority, fostering collaboration that led to a 30% reduction in project delays.

Software Engineer - DXC Technology, Hyderabad, IN

Aug 2018 – Dec 2021

- Designed and coded new requirements with broadly defined problems as a Product developer for TransAmerica, impacting 16 million customers.
- Implemented integration solutions using a variety of technologies including **REST APIs, ETLs, and Middleware**. Managed database integration and optimization using **SQL**. Developed a data migration strategy that reduced downtime by 40%.
- Collaborated with **cross-functional** teams to **address 20+ customer issues** weekly, ensuring timely resolution and customer satisfaction, resulting in improved customer retention rates and increased revenue.
- Led full development lifecycle for multiple **SaaS applications**, improving delivery times by 25% through efficient planning and execution.
- Utilized **Infrastructure as Code (IaC)** with **Terraform** to provision and manage cloud resources, ensuring consistency and scalability.
- Administered in building and deploying a multitude of applications utilizing all the **AWS stack including EC2, S3, VPC, IAM, Load Balancer, and Cloud Watch**.
- Implemented **CI/CD pipelines** using GitLab CI/CD, automating builds, tests, and deployments, reducing release cycles by 50%.
- Analyzed and resolved **internal defects**, creating comprehensive **unit test cases for zero-defect delivery**. Furthermore, resolved **10+ production issues**, collectively affecting over \$8.4 billion yearly client business.

Software Product Delivery Intern - DXC Technology, Hyderabad, IN

Jul 2017 – Jul 2018

- Involved in the analysis, specification and implementation, and testing phases of Software Development Life Cycle (SDLC).
- Assisted in the development of web-based applications using Python and React, contributing to a 20% increase in development efficiency.
- Technical processes and application workflows, enhancing team knowledge sharing and onboarding efficiency by 30%.
- Supported senior developers in troubleshooting and debugging, achieving a 90% success rate in issue resolution.

Achievements

- Recognized for outstanding contributions and leadership, awarded the prestigious "**Champs Award**" for exceptional performance in mentoring and enhancing team productivity.
- Presented groundbreaking research at **Research Expo, IIIT Sri City**, showcasing the transformative impact of mobile computing with cloud technology; disseminated findings to 200+ industry experts and academics, sparking discussions on future applications and advancements.

EDUCATION

University of Central Missouri, master's in computer science, Warrens, MO
JNTU Hyderabad, bachelor's in computer science, India

Aug 2022 - Dec 2023
 Sep 2014 - May 2018
