CAREER PROFILE

I am software developer proficient in Problem-solving, Algorithms, Data Structures, Object-Oriented Programming. Experienced in Java, I can also handle Unit Testing, Functional Testing and handling Databases using SQL.

EDUCATION

Texas A&M University-Kingsville, Kingsville, Texas
Masters in Computer Science

Jan 2023 -Dec 2024
GPA : 3.7/4

JNTUA College of Engineering, Pulivendula, Kadapa
Bachelors of Technology, Mechanical Engineering

July 2017-Aug 2021
GPA : 8.78/10

TECHNICAL SKILLS

Languages: C, Java, Python, C#, JavaScript, HTML, CSS

Frameworks: Spring MVC, Spring boot, Junit, .Net, Selenium, JUNIT4, TestNG, Angular, React

Cloud Environments: AWS, EC2, AZURE

Tools: Visual Studio, Visual Studio Code, Eclipse, Git, GitHub

Databases: SQL Server, MySQL, Oracle, MongoDB

AI & ML: Linear regression, logistic regression, decision trees, random forests, k-means clustering, CNN and RNN's

EXPERIENCE

Software Development Engineer, TCS- SWBC (South West Business Corporation for COPERNICUS INSURANCE)

March 2022-January 2022

- Acquired comprehensive web technology skills, including **HTML, CSS, Java, JavaScript and Data Structures**.
- Successfully transitioned to advanced development tools like **React, Django, and MongoDB** for complex projects.
- Collaborated effectively with senior developers, enhancing **problem-solving and analytical skills** in dynamic teams.
- Executed and led a full-stack project using **Django, MongoDB, and Python**, showcasing applied skills. Focused on meticulous code documentation and robust version control for quality, sustainable future development.

Software Development Engineer in Test, TCS – SWBC (South West Business Corporation for COPERNICUS INSURANCE)

October 2021- March 2022

- Been in a team of 4 people, did **Manual Testing** and written **Test Cases** for the applications developed for Copernicus in **Agile methodology**. Scripted the automation code using **Selenium automation tool with java**. Used technologies like **JUNIT4** for executing test cases and Managed the sprints and code review using **JIRA**
- Deployed the application to Jenkins for **CI/CD** which automates application deployment to the server on code change.

PROJECT

Sales Dashboard | Python, HTML, CSS, JavaScript

August 2021

- Developed a dynamic web application for visualizing sales data using Python, HTML, CSS, and JavaScript.
- Expertly designed and implemented a robust MySQL database schema for efficient management of sales data.
- Implemented secure user authentication and comprehensive role-based access control for secure application usage.

Designed E-commerce website | Java, React, CSS, HTML

April 2021

- Built a comprehensive E-commerce site with HTML, CSS, JavaScript, J-Query, Java, and React.
- Engineered server-side functions in Java for user authentication, product data management, and payment process.
- Utilized React for front-end efficiency, enabling dynamic components and smooth data flow to the back-end.
