

SUMMARY

- Data Analyst with more than 3 years of professional experience in building Data Analytics infrastructure and solutions to increase efficiency in business operations
- Expert knowledge in SDLC (Software Development Life Cycle) and was involved in all phases of projects
- Experience in using Python libraries such as Pandas, NumPy, Matplotlib, and Seaborn
- Coordinated with other developers in tuning long-running SQL queries to enhance system performance
- Proficient in main Business Intelligence tools such as Tableau and Power BI for creating dynamic dashboards and reports for various business functions.
- Knowledge in documenting requirements changes using a Traceability matrix, good understanding of Business Requirements Documents (BRD), Functional Requirements Documents (FRD), and Software Requirements Specifications (SRS).
- Strong experience using Excel functions to dump the data and analyze based on business needs, proficient in PivotTables, VLOOKUPs, and Power Query
- Proficient in preparing Presentations, Graphs, and Pivot Tables using Microsoft Excel and PowerPoint.
- Working understanding of Tableau, MS Office Suite, MS Visio & Power BI for visualization & presentations Proficiency in Microsoft Office Suite (Excel, PowerPoint, Word, Visio & Outlook)
- Experience in publishing Power BI Desktop reports created in Report View to the Power BI services
- Experience working on Tableau (Desktop, Server, Reader), creating various Reports & Dashboards with different functionalities
- Extensively used performance monitor/SQL profiler to solve deadlocks/long-running queries
- Able to translate business needs into complex analysis designs and recommendations
- Team player with detail and result-oriented problem-solving, communication, and interpersonal skills and quickly assimilate the latest technologies, skills, and ideas

SKILLS

Languages:	Python, R programming, SAS, and SQL
Libraries:	Pandas, NumPy, SciPy, TensorFlow, Scikit-Learn, and PySpark
Databases:	PostgreSQL, MS SQL Server, MySQL, Oracle, MongoDB, DynamoDB, and RDS
Others:	AWS, Azure, GCP, ETL, Glue, Airflow, Informatica Power Center and DBT
Machine Learning:	Statistical Modeling, Ensemble Modeling, DNN, scikit-learn, NLP, LSTM, CNN, Computer Vision, and A/B Testing
Tools:	Tableau, Power BI, Looker, Snowflake, GitHub/Git, Jira, Confluence, and MS Office suite
Methodologies:	SDLC, Agile, Scrum, and Waterfall
Languages:	Python, R programming, SAS, and SQL

EXPERIENCE

ACL Digital

Data Analyst

| Feb 2024 – Present

- Collected, processed, and analyzed large datasets using Python (Pandas, NumPy) and SQL (PostgreSQL, MS SQL Server, MySQL, Oracle).
- Developed and implemented statistical models and machine learning algorithms using scikit-learn, TensorFlow, and PySpark.
- Applied ensemble modeling techniques, deep neural networks (DNN), and natural language processing (NLP) for advanced data analysis.
- Conducted A/B testing and hypothesis testing to evaluate model performance and business strategies.
- Designed and implemented ETL processes using AWS Glue, Airflow, Informatica Power Center, and DBT to ensure seamless data flow and integration across systems.
- Managed and optimized data pipelines for efficient Data extraction, transformation, and loading.
- Created interactive dashboards and reports using Tableau, Power BI, and Looker to visualize key performance indicators (KPIs) and business metrics.
- Ensured data integrity, security, and performance of relational and NoSQL databases.
- Leveraged cloud platforms such as AWS, Azure, and GCP for data storage, processing, and analysis.
- Collaborated with cross-functional teams using Jira and Confluence to manage projects and track progress.
- Applied Agile, Scrum, and Waterfall methodologies to ensure timely delivery of projects and adaptability to changing requirements.

- Used GitHub/Git for version control, ensuring codebase integrity and collaboration among team members.
- Provided strategic insights and recommendations based on data analysis to support business decisions.
- Conducted market research and competitive analysis to identify trends and opportunities for growth.

Sonata Software, IND

| Jul 2019 – Jul 2022

Data Analyst

- Spearheaded a data analysis project that increased sales by 15% through data-driven insights and actionable recommendations.
- Developed Python scripts for data preprocessing and exploratory data analysis, reducing data processing time by 30%.
- Implemented predictive modeling algorithms and created SQL queries to extract data from sales data marts, improving forecast accuracy by 20%.
- Designed Tableau visualizations using Scatter Plots, Geographic Maps, Pie Charts, Bar Charts, and Density Charts, enhancing stakeholder engagement by 40%.
- Developed source-to-target data mappings for reports and create pivot tables in Excel, increasing reporting efficiency by 25%.
- Created, developed, and ran SQL scripts to implement database modifications such as table updates, index additions or updates, view construction, and store procedures
- Created Power BI Desktop reports in Report view for the Power BI service using Power BI Desktop reports
- Created monthly statistical reports and collaborated with the research Analytics team
- Worked on data warehouses, data modeling, and data mining.
- Conducted tests, transferred expertise, and mentored other team members.
- Collaborated with subject matter experts as business requirements analysts to discover and understand requirements.

EDUCATION

Master of Computer and Information Science

| Aug 2022 – May 2024

Western Illinois University, Macomb, Illinois

Bachelor of Computer Science and Engineering

| Aug 2017 – Jul 2021

Jawaharlal Nehru Technological University of Hyderabad, Telangana, India
