

# SUMMER BAPTISTE

773.766.5945 | Chicago, IL | [summerbaptiste7@gmail.com](mailto:summerbaptiste7@gmail.com) | [www.linkedin.com/in/summer-baptiste/](https://www.linkedin.com/in/summer-baptiste/)

## SUMMARY

Data Analyst with 4+ years of experience delivering automated reporting, BI dashboards, and statistical analysis across healthcare research and B2B SaaS consulting. Skilled in SQL-driven data extraction, R and Python modeling, and translating complex results into decision-ready narratives for stakeholders. Demonstrated impact across turnaround time, data reliability, revenue outcomes, and executive visibility through disciplined analytics delivery.

## PROFESSIONAL EXPERIENCE

### Senior Data Analyst, Statistics

Oct 2023 - Present

Ann & Robert H. Lurie Children's Hospital | Chicago, IL

- Reduced reporting turnaround time by up to 40% by building reproducible R pipelines for ETL, data cleaning, standardization, and automated deliverables across 20+ pediatric studies.
- Advised clinical study design by partnering with clinical stakeholders and the Chair of Surgery to define research questions, success metrics, and analysis plans, improving protocol alignment through power and sample-size analyses.
- Increased reliability of downstream analyses by wrangling and validating 50 to 250,000+ records using R, SQL, and Excel QA checks, reducing data defects by up to 64%.
- Drove adoption of 3 clinical protocol updates by translating regression, mixed effects, survival, and time series results into clear narratives and ggplot2 visualizations for medical staff.
- Secured \$2,000,000+ in grant funding by delivering stakeholder-ready statistical outputs and documentation on schedule, supporting 12 publications and 9 presentations.
- Strengthened team capability by leading 6+ trainings on SQL, R, and reproducible reporting, mentoring junior analysts, and improving self-sufficiency by 17%.

### Data Scientist

Jun 2022 - Sep 2023

Insight2Profit | Chicago, IL

- Generated \$23,000,000 in revenue impact by executing pricing optimization, churn analysis, and forecasting across 6+ B2B engagements using SQL, R, Python, and statistical modeling.
- Identified high-value customer cohorts by analyzing 500,000+ SaaS records in SQL and R, improving retention by 7% and deal margins by 13%.
- Automated SQL-connected extraction and built reusable reporting datasets with R and Python transformations and validation checks, saving 20+ analyst hours per week and lowering computational spend.
- Built Power BI dashboards and KPI frameworks for usage, churn, conversion, and tier performance, reducing QBR preparation time by 40%.
- Improved pricing accuracy by 10% by collaborating with product, sales, and data engineering to translate requirements into analytical recommendations, increasing stakeholder adoption.
- Standardized analytics delivery by documenting data preparation and reporting templates in Confluence and tracking work in Jira, reducing new-hire ramp time by 15%.

### Data Analyst, Research

Jan 2021 - May 2022

Loyola University Chicago | Chicago, IL

- Improved model accuracy by ~11% by applying linear mixed effects models and piecewise structural equation modeling in R, strengthening publication-ready findings.
- Streamlined preprocessing by scripting reproducible R steps for data cleaning, transformation, and validation, trimming analysis cycle time by 5 hours per week.
- Coordinated research milestones by gathering requirements, drafting analysis plans, and aligning timelines with faculty and peers, reducing iteration cycles.
- Enhanced reuse by documenting assumptions, methods, and outputs in Markdown notebooks, enabling faster handoffs and consistent replication.

## EDUCATION

**Master of Science**, Applied Statistics | Loyola University Chicago

**Bootcamp Certificate**, Data Science & Visualization | Northwestern University

**Bachelor of Science**, Statistics | University of Illinois - Chicago

## SKILLS

**Core Deliverables:** Data analysis and actionable insights, Dashboard development, KPI reporting, Executive reporting, Recurring reporting, Monitoring dashboards, Trend analysis, Ad hoc analysis

**Operating Model:** Cross-functional collaboration, Requirements gathering and stakeholder needs translation, Communicate insights and recommendations to stakeholders, Translate business needs into analytics solutions

**Data Foundations:** Define KPIs and metrics, Data modeling and dataset development, Self-serve analytics enablement, Documentation of findings and recommendations, Data quality improvement, Data governance and QA/testing, Process improvement recommendations, Experimentation analysis

**Tools & Platforms:** SQL, R, Python, Power BI, Snowflake, Tableau, Excel, Jira, Confluence, Markdown, ggplot2
