

Sude Has

Software Development Engineer in Test

sudehassdet@gmail.com 706-406-1212

Green Card Holder | <http://www.linkedin.com/in/sude-h-as> | Atlanta, GA

CAREER OBJECTIVE

As a seasoned full stack Software Development Engineer in Test with over 5+ years of experience, I primarily worked on Automation, Functional, End to End including UI, Database, API Web services. I am experienced in various domains such as CRM and cloud-based applications with hands on experience in BDD and Data Driven frameworks. I am always looking for opportunities where I can utilize and expand my skill set in quality assurance. I am eager to utilize my knowledge to develop and maintain automation frameworks while providing valuable testing guidance. I can adapt quickly to new unfamiliar technologies while applying and improving existing skills.

PROFESSIONAL SUMMARY:

- Expertise in creating, modifying, and maintaining new and existing Automation Framework Models, such as **BDD, TDD, and Data Driven Frameworks**.
- Solid knowledge of tools such as **Selenium WebDriver, TestNG, JUnit, Cucumber, Maven** and highly experienced in **smoke testing, regression testing, database testing, end-to end testing, API testing and user acceptance testing (UAT)** using both manual and automated testing tools.
- Expertise in creating **SQL Queries** and performed **Database validation** working with **JDBC libraries**.
- Proficient in **POSTMAN** and **RESTful API (GET, POST, PUT, DELETE)** to validate response time and error code using Rest Assured Library.
- Created and maintained **Jenkins** jobs for **CI/CD** purposes with AWS cloud services.
- Efficient in bug tracking and reporting with high level of detail, accuracy and informative recreation steps.
- Instrumental in **JIRA-XRAY** for global test management, **Html/Cucumber reports**, and **OOP Concepts**.
- Ability to work with a cross-functional team to ensure quality throughout the software development lifecycle.

TECHNICAL SKILLS:

- **Languages:** Java(main), SQL, XML, JSON, HTML, Gson, Gherkin (Cucumber)
- **Testing Tools:** Selenium WebDriver, JUnit, TestNG, Lombok, Hamcrest, JDBC, Cucumber, API RESTful, RESTAssured, Postman, Apache POI, Appium.
- **IDE:** Eclipse, IntelliJ, SQL Developer, Postman
- **Build/CI/CD Tools:** Maven, Jenkins
- **Cloud Technologies:** AWS (Amazon Web Services): EC2.
- **Databases:** Oracle, PostgreSQL
- **Frameworks:** Behavior-driven, Data-driven, Hybrid, Page Object Model (POM)
- **Defect Tracking Tools:** Jira Xray
- **Certifications:** Certified Salesforce Administrator
- **Project Methodology:** Agile – Scrum
- **Version Control System:** Git, GitHub
- **MS Office Tools:** Outlook, Word, Excel, PowerPoint
- **Traits:** Responsible, quick learner, cross functional, organized

PROFESSIONAL EXPERIENCE:

Customertactic: Tysons, VA

May 2021 – Present

SDET (Software Development Engineer in Test)

- Collaborated with team members in Agile along with actively involved in different ceremonies like Grooming, Sprint Planning, Daily scrum, Demo, and Retrospective meetings.
- Analyzed business requirements, developed test plans, test cases.
- Executed Front-End and Back-End Testing both Manually and in Automation.
- Conducted Functional, Regression and Smoke testing using a BDD and Data Driven framework.

- Evaluated and enhanced the product quality via executing various testing methodologies like Functional Testing, Regression testing, Smoke testing, API testing, Positive Testing, Negative Testing, Sanity Testing, and End to End Testing.
- Reduced code redundancy and improved test case processes via executing and maintaining Page Object Model (POM) for each page object as per automation testing framework using Selenium WebDriver, Maven, JUnit, and Cucumber with Behavior-driven Development (BDD) using Java as main programming language with Object Oriented Programming (OOP).
- Developed Cucumber step definitions, reality-based scenarios, scenario outlines, and features using Gherkin language; using BDD to ensure software development aligns with business goals.
- Ensured functionality, reliability, and security of related software through performing API (Web Services) Testing using Postman and RESTAssured library.
- Implemented Mock API to improve efficiency and reduce automation time.
- Implemented serialization and deserialization in API web services using POJO classes.
- Retrieved test data from Oracle Database by writing and sending SQL queries through JDBC connection.
- Ensured code quality, handled exceptions, clever error analysis, and refactoring Java codes using IntelliJ IDE to automate entire software testing procedures.
- Used Jira Xray for project management as a Defect tracking and reporting tool.
- Executed Git as a Version Control tool and GitHub as a remote repository to share codes with teammates.
- Integrated with Jenkins CI/CD tool for scheduling and execution of Smoke and Regression suites.
- Proactively saved time and resources for the company by effective and timely communication with all Scrum team members.

Environment: Java, Selenium WebDriver, Cucumber, JUnit, Maven, Jenkins, Postman, SQL Developer, JDBC, RESTAssured Library, HTML, Git/GitHub, SQL, Oracle, AWS EC2, CI/CD and Jira Xray.

Zibetra: Tysons, VA
QA Automation Tester

August 2018 – April 2021

Responsibilities:

- Configured Maven (automation) tool and testing .xml file as well as developed test automation scripts in Java using Selenium, and page object model (POM) to support Test Suites, Passing Parameters, Parallel Testing.
- Engaged in code reviews, walkthroughs, and collaborated with the business team and developers to resolve defects.
- Thoroughly understood and converted manual test cases into automation smoke and regression suites.
- Generated Extent-Reports, which provided interactive and detailed reports with screenshots of failed scenarios.
- Implemented Agile methodology (Scrum) to have a strong understanding on how the user will use the application and ensure the product meets acceptable quality assurance standards.
- Provided Defect log on project management tool at Jira-Xray, including steps to reproduce, actual vs. expected result etc. in clear and concise manner.
- Efficiently developed Data-driven test automation framework using Selenium WebDriver that reduced the unnecessary test scripts and stored data in external sources like Cucumber Examples table, Excel files etc. by integrating Apache POI library.
- Performed data validation in database by creating SQL queries.

Environment: Java, Selenium WebDriver, Maven, HTML, JUnit, Postman, SQL Developer, Git/GitHub, Jira Xray.

EDUCATION:

- Master's degree: University of Central Florida in FL, USA | Bachelor's degree: Bogazici University in Istanbul, Turkey.
