EDUCATION

California State University, Fullerton, CA

Master of Science, Computer Science

May 2024

B M S College of Engineering, Bangalore, India

Bachelor of Engineering, Information Science and Engineering

August 2019

PROFESSIONAL EXPERIENCE

JCPenney

Bangalore, Karnataka, India

Engineer 1 - Backend Developer

July 2019 - July 2022

- Created a new API endpoint in compliance with the California Customer Privacy Act (CCPA) to facilitate user-initiated updates of personal information
- Developed various features such as Delete Account for IOS, Date of Birth, Duplicate Address Removal, and Lookup by Phone for the JCPenney e-platform to enhance user experience
- Accomplished tech debts Gradle upgrade, Config Layering migration, and Spring Boot 2.0 Migration (I.e., from 1.5.x to 2.1.x and 2.1.x to 2.2.x)
- Led and programmed validation framework for PII (Personally identifiable information) using a factory design pattern to ensure same validations across platform and co-ordinated with four other teams for requirements
- Collaborated with Quality Assurance (QA) team to promptly identify and address software defects, implementing effective bug fixes to improve product quality and ensure optimal user experiences.
- Accomplished JUnit test cases using Mockito framework for written code to maintain 85% code coverage
- Adapted to agile methodology and hands-on experience with software tools Git, Splunk, Bitbucket, Jenkins, and Jira

DigiClips

Remote, United States

Apprenticeship under Prof. Mikhail Goffman - Developer

Oct 2023 - Present

- Under Guidance from Professor Dr. Mikhail Goffman and the DigiClips product team, successfully migrated search engine front-end application from Angular 14 to 15 and subsequently from 15 to 16
- Led the initiative to migrate the test automation framework from Protractor to Cypress, taking ownership of the entire migration process from planning to execution
- Identified and addressed critical vulnerabilities in both the front-end and back-end components of the search engine Angular application, ensuring the security and integrity of the entire system
- Currently leading the deployment efforts for both the front-end and back-end components of a search engine Angular application by architecting Node.js and Express.js servers in the AWS Cloud environment

ACADEMIC EXPERIENCE

California State University Fullerton

California, Fullerton, United States

Teaching Associate

Jan 2024 - Present

- Instructed undergraduate students in CSPC 449 (Web Backend Engineering), encompassing server-side scripting, RESTful APIs, Flask framework, and database management
- Develop and administer assignments, exams, grading, and projects to assess student understanding and proficiency in web backend engineering concepts
- Provide timely and effective clarification of doubts and queries to students, fostering a supportive learning environment

PROJECTS

Data Analysis with Spark, Cassandra, and Kubernetes

January 2023 - May 2023

- Developed a Java-based solution to analyze e-commerce sales data, leveraging a Spark cluster and Cassandra database by deploying in a Kubernetes node (Minikube) and processed 40 million records and stored results back in the database

TECHNICAL SKILLS

- Programming Languages and Technical: Java, Python, TypeScript, HTML, HTML
- Technical: Cassandra Database, Kubernetes, SQL
- Framework: Spring Boot, Netflix OSS Libraries (Feign, Hystrix, Zuul, Eureka), Bootstrap, Spark (Java RDD), Angular, Flask
- Tools: IntelliJ, Jira, GIT
